

3rd Annual Production Sale March 13th, 2021

1 PM At Headwaters Livestock Auction Yards | Three Forks, MT

Offering **50 Registered Angus Bulls**

Friends Et Fellow Beef Producers,

The Van Dyken Family would like to invite all of you to our third annual production sale. We thank you for your support at our previous two sales and look forward to seeing you all on March 13 at Headwaters Livestock in Three Forks, MT. At Thousand Hills, we truly value each friendship and acquaintance we have made over the years. The camaraderie of beef producers makes it far and away the best business to be in.

I'm sure that most of you would agree that 2020 is a year we are glad to see in the rear view mirror. Between our family dealing with health issues yet again, lower beef prices, drought, and the election, it's nice to have that one behind us.

April and May were cool and dry, but about the time we started cutting hay in June, the Good Lord sent us a couple of nice rains. And it's a good thing He did, because there wasn't much after that. The June rain made for lots of grass, but by August it was dried up. Then September came in with frost and bit our corn. Through it all our cows hung tough and came home with an awesome set of calves.

The breeding program at Thousand Hills is focused on "Maternally Driven Genetics". The bulls we select to use on our cows are chosen for their ability to sire outstanding females, while still having the performance and power needed for today's market. We believe that cows were created to convert grass into good tasting protein. If that cow isn't pregnant, she's not doing what she was created to do, therefore, fertility is at the top of our requirements for our cows. We AI for 21 days and then turn out the bulls. Our goal is a 42 day calving season. Our calves are raised on their mother's milk and grass on mountain pastures. You won't find a creep feeder on our place. We don't tolerate bad dispositions, bad feet, or bad udders. The environment we run in is our best selection tool and the cream always rises to the top.

The bulls were weaned Sept 23 and turned onto a grass meadow and fed a weaning pellet. On Dec 1 we brought them to the lot and put them on a high roughage ration. Our goal is to have them developed enough to express their genetic potential and be ready to breed cows in the spring.

Since we have had a few customers who prefer it, this year all the bulls will have a freeze brand. No more ear tag worries.

All our bulls are 100% guaranteed by Thousand Hills. If you have a problem with a bull, let us know. We will make it right.

