**CHANGE MANAGEMENT**

When it comes to change, we know one size doesn’t fit all. That’s why we offer four distinct change management strategies of increasing investment. Whether you need a traditional methodology to shepherd an initiative through to adoption, want to grow your change capabilities, or need us to stand up a full-service OCM team inside your walls, we’ve got you covered.

**All Facets Of Change**

When it comes to change, we know one size doesn’t fit all. That’s why we offer four distinct change management strategies of increasing investment. Whether you need a traditional methodology to shepherd an initiative through to adoption, want to grow your change capabilities, or need us to stand up a full-service OCM team inside your walls, we’ve got you covered.

---

**OCM TOOLKIT**

We start your change journey with a readiness assessment, surfacing the factors that will influence your project’s outcome and measure your ability to react. From project sponsors to the history of change in your organization, we’ll explore what’s worked, what hasn’t and why.

**CHANGE CAPABLE**

Success in today’s economy comes from your ability to quickly adapt to the demands and pace of change and your team’s ability to stay ahead of the curve. Change 4 Growth’s Change Capable certification program puts processes in place to ensure your team is ready to ride these waves instead of being overwhelmed by the current.

**CHANGE OUTSOURCING**

Sometimes large initiatives require additional arms and legs to support your change initiative. Our change management consultants are adept at coming alongside your team and providing the support you need to see your vision through to success.

**CQ CERTIFIED**

We’ve gone through the rigorous certification process so you don’t have to. We can leverage the tools and principles we’ve learned to coach and train your teams to be more self aware, adapt to other leader styles, and practice their leadership with more fluidity.
