December 4, 2017

On behalf of the undersigned organizations of the Title IV-A Coalition, we urge you to raise the sequester-level discretionary caps and ensure that any increases in the Defense spending caps are matched with equal increases in the Non-Defense Discretionary (NDD) spending caps. Congress recognized the inability to make necessary investments in domestic programs under the current caps, and therefore raised the caps on defense and NDD funding by equal amounts for the last four years.

We call on Congress to eliminate the sequestration caps in order to make critical investments in education programs such as the Student Support and Academic Enrichment (SSAE) Grant Program under Title IV-A of the Every Student Succeeds Act (ESSA), which supports well-rounded programs, safe and healthy schools, and the effective use of technology. If the spending caps are not raised, non-defense discretionary spending will be cut by $3 billion in nominal terms and by $16 billion in inflation-adjusted terms. In addition, the House lowered that tight level by another $5 billion in its omnibus funding bill, leading to harmful cuts to and the severe underfunding of important education programs.

The SSAE grant program, authorized at $1.6 billion for fiscal year 2018 (FY 2018), is the result of Congress’ decision to consolidate more than 20 existing programs, most of which were competitive, into a single formula-funded flexible block grant program that has the potential to benefit millions of students by allowing districts to choose how to spend their dollars to support safe and healthy schools, well-rounded education, and the effective use of technology. The critical education programs meant to be supported by SSAE funds include: 1) safe and healthy students activities, such as providing mental health services to students; 2) increasing student access to STEM, computer science and accelerated learning courses, physical education, the arts, music, foreign languages, and college and career counseling; funds for an effective school library program; and, 3) providing students with access to technology and digital materials and educators with technology professional development opportunities.

We strongly urge Congress to fully fund the SSAE program in FY 2018, as the FY 2017 allocation of only $400 million is wholly inadequate to provide the flexibility at the local level or to run the program as Congress intended. Funding this program at less than 25% of its authorized level in its first year has already presented serious implementation issues, including the need to allow states to allocate funds to districts competitively, contrary to what is authorized in ESSA. The promise of ESSA
to provide states and local districts with flexibility to make meaningful investments in programs including computer science, AP, music and the arts, mental health services, and professional development for technology has been severely hindered due to Congress’ failure to provide adequate funding for this program in its first year.

Congress must do better by our nation’s schools, educators, and most importantly, our students. We strongly urge Congress to repeal the Budget Control Act sequester-level caps and significantly increase funding for the SSAE grant program under Title IV-A of ESSA.

Sincerely,

100Kin10
