

How to Measure and Order Pullouts and Options

1. Measure CLEAR Depth

Easy Pullout Shelf Specifications

2. Measure CLEAR Width

3. Fill in the Order Sheet...Start with the Pullouts [PO]:

- Label the location of the cabinet opening [ie. L-Snk-M : left of sink, middle shelf]. This will shorten your installation time.
- Enter the CLEAR cabinet W and D for the opening....Check for depth obstructions at the back of cabinet with flashlight.
- Enter any Additional Products and Services:
 - PO to go onto an Adjustable Shelf?....Will need to secure the adj. shelf so it does not tip up....note this/order Adj. Shelf Kit.
 - Need a New Shelf [NS]?..Measure INSIDE of the Cabinet: W [side wall to side wall] x D [front edge to back wall]...Order NS.
 - Is there a "Lip"?...If less than 1/2"h, the PO will pass over. If it is higher, note to be prepared to add shims at installation.
 - 6" Mini Shelf [6MS]?...Note which location and order PO w 6MS optionwe will make the 6MS to fit inside that PO.
