SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

In 1935 this gymnasium and an adjacent building, which are part of the present Junior High School, was constructed by Monson Brothers Construction Co.

The Healdsburg Junior High School building is built on the site of the Seventh-day Adventist College Dormitory (1882-1908). In 1918 the Healdsburg High School was built on the site. It was built by a well-known architect, William H. Weeks. The school was two stories, built of reinforced concrete, with a tile roof, and Spanish touches. The school received international attention because of use of concrete and its beauty.

In the 1950's, the original school building was demolished because it didn't meet current earthquake standards.
