

SwipeSense Rounding

THE PROBLEM

Frequent rounding has been shown to improve patient safety, satisfaction, and deliver a significant ROI. However, it is difficult for hospitals to measure, enforce and quantify.

WHY ROUNDING?

Increase HCAHPS by improving nursing responsiveness.

Reduce patient falls and pressure ulcers by proactively addressing needs.

SWIPESENSE ROUNDING SOLUTION

- Eliminate the need for pen and paper rounding log sheets
- Automate rounding compliance documentation
- Identify high and low performing staff to target education and training

FINANCIAL IMPACT

Nurse rounding has been shown to:

- Decrease patient falls by 52%. Each fall costs hospital up to \$13,000 (*Joint Commission*)
- Increase in patient satisfaction and HCAHP scores by up to 12%¹.
- Decrease in pressure ulcers by up to 14% (estimated cost to a hospital is \$43k per ulcer).
- Reduce staff turnover which costs facilities ~\$60,000 per turn².

ROADMAP FEATURES

- Easily see when each patient room was visited
- Identify which staff member completed rounding and at what time
- Reports on staff rounding and compliance
