| City Hearts   | Isolation – overwhelming need for technology | • Approx. 60% have no internet  
• 15% have no internet ready device                                                   | Providing survivors with technology and internet access would:  
- increase access to vital services such as counselling and health and wellbeing  
- Decrease social isolation  
- Improve mental health  
Reduce risk of trafficking, which is currently heightened |
