Chapter - Pinelands

The pinelands area of New Jersey consists of approximately one million acres of environmentally and ecologically sensitive land stretching across Ocean, Burlington, Atlantic, Cape May and Cumberland counties. Within this area are pine forests, swamps and other unique natural features, including an aquifer that contains billions of gallons of pristine groundwater.

In 1978, the federal government moved to protect the Pinelands area through the adoption of section 502 of the National Parks and Recreation Act. Section 502 provided for the establishment of a planning entity to control all types of development within the Pinelands National Reserve, and appropriated funds for the acquisition of land within the Reserve. In 1979, the New Jersey Legislature adopted the “Pinelands Protection Act” to implement the provisions of the federal law. The Act established the Pinelands Commission, which is responsible for the regulation of development in the defined pinelands area. See Application of John Madin/Lordland Development, 201 N.J. Super. 105 (App. Div. 1985). Since its establishment, the Commission has mapped the pinelands area, adopted a comprehensive management plan, and enacted guidelines for state, county and municipal governments to follow in conforming to the plan.

The comprehensive management plan adopted by the Pinelands Commission provides for the issuance by the Commission of “development credits,” or transferable development rights, to landowners willing to restrict future use of their property through the imposition of conservation easements. These credits may in turn be sold to landowners and developers who wish to make more intensive use of other property for development. See Matlack v. Burlington County Freeholder Board, 191 N.J. Super. 239, 242-44 (Law Div. 1983), aff’d, 194 N.J. Super 359 (App. Div.), certif. denied, 99 N.J. 191 (1984). In 1985, the legislature adopted the Pinelands Development Credit Bank Act. This legislation established a system for financing the transfer of pinelands development credits, and the extension of guarantees of the value of the credits. L.1985, c.310. The legislative time limitation on the guarantees has been extended several times, most recently in 1994. See L.1994, c.141, sec. 1 (C.13:18A-48)(extending the guarantee period to December 31, 1997).

This chapter includes the Pinelands Protection Act, as amended, and the Pinelands Development Credit Bank Act, revised as separate subchapters within this chapter.

Subchapter: Pinelands Protection

PP-1. Legislative findings and declarations

The Legislature hereby finds and declares that the pinelands area comprises pine - oak forests, cedar swamps, and extensive surface and ground water resources of high quality which provide a unique habitat for a wide diversity of rare, threatened and endangered plant and animal species and contains many other significant and unique natural, ecological, agricultural, scenic, cultural and recreational resources; that the continued viability of such area and resources is threatened by pressures for residential, commercial and industrial development; that the protection of such area and resources is in the interests of the people of this State and of the Nation; that such protection will require the coordinated efforts of all relevant municipal, county, State and Federal agencies; that the Congress and President of the United States have demonstrated a recognition of these facts through the enactment of section 502 of the “National Parks and Recreation Act of 1978” (PL 95-625); and, that it is now necessary to implement the afore -cited Federal Act and insure the realization of pinelands protection through the establishment of a regional planning and management commission empowered to prepare and oversee the implementation of a comprehensive management plan for the pinelands area.

The Legislature further finds and declares that a certain portion of the pinelands area is especially vulnerable to the environmental degradation of surface and ground waters which would be occasioned by the improper development or use thereof; that the degradation of such waters would result in a severe adverse
impact upon the entire pinelands area; that it is necessary to designate this portion as a preservation area, wherein more stringent restrictions on the development and use of land should be utilized and public acquisition of land or interests therein should be concentrated; and, that in order to facilitate such acquisition, and otherwise to effectuate the provisions of this [subchapter] and the Federal Act, it is further necessary to establish certain notice requirements and procedures for the purchase of land or interests therein in such area.

The Legislature further finds and declares that the current pace of random and uncoordinated development and construction in the pinelands area poses an immediate threat to the resources thereof, especially to the survival of rare, threatened and endangered plant and animal species and the habitat thereof, and to the maintenance of the existing high quality of surface and ground waters; that such development and construction increase the risk and extent of destruction of life and property which could be caused by the natural cycle of forest fires in this unique area; and, that, in order to effectuate the purposes and provisions of this [subchapter] and the Federal Act, it is necessary to impose certain interim limitations upon the local approval of applications for development in the preservation area, and upon certain State and local approvals in the pinelands area, all as hereinafter provided.

Subchapter: Pinelands Development Credit Bank

PB-1. Findings, declarations

The Legislature finds and declares that, pursuant to the provisions of P.L. 1979, c. 111, the comprehensive management plan for the pinelands area has been adopted and is now being implemented; that this plan includes a program for the allocation and transfer of pinelands development credits; and that the intent of the pinelands development credit program is to provide a mechanism to facilitate both the preservation of the resources of this area and the accommodation of regional growth influences in an orderly fashion.

The Legislature further finds and declares that the concept of transferable development credits is innovative and, as yet, unprecedented on a regional scale; that in order to realize the full measure of the benefits of such a program, steps must be taken to assure the marketability of these credits; and that the best means of providing this assurance is through the establishment of a Pinelands Development Credit Bank empowered to purchase and sell pinelands development credits and to guarantee loans secured thereby, all as hereinafter provided.
