TR-3 / TR-4 Installation Instructions

1. Confirm GPS reception prior to installation.

2. Drill a 7/8" hole through the top or side of the signal cabinet and remove all sharp edges with file or deburring tool.

3. Insert the GPS antenna through the hole and secure it with the lock nut.

4. Connect the harness to the GPS antenna and to the DB9 on the TR-3.

5. Connect the yellow/black wire to logic ground and the yellow/white wire to the controller input for clock reset.

6. Connect the harness to the bottom of the TR-3 and plug in the power cord.

NOTE: Refer to the setup instruction sheet for programming the TR-3 GPS time reference.
