SPEAKERS

Simon Finfer

Professor of Critical Care at the George Institute. Chair of the International Sepsis Forum. Member of Global Sepsis Alliance and World Sepsis Day Steering Committee.

Derek Angus

Professor and Chair Department of Critical Care Medicine, University of Pittsburgh. Led the ProCESS trial and leading GenIMS study (genetic & inflammatory markers of sepsis).

Mervyn Singer

Professor of ICU at University College London. Authored multiple wide-ranging publications including ProMISe. Co-chaired task force that published 'Sepsis-3' definitions.

Kathryn Maitland

Professor of Paediatric Tropical Infectious Diseases at Imperial College London. Leads a research group in East Africa that conducted the FEAST trial.

Tom Van Der Poll

Professor of Medicine, University of Amsterdam. Past-Chair of ISF. His research focuses on the innate immune and procoagulant response during sepsis.

Vida Hamilton

Consultant in ICU, Ireland. National Clinical Lead for Sepsis in Ireland. Sits on the National Sepsis Steering Committee and co-author of National Guidelines on Sepsis Management.

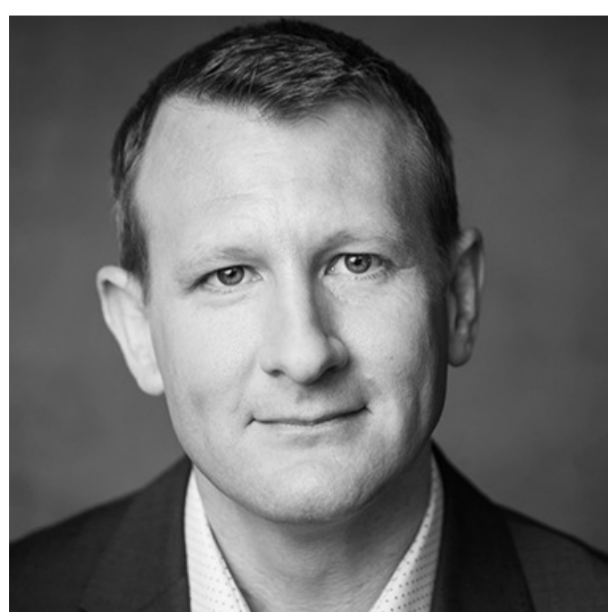

Thierry Calandra

Professor of Medicine and Head of Infectious Diseases Service, Lausanne, Switzerland. Research interests include innate immunity, sepsis, bacterial and fungal infection.

Kathy Rowan

Honorary Professor in the Dept of Public Health and Policy, London School of Hygiene and Tropical Medicine. Founder and Director of ICNARC. Member of ISF.

Ron Daniels

Consultant in ICU, Birmingham. Chief Executive of the UK Sepsis Trust and Global Sepsis Alliance. Founder of 'Survive Sepsis' initiative and developed the 'Sepsis 6 bundle'.

Derrick Crook

Professor of Microbiology at Oxford University. Director of the UK National Infection Service. Research focus: understanding microbial transmission & identifying outbreaks.

John Marshall

Professor of Surgery, Trauma Surgeon and Intensivist, Toronto. Past Chair of ISF. Academic interests include sepsis, trauma & the innate immune response.

Anthony Gordon

Professor of ICU at Imperial College London. Led the VANISH and LeoPARDS trials. Investigates the use of metabonomic analysis to develop novel sepsis diagnostics.

Early-Bird tickets available until March 31st 2018

TICKETS:

Consultant £215 (eb £165) / SAS £185 (eb £135) / Trainee £150 (eb £115)
Nurse/Paramedic £85 (eb £60) / Student £40 (eb £25)
