YESS: Yarn Ethically & Sustainably Sourced

Textile Mills Training Module 3
Identify Red Flags

June 2 & 3, 2021
2021 Pilot DRAFT

www.sourcingnetwork.org/yess
This webinar is being recorded
- We will not record the Q&A portion of the webinar
- You will receive an email with instructions on how to access the recording and slides.

Use the Q&A Function to send us your questions, speakers will answer questions at the end
YESS: Yarn Ethically & Sustainably Sourced

Textile Mills Training Module 3
Identify Red Flags

June 2 & 3, 2021
2021 Pilot DRAFT

www.sourcingnetwork.org/yess
1. Review YESS Standard terminology and concepts
2. Identify high-risk origins
3. Supplier due diligence
4. Classify cotton inputs
5. Identify supply chain red flags: suppliers and cotton inputs
6. Examples: red flag decision tree
7. YESS resources
YESS
Standard and Terminology Review
Due diligence: Acting with reasonable care and investigating an issue before making a decision

Risk-based approach: Applying different levels of due diligence proportionate to the risk faced by the company

Red flag: A concern, discrepancy, or other suspicious activities in a mill’s supply chain that warrants further investigation

Risk: Actual or potential exposure to harm of individuals or groups (i.e., forced labor)

Mitigation: The act of minimizing or eliminating risk
Due Diligence as a Pyramid

Know Your Supplier and Cotton Origin

Identify Red Flags

Identify Risk

Mitigate Harm

All Supply Chains

High-Risk Supply Chains
(Training Module 4)
Supply Chain Red Flags

Red flag associated with the material
- Risk category of origin
- Plausibility of origin
- Transit risks

Red flags associated with the supplier
- Legal and legitimate operations
- Located in or sourcing from high-risk areas

Supply Chain Red Flags
The Cotton “Supply Web”
Identify High-Risk Origins
Mills Must Have a Process to Identify High-Risk Origins

The process to identify high-risk origins must cover:

- Types of resources used to identify high-risk origins (e.g., countries)
- Criteria and threshold used by the textile mill to make a determination of high risk
- Frequency within which the determination is reviewed and updated
Step 1: Identify high-risk countries of origin for lint production

Compliance Officer will identify and evaluate all countries of cotton lint production in its supply chain against Responsible Sourcing Network’s (RSN’s) most current version of the Methodology for Determination of High-Risk Countries for the YESS Standard. Any country identified by RSN as high risk for forced labor in cotton production shall be considered high-risk for cotton lint origin.

Frequency

This procedure will be completed annually.
High-risk countries have significant evidence of forced labor in their cotton production:

- Benin
- Burkina Faso
- China
- India
- Kazakhstan
- Pakistan
- Tajikistan
- Turkmenistan
- Uzbekistan

It is the mill’s responsibility to identify high-risk origins. YESS’s indicative and non-exhaustive list should be considered.
Step 2: Identify high-risk countries of origin for yarn production

Compliance Officer will identify and evaluate the country in which a yarn spinning mill is located against: 1) a list of high-risk countries of origin for lint production* and 2) the most current version of UN Comtrade Database. A country is considered a high-risk origin for yarn if located in or is one of the top ten importers of cotton lint from a high-risk country for lint production according to the most current version of UN Comtrade Database.

*Refer to Step 1: Identify high-risk countries of origin for lint production.
UN Comtrade Database: Step One

https://comtrade.un.org/data/

Step 1: Select “Get Data”
Step 2: Select Data Parameters

3. Select desired data

- Periods (year): × 2019
  - All, or a valid period. Up to 5 may be selected.

- Reporters: × Benin
  - All, or a valid reporter. Up to 5 may be selected.

- Partners: × All
  - All, or a valid reporter. Up to 5 may be selected.

- Trade flows: × Export
  - All, or select multiple trade flows.

