Larry Speck, FAIA is a Senior Principal with Page and a Moody Centennial Professor in Architecture at the University of Texas at Austin. In addition to working on significant projects such as the Austin Convention Center, Discovery Green Park Houston, and the Austin-Bergstrom International Airport, Larry has made his influence known as an author, architectural critic, and educator.

Mark Bloschock, PE, is a Principal of infrastructure at Walter P Moore, a position he took after 30+ years working for the Texas Department of Transportation, Bridge Division. Throughout his career, he has served and lead on technical committees including AASHTO/ARTBA/AGC Task Force 13 on Standardization of Highway Safety Hardware, American Traffic Safety Federation, International Road Federation, and the National Cooperative Highway Research Program.

Dennis Paul, PE, presently serving his third term in the Texas House of Representatives, is the only practicing engineer in the Texas legislature. He has run Paul Engineering since 2002. Prior to being elected to serve Harris County residents, he also served on the Structural Engineers Association of Texas State Board of Directors (2004-2014), chairing its Legislative Affairs Committee.

John Holt, PE, FSEI, is the Austin Office Manager for Modjeski and Masters. His 33 year career has given him the privilege of working at the Texas Department of Transporation, Bridge Division, serving on AASHTO, TRB and NSBA committees, starting Austin’s SEI chapter, and working with the best and brightest in the bridge engineering, construction and structural research communities.
