

TSSS!

2009 Tyson Summer Seminar Series in Ecology and Evolution

Seminars take place on Thursday afternoons from 4-5 PM at the Tyson Research Center (<http://tyson.wustl.edu/maps.php>) and will soon be moving into the new Tyson Living Learning Center (see attached rendering)! Seminars are followed by an informal BBQ—please bring your favorite side dish! For additional information please contact Meghan Kelly (mkelly@biology2.wustl.edu; 935-8430).

MAY 21: BRYAN FOSTER, THE UNIVERSITY OF KANSAS

- *Community differentiation along soil resource gradients: Long-term studies of grassland community assembly*

MAY 28: ALICE WINN, FLORIDA STATE UNIVERSITY

- *Inbreeding depression and the evolution of plant mating systems*

JUNE 4: CHERYL ASA, ST. LOUIS ZOO

- *Title TBA*

JUNE 11: JOHN FAABORG, UNIVERSITY OF MISSOURI

- *Declining bird populations: What is to be done?*

JUNE 18: JEAN TSAO, MICHIGAN STATE UNIVERSITY

- *Investigating the emergence of Lyme disease: Tracking its invasion in southern Michigan in realtime*

JUNE 25: SCOTT COLLINS, UNIVERSITY OF NEW MEXICO AND SEVILLETA LTER

- *Global change impacts on Chihuahuan Desert ecosystems*

JULY 2: TOM ROONEY, WRIGHT STATE UNIVERSITY

- *The white-tailed deer as an all-pervasive ecological force*

JULY 9: SONIA ALTIZER, UNIVERSITY OF GEORGIA

- *Title TBA*

JULY 16: NO SEMINAR

JULY 23: CHRISTINA ROMAGOSA, AUBURN UNIVERSITY

- *United States trade in live vertebrates: Patterns and contribution to biological homogenization*

JULY 30: LARA SOUZA, UNIVERSITY OF TENNESSEE

- *Community invasibility: From pattern to process across multiple spatial scales in an old-field system*
