HOW TO EDIT YOUR MAKEUP BAG

STEP 1: DUMP

- ★ Gather all the makeup in your arsenal - this also means finding products left in handbags, travel bags, etc.
- ★ Clear off a large table or counter, then dump all your products there
- ★ Trash anything old, broken or smelly

STEP 2: SORT

- ★ Divide all makeup into whatever categories you like, i.e. skin, lips, eyes, etc.
- ★ Toss anything you don't love or use (or give to a friend!)
- ★ Notice if you have too many of one category and not enough in another

STEP 3: INVENTORY

- ★ Decide what makeup you actually need and what gaps you must fill
- ★ Ask if any products can be multi-purpose - like lipstick for blush, or concealer for eye shadow primer

STEP 4: LEARN

- ★ Nail down three looks - "Get Out the Door," "Every Day," and "Night Out"
- ★ Decide what products are needed for these looks
- ★ Toss or give away remaining makeup

STEP 5: SHOP

Purchase anything you don't have, including a new makeup bag or storage system.
