

Volunteer Research Assistant Positions

The Emotion, Health and Psychophysiology Lab at UCSF is now accepting applications for volunteer research assistant positions starting August 28th, 2017.

Our research focuses on embodiment -- how the mind influences the body, and the reciprocal, how bodily changes influence thoughts, emotions, and intentions. Research assistants working in the lab are exposed to a variety of studies at the intersection of social psychology, emotion, psychophysiology, and neuroendocrinology.

RAs learn how to conduct studies, collect physiological data and edit and score autonomic data. Our RAs work at least 10-12 hours a week for two school semesters.

If you are interested in applying, please send your cover letter, resume/vita, and weekly availability to Kareenadel Rosario at kareena.delrosario@ucsf.edu.
