ASX Announcement

Corporate Presentation Update – October/November 2022

AVZ Minerals Limited (ASX: AVZ, OTC: AZZVF) (**AVZ** or **Company**) is pleased to provide the attached Corporate Presentation to be delivered by AVZ's Managing Director, Mr Nigel Ferguson at the Company's future Roadshows.

Please find attached a copy of today's presentation.

Yours sincerely,

Ben Cohen
Joint Company Secretary

This release was authorised by Nigel Ferguson, Managing Director of AVZ Minerals Limited.

AVZ Minerals Limited

CORPORATE PRESENTATION

October/November 2022

Important Notice and Disclaimer

This presentation should be considered in its entirety. If you do not understand the material contained in this presentation, you should consult your professional advisers. The sole purpose of this presentation is to provide shareholders with an update on current activities of the Company and the current state of exploration at the Manono Lithium and Tin Project in the Democratic Republic of Congo. Any statements which may be considered forward looking statements relate only to the date of this presentation document. Such forward looking statements involve known and unknown risks, uncertainties and other important factors beyond the Company's control that could cause actual results, performance or achievements of the Company to be materially different from future results, performance, or achievements expressed or implied by such forward looking statements. As a result of these factors, the events described in the forward-looking statements in this document may not occur. Notwithstanding the material in this presentation, shareholders should consider that any investment in the Company is highly speculative and should consult their professional advisers - whether scientific, business, financial or legal - before deciding whether to make any investment in the Company. The Company may at its absolute discretion, but without being under any obligation to do so, update, amend or supplement this presentation or any other information to the recipient. No person has been authorised to give any information or make any representation other than contained in this document and if given or made, such information or representation must not be relied on as having been so authorised.

Competent Person Statement

The information that relates to Ore Reserves is based on information compiled by Mr Daniel Grosso and reviewed by Mr Karl van Olden, both employees of CSA Global Pty Ltd. Mr van Olden takes overall responsibility for the Report as Competent Person. Mr van Olden is a Fellow of The Australasian Institute of Mining and Metallurgy and has sufficient experience, which is relevant to the style of mineralisation and type of deposit under consideration, and to the activity he is undertaking, to qualify as Competent Person in terms of the JORC (2012 Edition). The Competent Person, Karl van Olden has reviewed the Ore Reserve statement and given permission for the publication of this information in the form and context within which it appears. The estimated ore reserves underpinning the production target have been prepared by Competent Person, Karl van Olden from CSA Global, in accordance with the requirements in Appendix 5A of the (JORC Code) 2012. Mr van Olden consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The Mineral Resource estimate has been completed by Mrs. Ipelo Gasela (BSc Hons, MSc (Eng)) who is a geologist with 14 years' experience in mining geology, Mineral Resource evaluation and reporting. She is a Senior Mineral Resource Consultant for The MSA Group (an independent consulting company), is registered with the South African Council for Natural Scientific Professions (SACNASP) and is a Member of the Geological Society of South Africa (GSSA). Mrs. Gasela has the appropriate relevant qualifications and experience to be considered a Competent Person for the activity being undertaken as defined in the 2012 edition of the JORC Code. Mrs. Gasela consents to the inclusion in the report of the matters based on her information in the form and context in which it appears.

The information in this report that relates to metallurgical test work and Exploration Targets results is based on, and fairly represents information compiled and reviewed by Mr Nigel Ferguson, a Competent Person who is a Fellow of The Australasian Institute of Mining and Metallurgy and Member of the Australian Institute of Geoscientists. Mr Ferguson is a Director of AVZ Minerals Limited. Mr Ferguson has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resource and Ore Reserves". Mr Ferguson consents to the inclusion in this report of the matters based on this information in the form and context in which it appears.

Cautionary Statement: Definitive Feasibility Study Parameters

The DFS referred to in this document is based upon Proved and Probable Ore Reserves, derived from Measured and Indicated Mineral Resources. No Inferred Mineral Resource is included in the estimation of Ore Reserves. The Company advises that the Proved and Probable Reserve provides 100% of the total tonnage and 100% of the total lithium and tin underpinning the forecast production target and financial projections. No Inferred Mineral Resource is included in the Life of Mine plan. The DFS is based on the material assumptions outlined in this document. These include assumptions about the availability of funding. While the Company considers all of the material assumptions to be based on reasonable grounds, there is no certainty that they will prove to be correct or that the range of outcomes indicated by the DFS will be achieved.

