Freedom Schools Lesson Plan- Part 2

Discussion questions for jigsaw groups (1 representative from each group above)

In the new groups, each student will first share with their peers an overview of the answers discussed in their Expert Group. Then, new group members will take their collective knowledge of Freedom Schools to address the following:

1) If you could infuse parts of the Freedom School philosophy into your school today, which aspects of each group (curriculum, origins/purpose, teachers, and students) would you want to include?

2) Use the following questions to guide your discussion: How do people learn? What is the best environment for learning? What is the meaning of education? What is the purpose of school? What should be the role of teachers? What role do students play in schools? Who should decide what is included in the curriculum?

Each group will share their ideas to the class to develop a broader vision for how aspects of the Freedom Schools could be infused in schools today.
