

# DIESEL CETANE BOOST

---

## Primary Use

Diesel Cetane Boost added to the fuel system allows for maximum performance. Recommended for use in ULSD fuels. Recommended for use with biodiesel.

## Key Features

- Proper use of Diesel Cetane Boost will improve diesel fuel quality to improve power, performance and cold starting.
- It increases the Cetane number of diesel fuel depending on the treat rate used and existing fuel quality. Example: 1 litre of diesel cetane boost added to 500 litres of a lower cetane number diesel can provide up to 5-7 cetane number improvement.
- This product helps to reduce exhaust emissions and to improve fuel efficiency.

## Directions for Use

- Pour contents of bottle into diesel fuel tank.
- 946mL treats 200 litres of diesel fuel. (200:1).

## FAQ

1. Will this product lower the pour point of diesel fuel?

No, it will increase the cetane number of the fuel.

2. Will it provide any other characteristics like anti-gel, lubricity and detergency?

No, it is strictly a cetane boost.

3. Will the use diesel cetane boost reduce emissions?

Yes, this product helps to reduce exhaust emissions and to improve fuel efficiency.

## Why Shrader?

- Canadian-owned and operated, Shrader is a complete service company with 60 years of success.
- A complete one-stop operation. All design, formulation, manufacturing, and supply chain services are managed in-house.
- Supported with technical expertise in R&D, Manufacturing, Logistics, Sales and Marketing Services.
- Flexibility and choice in scope and range of services to meet the requirements of our customers.
- Certified and audited to World Class Standards, with an exceptional record of regulatory compliance and high quality products and service.
- Provide OEM approved and custom formulation and manufacturing.
- In-house capabilities and expertise for full range of R&D, Physical and Chemical, Functional and Quality

Testing requirements – including Practical End Use Testing Protocols. Partner with clients to design and conduct End Use efficacy testing procedures.
