Implementation and Outcomes Research RFP
Addendum 2
(Posted 06/27/2024)
Questions & Answers

Below are questions (verbatim unless otherwise noted) and answers regarding the RFP. The questions below were received from June 26, 2024 to June 27, 2024. Please check wacarefund.org for future updates.

1. Question: [edited for clarity]: We would like to know if this grant is suitable for our project.

   Answer: CARE Fund encourages all applicants to review the RFP and application review criteria to assess suitability before submitting an application. Applications are assessed by an independent scientific review panel that will review and evaluate the applications.

2. Question: What does CARE want to see regarding the matching funds?

   Answer: Please see the answers to Questions #2 through #7 in the Implementation and Outcomes Research RFP Addendum 1 for more information.

3. Question: If we plan to use a federal grant for matching, would it be acceptable to use it as matching if the CARE award is an expansion of the aims of the federal grant?

   Answer: Please see the answer to Question #2 in the Implementation and Outcomes Research RFP Addendum 1 for more information.

4. Question: What is the matching reporting requirement for this RFA?

   Answer: Please see the answer to Question #7 in the Implementation and Outcomes Research RFP Addendum 1 for more information.

5. Question: Can you please clarify what falls under a non-state matching fund?

   Answer: Please see the answers to Questions #2 through #7 in the Implementation and Outcomes Research RFP Addendum 1 for more information.

6. Question: For each given reimbursement of actual expenditures from grant dollars, is the maximum allowed payment from the grant equal to the expenses incurred with matching funds for that period? For example - if we are requesting a reimbursement for grant expenses of $100,000 on a given month, do we need a 1:1 $100,000 expense from
matching funds for that month? Or can the matching funds be spent at a different rate on a month-to-month basis compared to the grant payments, based on project need and allocation?

Answer: Matching funds may be spent at a variable rate; however, reimbursement for the grant will not be made in advance of the demonstration of the match expenditure for the period invoiced for reimbursement. A condition of the reimbursement is the demonstration of the expenditure of matching funds. Please see the answers to Questions #2 through #7 in the Implementation and Outcomes Research RFP Addendum 1 for more information.

7. Question: Will the committed matching funds need to be transferred to a separate account tied to this grant?

Answer: The matching funds do not need to be transferred to a separate account tied to the grant; however, demonstration of use of the matching funds will be required through expenditure reports or additional supporting documentation as requested by CARE Fund.