To achieve the range of outcomes indicated in the DFS, funding in the order of US\$545 M will likely be required. Investors should note that there is no certainty that the Company will be able to raise that amount of funding when needed. It is also possible that such funding may only be available on terms that may be dilutive to or otherwise affect the value of the Company's existing shares. It is also possible that the Company could pursue other 'value realisation' strategies such as a sale, partial sale or joint venture of the project. If it does, this could materially reduce the Company's proportionate ownership of the project. Given the uncertainties involved, investors should not make any investment decisions based solely on the results of the DFS.

Project approval and development remains subject to market conditions, project financing, and Board and regulatory approvals. There is no certainty that the DFS or the Ore Reserve from which it was derived will result in commercial production or the assumptions used in the DFS and resulting economic outcomes that are included in this document will be realised. Unless otherwise stated, all cash flows are in US dollars and are not subject to inflation/escalation factors and all years are calendar years. The estimate accuracy has been developed to comply with AACE International Recommended Practice No. 47R-11, Class 3, nominally $\pm 15\%$.

This document has been prepared in accordance with the JORC Code (2012) and the current ASX Listing Rules. The Company has concluded that it has a reasonable basis for providing forward-looking statements included in this document. The detailed reasons for this conclusion are outlined throughout this document. Your attention is drawn to the preceding Disclaimer and the Forward-looking Statements.

Important Notice and Disclaimer

No New Information or Data

For reference to "DFS" refer to ASX Announcement dated 21 April 2020 "AVZ delivers highly positive Definitive Feasibility Study for Manono Lithium and Tin Project".

This document has been prepared in accordance with the JORC Code (2012) and the current ASX Listing Rules.

Any reference to Proved and Probable Ore Reserves are made with reference to the previous Company Announcement "JORC Ore Reserves increase by 41.6% at Roche Dure" dated 14 July 2021 and any reference to Mineral Resources are made with reference to the Company Announcement "Updated Mineral Resource Estimate Includes Pit Floor "Wedge" Drill Results" dated 24 May 2021.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and, in the case of estimates of Mineral Resources and Ore Reserves, all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not materially changed from the original market announcement.

Cautionary Notes: Exploration Targets

The potential quantity and grade of the Exploration Target is conceptual in nature, there has been insufficient exploration to estimate a Mineral Resource and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

Cautionary Notes: Forward Looking Statements

Certain statements contained in this document, including information as to the future financial or operating performance of AVZ and its projects may also include statements which are 'forward-looking statements' that may include, amongst other things, statements regarding targets, estimates and assumptions in respect of mineral resources and anticipated grades and recovery rates, production and prices, recovery costs and results, capital expenditures and are or may be based on assumptions and estimates related to future technical, economic, market, political, social and other conditions. These forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by AVZ, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies and involve known and unknown risks and uncertainties that could cause actual events or results to differ materially from estimated or anticipated events or results reflected in such forward- looking statements.

Forward-looking statements can generally be identified by the use of forward looking words such as "likely", "believe", "future", "project", "should", "could", "target", "propose", "to be", "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "continue", and "guidance", and other similar words and expressions, which may include, without limitation, statements regarding plans, strategies and objectives of management, expected exploration costs for the Company and indications of, and guidance on future earnings or financial position or performance. Any such forward-looking statement also inherently involves known and unknown risks (including risks generally associated with the mining industry), uncertainties and other factors that may cause actual results, performance and achievements to be materially greater or less than estimated.

Any forward-looking statements are also based on assumptions and contingencies which are subject to change without notice and which may ultimately prove to be materially incorrect. Investors should consider the forward-looking statements contained in this document, in light of those disclosures and not place undue reliance on such statements.

