

ELECTRICAL SAFETY CHECK UP

Our one-hour Electrical Safety Check Up gives you peace of mind that your home's electrical system is operating effectively. We start with our 10-point check and conclude with recommendations for upgrades and repairs related to safety, energy savings and/or code compliance.

SAFETY CHECK LIST

To keep your electric running at peak efficiency, we start with our 10-point safety check up.

- 1 Inspect and clean all connections in your main electrical panel
- 2 Inspect and verify proper grounding and bonding of your main electrical service
- 3 Verify operation and installation of whole house surge protector
- 4 Check for proper voltage and amperage of all circuit breakers
- 5 Inspect main service entrance cable
- 6 Inspect exterior service meter
- 7 Inspect power company termination points
- 8 Test all (GFCI) ground fault circuit interrupter outlets for proper operation and review locations, inside and out
- 9 Recommend energy and cost-saving products
- 10 Recommend electrical upgrades for code compliance