HS (as reported) commodity codes

- 5201 - Cotton; not carded or combed
  - All, Total, AG[X] or a valid code. Up to 20 may be selected. If you know the code number, e.g., 01 - Live animals, type 01. To search by description type a word, e.g., rice.

Unprocessed Cotton Lint → Unprocessed Yarn

Recycled Content Origin
Identify Red Flags
Supplier Due Diligence

Know Your Supplier

- Communicate cotton sourcing policy
- Require transaction and chain of custody documentation
- Understand each supplier’s sourcing models
- Understand each supplier’s internal control systems
Cotton Risks

- Review for discrepancies
- Determine cotton inputs origin plausibility
- Assess risks in cotton inputs
Cotton Origin Verification: “Gates, Weights and Dates”

Description, dates, quantity, shipper, ports

Description, dates, quantity, supplier, ports or addresses, buyer

Recycler
## Low-Risk Cotton Inputs: Definition, Origin Evidence, and Chain of Custody Requirements

<table>
<thead>
<tr>
<th>Sourcing risk level</th>
<th>Identification definition</th>
<th>Origin and chain of custody requirements</th>
</tr>
</thead>
</table>
| Low risk           | All the following criteria apply:  
  – Supplier is in conformant with the applicable YESS Standard at the time the cotton yarn nor textile was purchased and received by the textile mill being assessed (yarn or textile);  
  OR  
  – There is **sufficient evidence** that the supplier has sufficient internal material control systems and **all** cotton contents within the subject bale (lint or fiber), yarn or textile are from low-risk sources;  
  AND  
  – There are **no supply chain red flags** (e.g., discrepancies, inconsistencies, or other issues identified during the KYS process or review of cotton inputs and documentation) |  
  – Evidence of YESS conformant supplier origin (yarn or textile)  
  AND  
  – Yarn chain of custody from YESS conformant supplier to receiving textile mill  
  OR  
  – Evidence of low-risk source(s) for all cotton inputs (e.g., low-risk countries for unprocessed (first lifecycle) lint or yarn, Textile Exchange’s Recycled Claim Standard (or equivalent) for recycled cotton fiber, yarn or textile);  
  AND  
  – Evidence that supplier has sufficient internal material control systems;  
  AND  
  – Chain of custody from low-risk source(s) to receiving textile mill |
## High-Risk Cotton Inputs: Definition, Origin Evidence, and Chain of Custody Requirements

<table>
<thead>
<tr>
<th>Sourcing risk level</th>
<th>Identification definition</th>
<th>Origin and chain of custody requirements</th>
</tr>
</thead>
</table>
| High risk           | Any (one or more) of the following criteria apply:  
  - Supplier is not in conformance with the applicable YESS Standard at the time that the cotton yarn was purchased and received by textile mill being assessed (yarn or textile); OR  
  - Supply chains include high-risk countries for cotton lint or yarn production; OR  
  - Source or origin of any cotton input is undisclosed; OR  
  - Any cotton lint or fiber (including cotton contained within the cotton yarn or textile) is claimed to have originated from a multi-country region that contains at least one high-risk country, such as Commonwealth of Independent States (CIS); OR  
  - There is insufficient evidence that all recycled cotton fiber was produced from deconstructed material; OR  
  - There is insufficient evidence that the supplier has adequate internal material control systems; OR  
  - There are supply chain red flags (e.g., discrepancies, inconsistencies or other issues identified during the KYS process or review of cotton inputs and documentation). | – Evidence of supplier’s country origin; AND  
  – Evidence of system of controls through supplier’s processes; AND  
  – Evidence of low-risk source for all cotton inputs in the cotton bale (lint or fiber), yarn or textile; AND  
  – Chain of custody from low-risk source(s) to receiving textile mill for all cotton inputs (including different sources of cotton lint within yarn or textiles). |
Substituted Better Cotton May Be High-Risk Cotton

Substituted BCI from high-risk origins is high-risk cotton!