The forward-looking statements in this document are not guarantees or predictions of future performance and may involve significant elements of subjective judgment, assumptions as to future events that may not be correct, known and unknown risks, uncertainties and other factors, many of which are outside the control of the Company. The forward-looking statements are based on information available to the Company as at the date of this document. Except as required by law or regulation, the Company undertakes no obligation to provide any additional or updated information or update any forward-looking statements, whether as a result of new information, future events or results or otherwise. To the maximum extent permitted by law, each member of the Company and its respective directors, officers, employees, advisers, agents and intermediaries disclaim any obligation or undertaking to release any updates or revisions to the information to reflect any change in expectations or assumptions. No member of the Company makes any representation or warranty (express or implied) as to the fairness, accuracy, reliability, currency or completeness of any forward-looking statements contained in this document.

Authorisation of release

Release of this market announcement is authorised by Nigel Ferguson, AVZ Minerals Limited's Managing Director.

WHO WE ARE

A transformative resources company focused on underpinning the global green energy transition, uplifting the lives of host communities and concurrently delivering long term benefits for stakeholders and the environment.

CORPORATE SNAPSHOT

The AVZ and Manono team consists of an excellent mix of technical, corporate and legal professionals with over 150 years of combined African experience and with major mining operations both in Africa and globally

DFS (April 2020)¹ Key Financial Metrics Base Case Scenario - LoM 20 years and SC6 CIF Price US\$699/t

Metric	Pre-tax (100% basis)	Post-tax (100% basis)
Project NPV₁₀	USD 2,348 M	USD 1,028 M
IRR	53.15%	33.15%
EBITDA	USD 8,359 M	USD 8,359 M
TAX	N/A	USD 4,034 M
Profit After Tax (NPAT)	N/A	USD 3,779 M

¹ Refer to ASX Announcement dated 21 April 2020 "AVZ delivers highly positive Definitive Feasibility Study for Manono Lithium and Tin Project"

PROJECT BACKGROUND

Ownership

- **75% owned by AVZ Minerals Limited**
- 25% owned by DRC Government interests (10% to be ceded to Government with AVZ maintaining rights to secure an additional 15%)
- Cornerstone investor secured to acquire 24% of the project for US\$240M¹

Status

- 4.5 Mt/a DFS completed in April 2020
- Approval of all 7 ESIA's (completed August 2021)
- Awaiting grant of Permis d'Exploitation or Mining Licence

Mine Type

- Open pit, hard rock lithium, tin and tantalum
- Alluvial tin and tantalum

ESG Credentials

- Independent assessment shows Manono to have one of the lowest carbon footprints of any global hard rock lithium miner
- AVZ is committed to the sustainable development & empowerment of local communities, which we operate with

Estimated Life of Mine (LoM)

- LoM 29.5 years, mining one third of the mineral resource
- Potential to significantly extend LoM and production throughput

Process Flow Sheet

- 2 stage crush, HPGR, DMS and Calcination plant for lithium Sulphate
- Wilfley tables and magnetic separation for tin and tantalum recovery

Products

- Initial production of 700 kt/a SC6 and 46 kt/a Primary Lithium Sulphate, additional credits for Tin, Tantalum and Niobium

Capital Requirement (DFS)

- US\$ 545M (including contingency of US\$ 49M)

Infrastructure

- Refurbish the Mpianga Mwanga hydro-electric power station, approx. 87 km from the site
- Water readily available from the local man-made Lake Lukushi
- Roads and rail to Dar es Salaam port in Tanzania and Lobito port in Angola via Kabondo Dianda Intermodal Staging Station

¹ Refer to ASX Announcement 27 September "Cornerstone investor secured for development of Manono Lithium and Tin Project"

