

"The RecoveryXR"

is a single person, vertical walk-in chamber that surrounds the participant's body, up to the neck, with extremely cold non-toxic nitrogen gas.

SAFETY IS OUR NUMBER ONE PRIORITY

- Recovery XR comes with an array of on board safety sensors
- Constant, real time monitoring of User's oxygen levels, pulse, and temperature, triggering instantaneous shutdown of unit if below thresholds

TECHNOLOGY

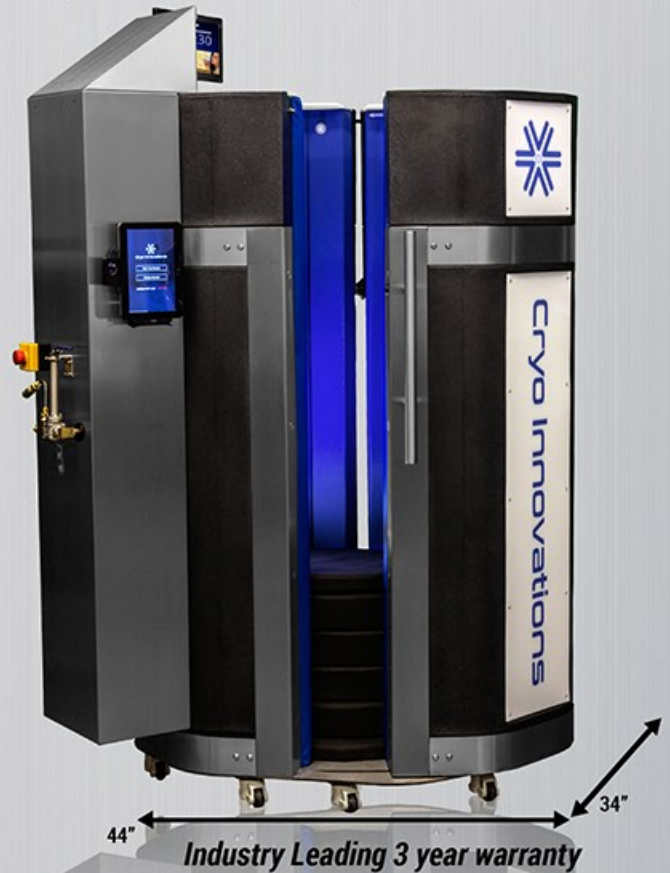

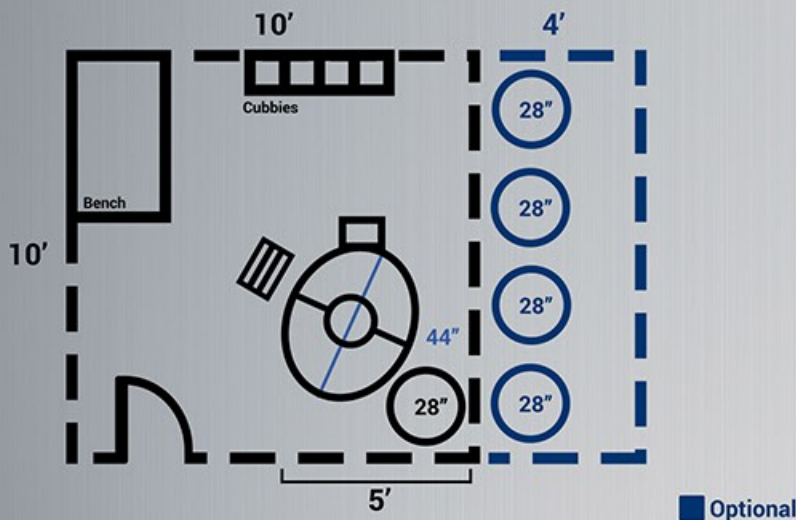

- Wifi connectivity monitors users and chamber in real time
- Chamber will update software and diagnosis problems automatically

CONSTRUCTION

- Modular construction using only the best materials designed for a cryogenics
- High output LED's illuminates cabin
- Extra large interior chamber size comes standard
- No wood or mechanical or parts that can be damaged and become inoperable

EASE OF SETUP AND USE

- Chamber requires no assembly, saving time and costly set up fees
- Simply plug the unit into any 110v outlet, connect a supply of liquid Nitrogen
- No defrosting or down time like other units that use an air mixture to reduce cabin temperature

MOBILITY

- Chamber is completely mobile and can be moved around a room taken to events, marathons or trade-shows