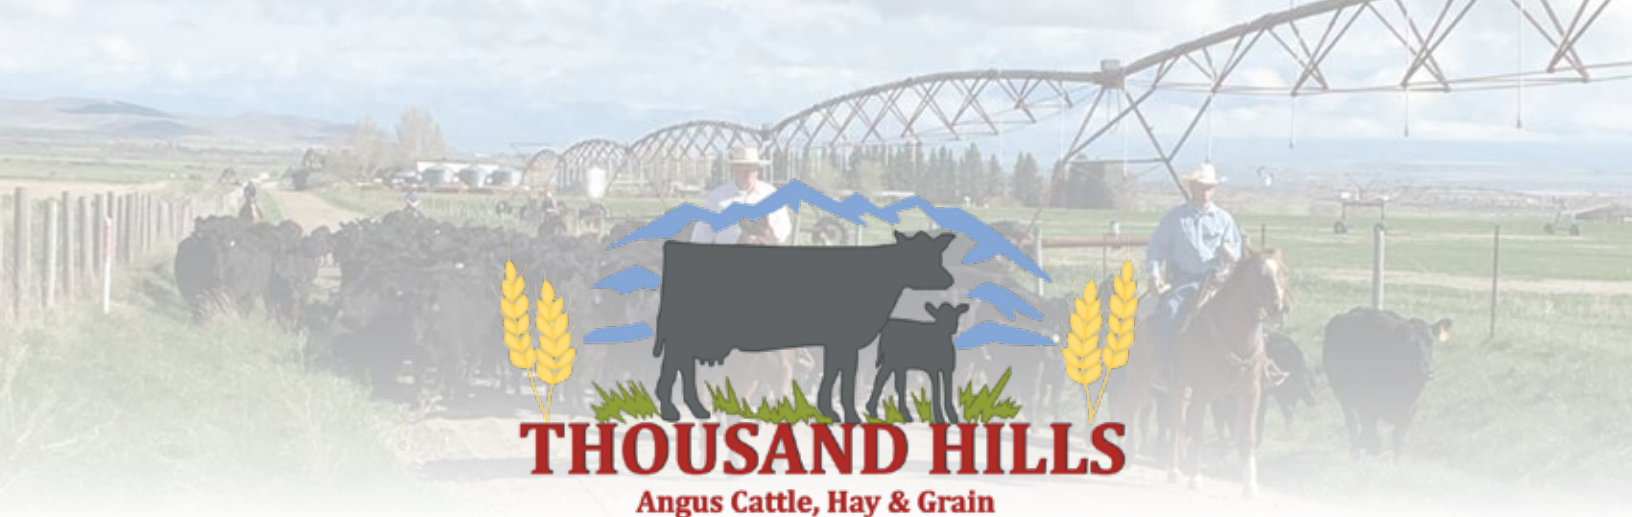

The bulls are on feed here at home until the 12th of March. If you would like to look at the bulls at a more leisurely pace, we would be happy to have you stop by for a cup of coffee and a stroll through the bull pen.

If you are unable to attend the sale but would like to purchase, the sale will be on DV Auctions. They will need you to preregister for the sale 24 hours in advance. We also have phones available on sale day if you prefer that. Let us know and we will make those arrangements.

Videos of all the bulls are available at: ThousandHillsAngus.com

Look forward to seeing you sale day or any other time,

– *The Van Dykens*

THOUSAND HILLS

Angus Cattle, Hay & Grain

Auctioneer

Kyle Shobe..... 406-366-0472

Accommodations

Travelodge Three Forks..... 406-285-3233
 Broken Spur Motel 406-285-3237
 Sacajawea Inn..... 406-285-6515

Presale Dinner

Friday evening at Headwaters Livestock Auction Yards.
 Please RSVP to 406-581-5541

Lunch

Lunch will be served the day of the sale beginning at 12 PM.

Driving Directions

From Interstate I-90, take exit 274 west of Three Forks, MT. Turn north and continue for approximately 0.9 miles before turning west on Wheatland Road. Travel roughly 0.4 miles & Headwaters Livestock will be on your left.

Guarantee

All Bulls are guaranteed for the first breeding season.

A GUIDE TO EPDS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the American Angus Association database. EPDs are expressed in units of measure for the trait, plus or minus.

PRODUCTION

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BirthWeightEPD(BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WeaningWeightEPD(WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

\$VALUE INDEXES

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

CARCASS

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

**1013 is one of our current reference sires. We've used his EPDs to illustrate the definitions for each number.*

Our top selling bull in our lead off sale in 2019 sale. He's in the top 1% of the Angus breed for \$M and 10% for \$ W. Gunsmoke, along with his calves, are thick flashy calves with an incredible hip and hind quarter. A wide top and an unmatched length. His maternal potential is backed by his elite cow family as his Dam, Grandam and Great Grandam made pathfinder status, as well as 8 straight generations of cows producing 7 or more calves. Producing cows that stick! We use this 255 son heavily in our heifer breeding program as his average calf weight in 2020 was 70.5 lbs.

 Pine Coulee Everelda 2B77

“Rezy,” as we call him, was our pick and the second high seller in Pine Coulee Angus’s 2020 sale, hailed as the best bull there. Pine Coulee Resource G708 is a thick well made bull with lots of mass. This thick resource son extends down through his hip and shoulder. He’s easy moving with a wide base. G780 carries himself with the presence of a lasting herd bull. His daughter will be a true asset as his dam has produced 3 calves at 112 NR. His pedigree stacks two of the most influential cows in the Angus breed on top of each other, SAV Blackcap May 4136 on to the Sitz Everelda Entense 1905 cow family.

We are extremely excited about his progeny for the years to come!

We look forward to seeing you sale day!

Rick Van Dyken 406-581-2078 | Andy Van Dyken 406-570-1337

The bulls can be viewed at our home anytime up to the afternoon before the sale when will be hauled to Headwaters Livestock Auction.