AWAKENING THE MONSTER

Project Scalability

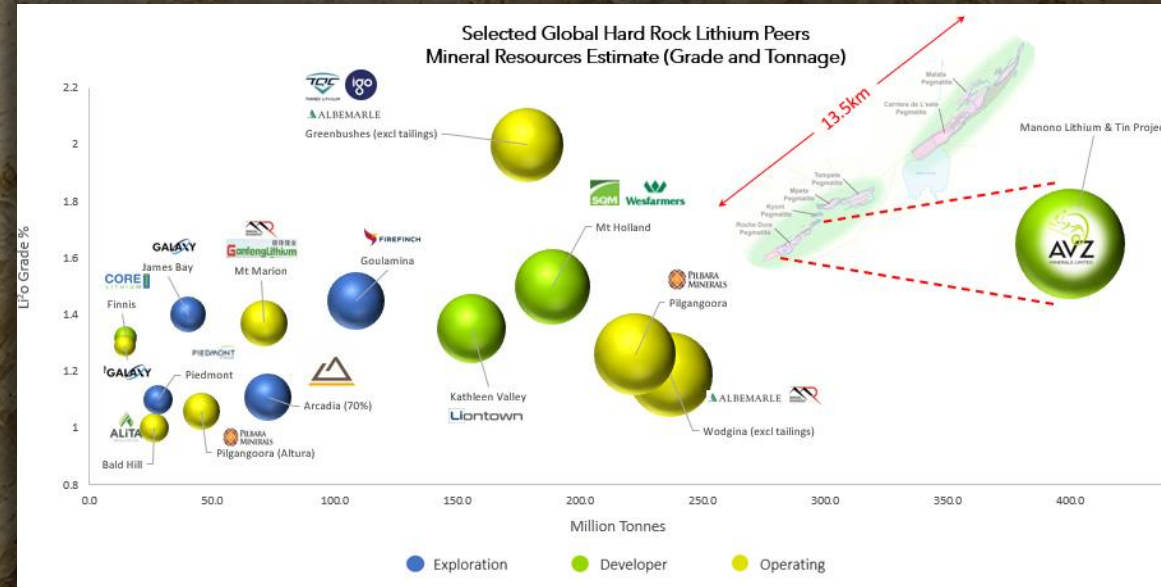

- Roche Dure**
- Resource 401 Mt @ 1.65% Li₂O (spodumene)
 - Reserves 132 Mt @ 1.63% Li₂O
 - Reserve LoM 29.5 years
 - Homogenous in grade
 - Strip ratio < 0.5:1

- Exploration**
- Drilling to date concentrated on the Roche Dure Prospect at Manono

- Potential**
- Highly prospective remaining open along strike and at depth currently being drilled¹

Chart represents tonnes of ore from disclosed Resource estimates and recent company presentations as published by respective project owners. These estimates may have been prepared under different estimation and reporting regimes and may not be directly comparable. Refer to Appendix 1 for the Peer Comparison Information including Resource Classifications. AVZ accepts no responsibility for the accuracy of resource estimates other than its own.

¹ Refer to ASX Announcement dated 31 October 2022 "Positive Results from Initial Roche Dure Extension Drilling Program"

LITHIUM DEMAND

"A total of 11.2 million tonnes of lithium (LCE) will need to be produced in 2050, over 20 times the amount produced last year"

*Benchmark Minerals
Oct 2022*

- 11.2Mt LCE ~ c. 80Mt SC6
- 2021 demand 0.5Mt LCE
- Production 700kt SC6 or 100kt LCE represents c. 20% market share (2021 demand)
- Potential to scale the project to meet forecast future demand growth

* Lithium Demand based on Wood Mackenzie Global Lithium Outlook 2022

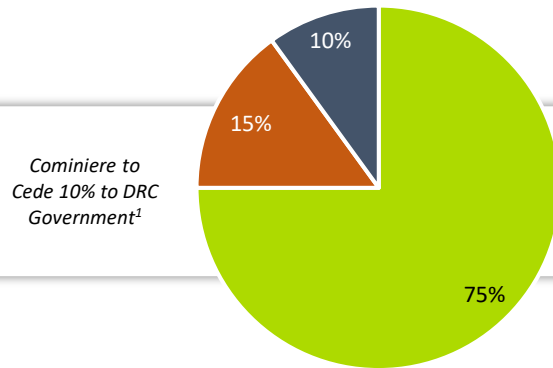

MANONO LITHIUM AND TIN PROJECT - OWNERSHIP

Dathcom - Current Ownership

■ AVZ ■ Cominiere

1. Dathcom - Post Award of Mining Licence*

■ AVZ ■ Cominiere ■ DRC Government

Cominiere to Cede 10% to DRC Government¹

2. Dathcom - Post Completion of CATH Transaction*

■ AVZ ■ CATH ■ Cominiere ■ DRC Government

AVZ sells 24% to CATH on completion of TIA²

3. Dathcom - Post AVZ Negotiation with DRC Government for Cominiere 15%*

■ AVZ ■ CATH ■ DRC Government

Subject to AVZ successfully negotiating the purchase of 15% from Cominiere in accordance with AVZ's existing rights under the Dathcom Shareholders Agreement³

