

How to Make an American Girl Doll Chair

Difficulty Rating: Moderate

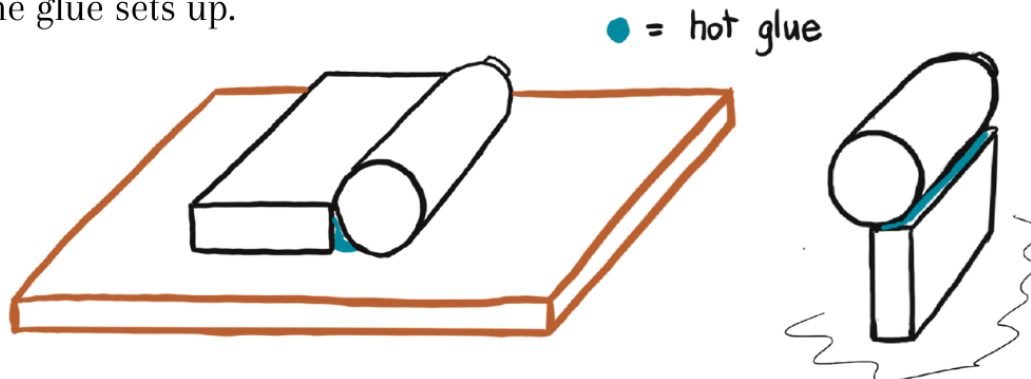

Materials

- 1 large box (cereal)
- 2 medium boxes - same size (lunch kit, granola, or cake box)
- 2 small boxes - same size (mac-n-cheese)
- 2 drink bottles
- shredded paper (get from an office or school)
- 1 yard of fabric
- low temp hot glue gun
- 10-20 sticks of glue
- scissors
- batting (the stuffing in a blanket)

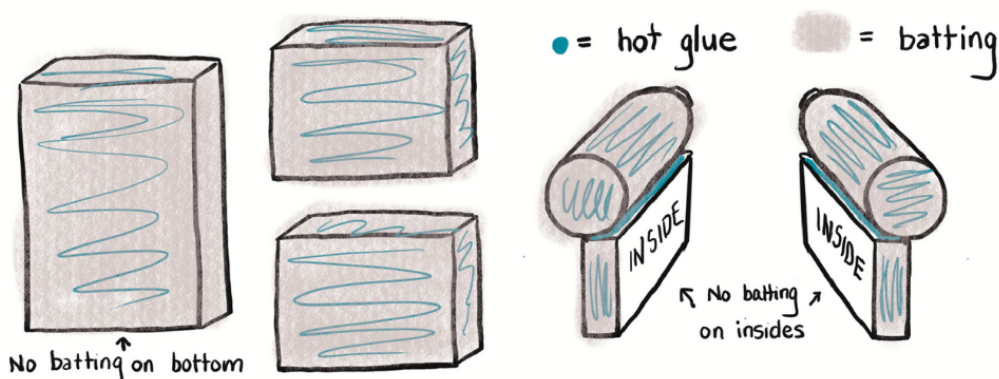

Directions

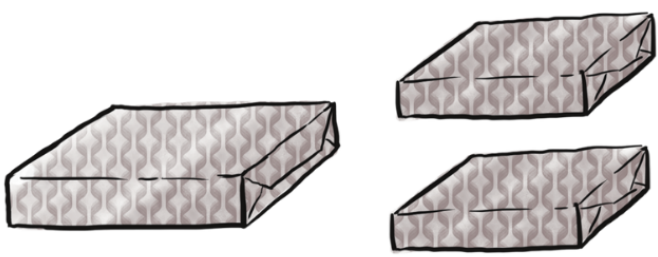

1. Densly pack **all five boxes** with **shredded paper** and tape or glue shut.
2. Glue each **bottle** to a **small box**. **TIP:** It helps to set it on a table like pictured while the glue sets up.

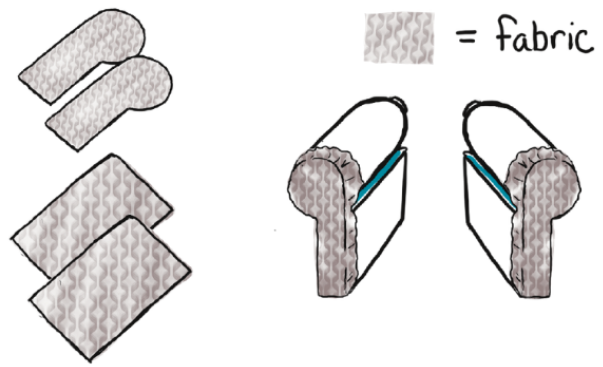

3. Cover all pieces in a layer of batting using the hot glue gun.

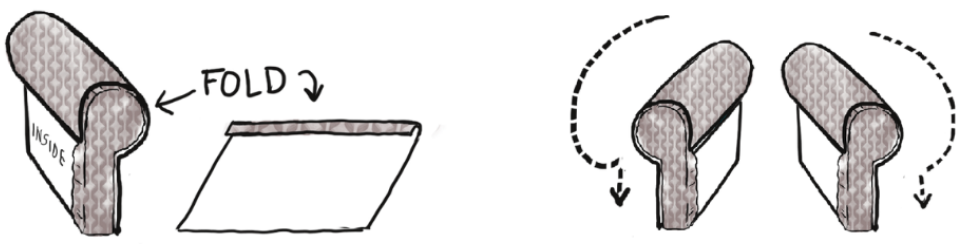

- LARGE and MEDIUM BOXES** - Cut a rectangle of fabric for the 3 boxes like you are going to wrap each like a gift.
- Wrap the boxes just like you would a gift. Use the glue to "tape" everything closed.

- ARMS OF CHAIR** - Cut 2 solid "P" shapes. Cut a rectangle of fabric to go around the outside of the arm.
- Glue the "P" shapes on the front of the arm.

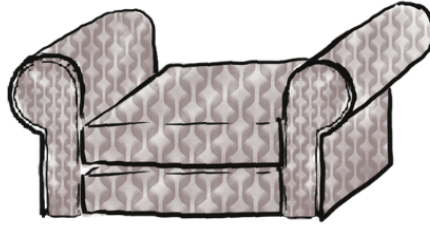

- Before you wrap the arm, fold the raw (uncut) edge over. Glue around the outside of the arm.

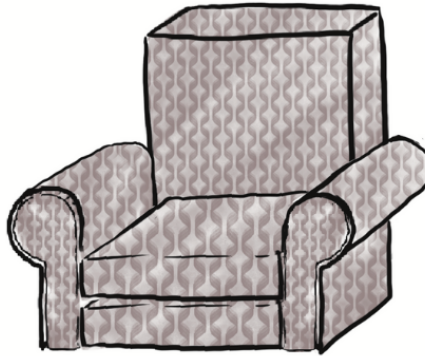

- Wrap the back of the arm like a gift and glue in place. There is really no wrong way to do it!
- Stack and glue the **two medium boxes** together to make the **SEAT**.

10. Glue the **ARMS** to the **SEAT**. Use lots of glue and squeeze together tight until the glue sets up.

5. Glue on the **BACK** of the chair (**the large box**)

Helpful TIP: As you glue all the pieces together, it might be helpful to use **a belt** or **a rope** to squeeze all the pieces together so the glue can set up.
