

INTRO TO SAGE CORPS

Experience is the new classroom. Welcome to Sage Corps.

Sage Corps is a global entrepreneurship program that sends top college students to study abroad and intern with tech startups. During a semester, students may direct enroll at our partner foreign universities and intern part-time with local startups. Alternatively, students may intern full time during the semester or during the summer. Past Fellows have made incredible contributions to their startups, whether it was developing a web/mobile product or a marketing strategy.

In addition to the academic and work experience, Fellows also attend investor conferences, networking events, and guest speakers from larger companies.

After Sage Corps, our alums go on to work at Fortune 500 corporations, consulting firms, investment banks, tech companies, and of course, startups!