AVZ currently holds a 75% equity interest in the Manono Project

- AVZ holds good legal title to the entirety of its interest
- AVZ has performed under the sale and purchase agreement(s) in acquiring its current interest
- AVZ retains rights under the terms of the existing shareholders agreement between the Dathcom shareholders to acquire a further 15% from Cominiere (Note: this is the subject of ongoing ICC Arbitration Proceedings)³

** Describes incomplete transactions*

■ DRC Government

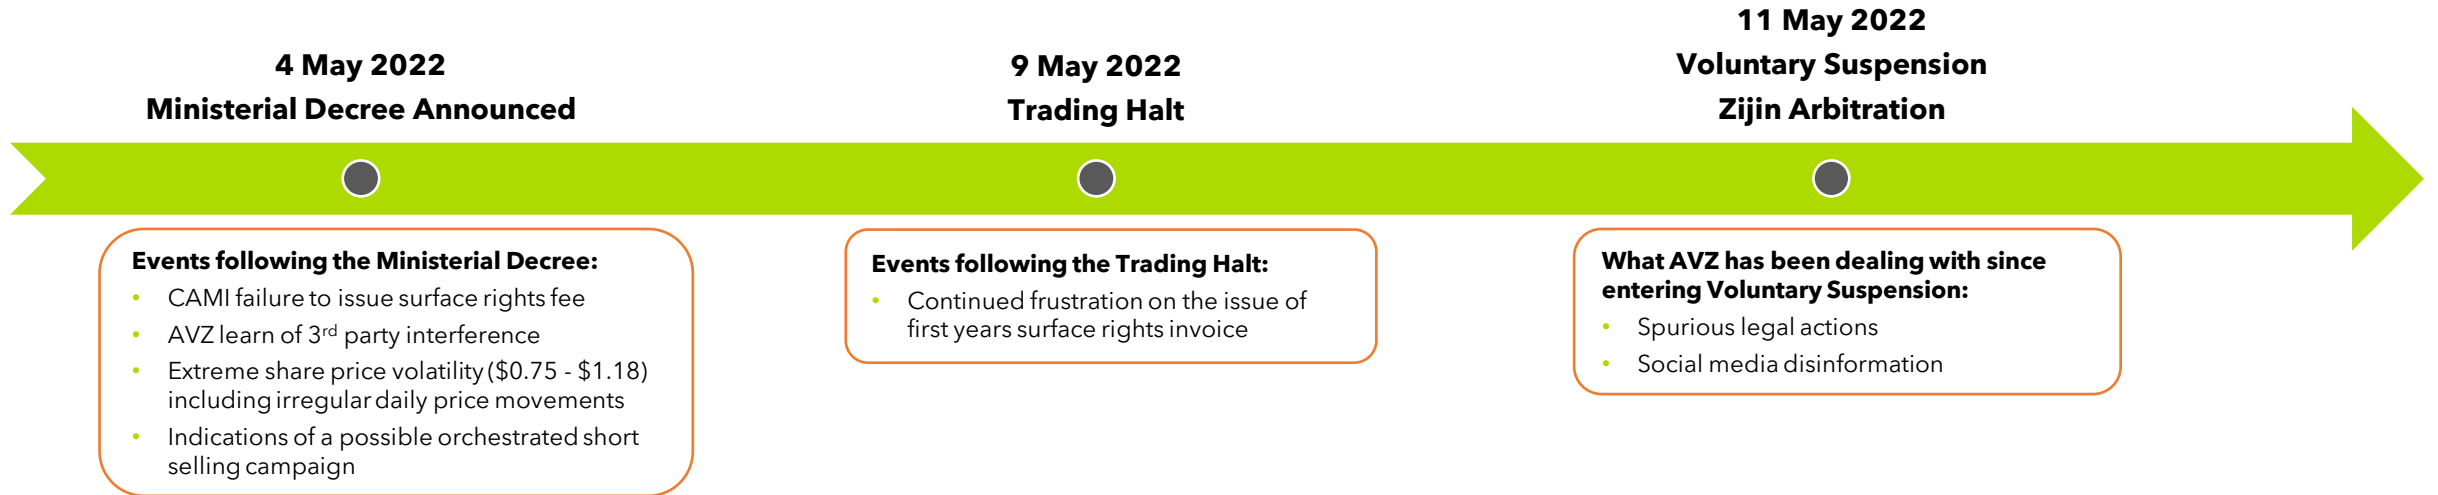

^{1,3} Refer to ASX Announcement 4 May 2022 "Ministerial Decree to Award the Mining Licence Manono Lithium and Tin Project"

