AntiAging Research Laboratories

Manufactured in strict compliance with the FDA Code of Federal Regulations (CFR 21: 210-211)

Elevating Biological Performance to It's Highest Levels

When taken simply by itself, Essential Vita Rx delivers maximum nutrition; however Essential Vita Rx exhibits complementary action when used with our AEOH Ingestible Growth Factor, which, when used together can more fully support your youth-promoting efforts, so you'll look and feel better and perform better! Excellent for both men and women, these products help to extend youth and youthful living, which demands much more than merely another super vitamin pill. At AARL, we represent the definitive natural nutrition source for strength and longevity. Considering our depleted food supplies and challenges presented by our lifestyles and living environments, as well as the growing body of scientific research that indicates that multi-nutrient supplementation can optimize health, many who seek to remain healthy and young have wisely taken a daily multiple vitamin. However, unlike Essential Vita Rx, many multi-nutrient products in the marketplace are lacking objective analysis of nutrient potency, tests for purity, completeness of formulas and absorbability of nutrients. These important factors as well as many others, determine the ultimate benefit you derive from a nutritional supplement.

SUGGESTED USAGE: As a dietary supplement, take 2 capsules twice daily with food.

This product is a multiple vitamin and mineral supplement that has been designed to provide support for the maintenance of healthy blood sugar levels already within the normal range. This product has trace minerals, such as Chromium and Vanadium, and the herb *Gymnema sylvestre*, which have been shown to support healthy serum glucose levels already within the normal range. In addition, this product supplies a full complement of B-vitamins, including high amounts of Thiamin and Biotin, which are known for their critical role in carbohydrate metabolism.*

Caution: For adults only. Diabetics and Hypoglycemics should consult with a physician before using. Consult physician if pregnant/nursing, taking medication, or have a medical condition. Keep out of reach of children. Do Not Eat Freshness Packet. Keep in Bottle.
