FLY SMARTER

Sit back, relax and enjoy your business class flight with over 50% savings

Your credit card loyalty and frequent flyer points could save you thousands of dollars per flight but maximising them on your own time can be a real hassle – it takes a lot of time, effort and knowledge to squeeze every drop of value out of your points on your own. Credit card companies and airlines have made it so complex you'll just swap them out for low value vouchers or paltry savings on economy class flights – or worse, let them expire.

You've earned these points so **why continue to pay full price** to travel?

Our **Points Flight Concierge** service takes the pain out of using points to book business class seats. We've booked over 3000 flights via our innovative flat-fee concierge service and regularly save our clients at least \$3,000+ per trip.

HOW IT WORKS:

We collate your points from across your cards and loyalty programs, and calculate the various flight combinations to save you money and get you the best travel experience. Doing this on your own requires a deep understanding on how the frequent flyer programs work and with flights and seating options changing daily the best deals are often snapped up leaving you frustrated. iFLYflat have an expert points team who love deciphering the hidden value in the fine-print to understand how to make more of your points than anyone else. This is why you see iFLYflat regularly featured on TV, newspapers and magazines.