² Refer to ASX Announcement 27 September 2021 "Cornerstone investor secured for development of Manono Lithium and Tin Project" and subsequent Company updates

³ Refer to ASX Announcement(s) 11 May 2022, 17 June 2022, 9 September 2022, 20 October 2022

Voluntary Suspension

AVZ has been taking the initiative to preserve long term shareholder value

- Engaged with DRC Government to correct the misinformation, previously assumed to be true, enabling significant progress to award the Mining Licence
- Maintained AVZ's legal interest of 75% and perpetual pre-emptive rights in the project.
- Defending Jin Cheng's ICC Arbitration proceedings.
- Defending Dathomir's request for a revaluation or cancellation of AVZ's valid completion of the Share Purchase Agreement(s) where it acquired a 15% interest in August 2021
- Continued to progress the development of Camp Colline
- Optimising the projects logistics and infrastructure solutions
- Maintained a largely supportive shareholder base including CATH.

AVZ intends to be able to lift the voluntary suspension on grant of the mining licence and update of exploration rights.

OUR SUSTAINABLE DEVELOPMENT GOALS

AVZ is committed to achieving sustainable outcomes in the communities we operate in. This is reflected in our Corporate Social Responsibility Policy and our Sustainable Development Plan.

Social Contribution

Community Wellbeing

Community Development

Sustainable Livelihoods

Environmental Contribution

Energy Use and Resilience

Sustainable Operations

SUSTAINABILITY & GREEN ENERGY CREDENTIALS

Green credentials underpinned by the refurbishment of Mpiana Mwanga comprises the installation of 6 generators for total potential production of ~ 44 MW¹

AVZ has executed an MoU with the DRC Government to secure the rights to Mpiana Mwanga for rehabilitation and generation of power for our operations at Manono.

Additional renewable power options being investigated include:

- Conversion of excess electrical renewable power to hydrogen for Fuel Cell Electric Vehicles (FCEV)
- Solar Power arrays and battery storage
- Steam turbine generation from sulphuric acid plant
- Biofuel generation

AVZ is striving to be as close to a 'zero emissions' operation as possible

Independent assessment² shows Manono Project could have one of the lowest carbon footprints of any global hard rock lithium producer

Inaugural Sustainability Report published in June 2022³

¹ 44 MW is the installed power which equates to approximately 40.3 MW of guaranteed output before transmission line losses of 3-5%

² Refer to the Company's previous ASX Announcement "Manono Project to have one of the lowest carbon footprints" dated 21 January 2021

³ Refer to the Company's previous ASX Announcement "Release of Inaugural Sustainability Report" dated 17 June 2022

PROJECT FINANCE

- Cornerstone investor secured, significantly de-risking the Project
- Balance of project capital to be financed by AVZ through a combination of debt & equity arrangements
- Strong appetite from the market fielded by AVZ ahead of award of the mining licence
- Discussions continuing with Pan African DFI's regarding debt financing

