Justice. Community. Inclusion.

## NEW IVS Ballot Marking Device Survey

Disability Rights Connecticut (DRCT) is interested in your opinions about the new IVS Ballot Marking System which is a tablet based system that includes both a touch screen component and an audio component. This is the second time that the machines have been used and we would like to have as many people as possible try the device and provide feedback.

We invite and encourage voters to use the tablet-based system and report back their experiences (good and bad) to Disability Rights Connecticut using the following evaluation questions. Your reports will enable us to ensure better training for poll workers and future refinements to the technology that will enhance its use. If you have questions about the survey, please call **Gretchen Knauff at (860) 990-2441.**

\*\*\*\*\*

**Were the poll workers who checked you in familiar with the existence of the technology and did they welcome your use of it?      Yes / No**

**Comments:**

**Was the system located in an area free of heavy traffic and distractions?  
Yes / No      **Comments:****

**Was the poll worker who assisted you in using the system knowledgeable about the machine?      Yes / No**

**Comments:**

Were you informed about the two components (touch screen and audio) that comprise the new technology? Yes / No

Comments:

Was the machine ready for operation? Yes / No

Comments:

Did you use the touch screen or the audio component? Touch screen / Audio

Comments:
