DESCRIPTION
7a. Architectural style: False Front Commercial
7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

The gable roof of this one-story structure is hidden by a stepped false front. A gable roof extends from the front to cover the entrance and a pair of gas pumps. Supporting this roof are two chamfered columns. In the rear is a shed roofed addition. The main structure has exposed rafter tails while those of the front gable are covered by a fascia board. High up in the false front is a small vent. Windows are of plate glass or sliding aluminum. Though the front is now covered by sheets of plywood, it probably one had the same rustic siding as the rest of the structure.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Being at the crossroads to Valley ranches, the Pine Flat Quicksilver mines routes and the national tourist attraction - the Geysers, the location of this store at Jimtown was destined to meet with success. James Patrick, capitalizing on traffic to these areas, built the Jimtown store in January of 1893. The name "Jimtown" derived from Patrick's first name. The Post Office was moved here in 1895, with Patrick as postmaster. Ninety years after its opening, the store still serves to traveler's needs. James, born in 1834 in Indiana and Hattie; born in 1857 in California, raised a family of five children.

Despite a recent plywood overlay, this structure typifies rural storefront design.