CORNERSTONE INVESTOR¹

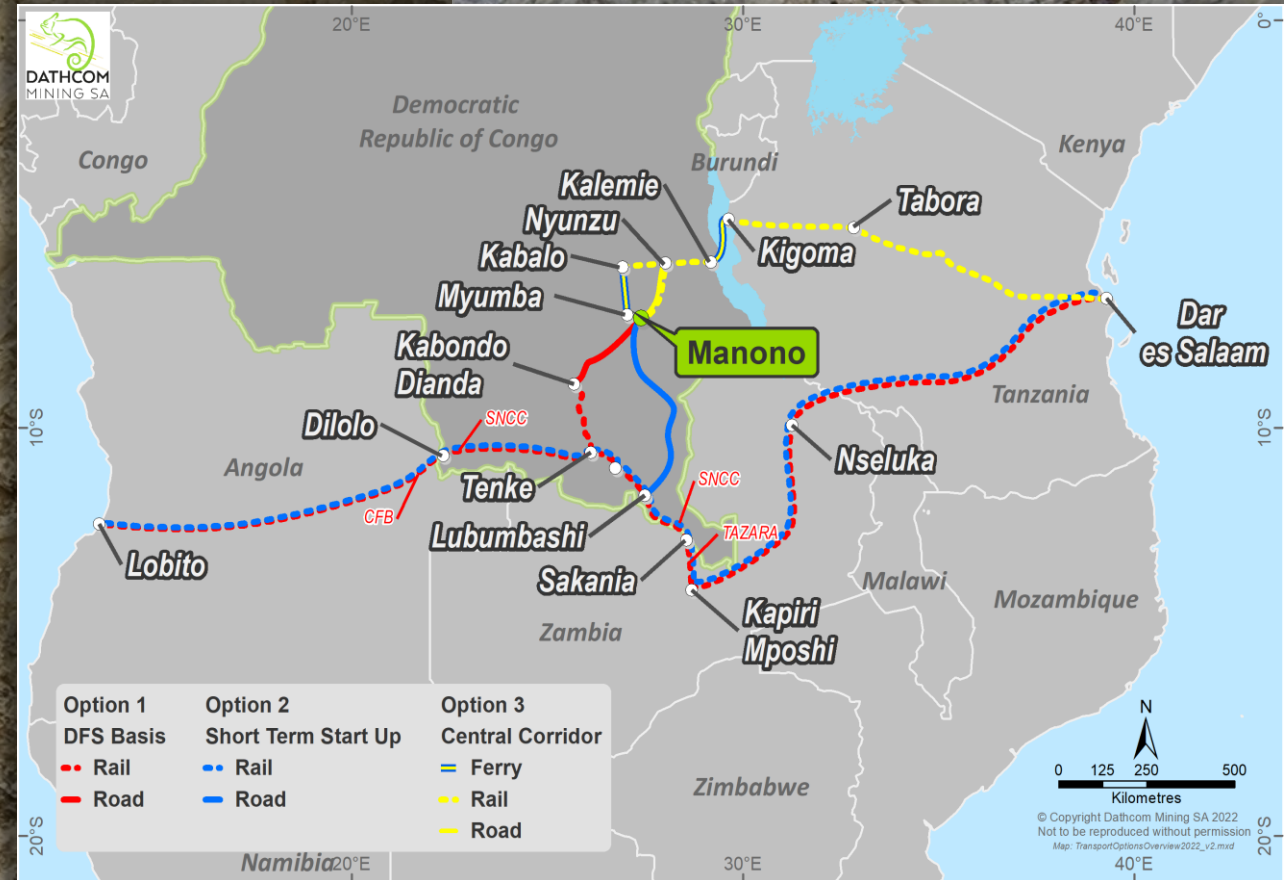

- Majority of the Project to be funded via Transaction Implementation Agreement ("TIA") with Suzhou CATH Energy Technologies ("CATH"), (40% owned by Contemporary Amperex Technology Co. Limited ("CATL"))
- Proceeds from the transaction will fund a majority of the total project financing required, whilst AVZ will retain a controlling 51% interest in the Manono Project
- Key terms of the TIA include:
 - Cash consideration US\$240 million for a 24% equity interest plus CATH contributing their pro rata portion of funding for development capital
 - The transaction in totality will contribute more than US\$400 million, subject to final project development costs being verified²
 - Binding offtake agreement for SC6 for the lower of 50% of SC6 production or up to 800ktpa
 - Binding offtake or tolling agreement for 100% of PLS produced from the first train of the PLS Plant (until such time the parties develop a JV conversion facility)
 - Co-operation of the parties to optimise the scale of the Project and investigate downstream processing opportunities
 - Expected closure on or before 31 December 2022

¹ Refer to ASX Announcements dated 27 September 2021, 16 February 2022 and 30 September 2022

² Basis CATH's purchase of 24% equity interest and CAPEX (DFS April 2020) contributions including CATH's equity share of DRC Government free carried interest

