

Elementary Newsletter - December 2017

Happy Holidays

We will not do a full newsletter since December is such a busy month, full of cheer and activities! We have been busy preparing for the holiday season, Kid's Cafe, our winter program, going to a play, and lots of work has been done in the classroom! We have wrapped up our Wisconsin presentations, had numerous Lower Elementary presentations focusing on botany, and zoology. We have been studying how to brainstorm ideas and voice in Writer's Workshop. Math has been full of square roots, measurement and graphing in Upper Elementary. Lower Elementary has been exploring bead frame, snake game addition, and fractions. Language studies have been focusing on adverbs, prepositions, verb and pronoun relationships in Upper Elementary. In Lower Elementary, we have been forming sentences and identifying parts of speech, vowel and constant relationships, and homophones. These are just a few of our items from class, please ask your student for more information.
