Code Compliance Committee Priorities for 2018-2019

Prepared by: CEA Code Compliance Committee
What is the California Energy Alliance?

Alliance of organizations and individuals committed to smart, sustainable energy use within California’s built environment.
Our Mission

The California Energy Alliance (CEA) unites representatives of a broad range of organizations concerned about energy and the built environment. As a member-based organization, CEA works to improve California’s energy future and the migration toward a Zero Net Energy horizon. CEA focuses on the promotion and realization of deep energy savings, sustainable energy generation, and integration. The Alliance actively participates in the development and implementation of pragmatic, environmentally and economically sound building energy standards and other initiatives.
What We Do

• Unite and foster collaboration across diverse disciplines to improve our energy landscape.
• Focus on pragmatic, environmentally and economically sound energy initiatives.

• Energy Policy
• Energy Education
• Energy Standards
ITEM #1

Though audits do occur, legal and financial responsibility for compliance is unclear and remains practically unenforced on the ground. The compliance path, as identified in the statute, is compromised.

Stakeholders in play:

- Owner
- Engineer of Record
- CX Agent
- Contractor
- System designer
- Rep Agency
- Distributor
- AHJ
- Training Provider
- Engineering/Energy Consultant
- Acceptance Testing Provider
- Acceptance Testing Technician
ITEM #2
There are areas of alignment amongst these stakeholders, but core interests conflict.

Therefore, CEA’s Code Compliance Committee needs to . . .

a. Identify common goals
b. Develop strategy
c. Develop tactics
ITEM #3
There is very little cumulative data or analysis documenting the actual compliance and enforcement landscape.

a. For available data:
   1. What is it and how is it sourced?
   2. Geographic County and City heatmaps?

b. What additional data is needed?
   1. Opportunity to develop unique CEA work-product.
ITEM #4
Education and Outreach groups believe that they are doing a great deal to enable compliance through development of robust tools and programs that educate and enable the majority of stakeholders.

• Who are the educational and outreach bodies?
• Are they being effective?
• What can CEA do to assist them in doing it better?
• What can CEA do differently to improve compliance?
• What are our resources?