PRODUCT EXPORT ROUTES

- Two main routes were selected for the April 2020 DFS:
 - Manono to Kabondo Dianda ISS by road, then onto SNCC to Tenke and TAZARA railway to Port of Dar es Salaam
 - Manono to Kabondo Dianda railhead by road, then onto SNCC to Tenke and to Angolan Rail (CFB) to Port of Lobito
- Full technical due diligence studies of railways to Lobito and Dar es Salaam have been conducted and both are considered as suitable for the product export.
- With the assistance of the Central Corridor Transit Transport Facilitation Agency, studies have commenced to assess more direct logistics routes that may prove more cost effective, reliable, scalable and reduce the Project's already low carbon footprint.
- Continue to work closely with all transport authorities in DRC, Tanzania, Zambia and Angola.
- Progressing discussions with private logistics providers and equipment suppliers

CENTRAL CORRIDOR LOGISTICS STUDY

Engaged with DRC and Tanzanian Authorities with site inspections of the Lake Tanganyika ports of Kalemie (DRC) and Kigoma (Tanzania) along with existing rail and logistics infrastructure required to support the Lake Tanganyika logistics solution.

Rail service providers, rolling stock manufacturers and consumable suppliers have been engaged as the Company explores procurement and operational support including the possibility to build maintenance facilities insitu to the Project.

Logistics optimisation study underway.

LOW CO₂ EMISSIONS AND WASTE INTERMEDIATE PRODUCT

Primary Lithium Sulphate
High quality feed from mining operations with highest operational and ESG standards

Minimized Carbon Emissions
Target: Lowest possible carbon footprint

Very Low Waste Approach
Non toxic by-product and waste, suitable for use in construction and other industries

High-purity Lithium hydroxide monohydrate
Product will meet the highest standards of cathode producers and their suppliers

Primary Lithium Sulphate

OPTIMISATION

Significant expansion of operations is realistic

Exploration

- Roche Dure resource extension and drilling of the northern sector¹
- Exploration targets identified for both laterite hosted and river channel placer tin deposits²
- Other brown and greenfield exploration opportunities

Mining & Processing

- DMS expansion scenario
- Middlings stream from flotation circuit
- Further downstream expansions (PLS & LiOH)
- Improved by-product recoveries

Other

- Renewable energy expansion
- Logistics optimisation study

¹ Refer to ASX Announcement dated 31 October 2022 "Positive Results from Initial Roche Dure Extension Drilling Program"

² Note: the potential quantity and grade of the exploration target as stated, is conceptual in nature as there has been insufficient exploration to estimate a Mineral Resource and it is uncertain if further exploration will result in the estimation of a Mineral Resource.

EARLY WORKS & CAMP

- Camp Colline construction is progressing well
- Employing 150-200 local artisanal laborers per month under the supervision of AVZ management
- Camp capacity expected to be 120 rooms by December 2022 with a further ~ 130 to be built
- Upgraded Dry Mess and Laundry facilities to support 300+ personnel is being constructed by a local contractor
- Sourcing locally available construction materials, labour and skilled workers
- Installed brick manufacturing facilities including concrete engineered bricks to provide robust construction material
- Lay down areas constructed for heavy equipment and maintenance facilities

EQUIPMENT

Heavy plant and machinery has continued to arrive on site for the construction of Camp Colline, camp road maintenance, earthworks and pad construction to support various project activities.

In preparation for the wet season diesel capacity on site has been increased to ensure operations are not impacted by logistics restraints or road closures due to wash outs.

Wastewater and Potable Water Treatment plants are scheduled for delivery in November and concrete pads have been prepared for their arrival.

TAKE AWAY FACTS

■ **World Class Project**

- Believed to be the largest and highest grade undeveloped hard rock lithium project globally with a resource base to underpin significant growth
- Robust project economics

■ **Project Support**

- Engaged, co-operative and collaborative relationship with DRC Government
- Significant cornerstone investor backing the development of project
- Advanced debt funding discussions
- 100% of lithium products under long term binding offtake agreements

■ **Growth Potential**

- Scalability of the project underpinned by known resource with expansion potential
- Cornerstone investor support, both technical and financial, to expand upstream and downstream conversion potential
- Robust project cashflows & proven management capability to develop brownfield and new greenfield exploration opportunities
