Gazette issued on 9th June, 2023
Of the 1.27 lakh students that appeared in the Class XII board examinations conducted by Board of School Education (BOSE) in the Kashmir valley:

• Six KEI scholars achieved a spot in the top 10.
• 156 KEI scholars earned distinctions.
• 12 KEI scholars secured first division.

**Spotlight on Jehangir Yousuf and Idrees Ashraf**

Amongst the Class XII toppers is Jehangir Yousuf from Budgam, who earned the fifth position in the valley and secured 677 points in the highly competitive NEET examinations, an incredible achievement! He was felicitated by District Administration Budgam, as he also brought laurels to his home district. Please join us in wishing him all the best as he embarks on his medical career!

*It runs in the family*

The transformative impact of KEI’s intervention is evidenced by the fact that Jehangir’s elder sibling Shabnam Yousuf is also a KEI scholar and is currently pursuing his Post Graduate studies.

*Idrees Ashraf* is another high-achieving student who received a 96% grade in class XII exams and scored 637 marks in NEET exams. Idrees follows in the footsteps of his elder brother, Asif Ashraf, who is an MBBS student and a KEI alumnus. We are so proud of Idrees and wish him the very best!
Idrees Ashraf (Our Scholar)
We extend our heartfelt gratitude to our donors whose unwavering support has made dreams possible. Congratulations to the brilliant stars of KEI for their remarkable academic achievements and resilience in overcoming life’s challenges.

**Metacognition Workshops Provide Life-long Skills**

KEI held six workshops throughout the valley helping our scholars become self-reliant, confident and successful. Scholars worked on real-life planning, mental scripting, positive self-talk, introspection and self-monitoring. Scholars did this through:

- Active reading & learning.
- Preview Questioning.
- Paraphrasing.
- Memory Mapping using the Method of Loci (Mind Palace).

**Scholars and Parents Embrace Gooru**

202 Class X scholars and their parents explored the potential of the Gooru Navigator Platform, an integrated learning exchange that enables all stakeholders in the education ecosystem to interact and accelerate learning outcomes via personalized journeys.

Mapped to the Board of School Education (BOSE) curriculum, Gooru is being actively used by our scholars today to supplement their current learning and prepare for competitive exams.
An insightful scholar-parent interaction was organized by KEI for Batch 2022 under the program Gooru Navigator.

That's it for this edition, We'll be in touch next month!

Before we sign off this month, we would again like to welcome you and your friends to the growing KEI family. Come and join us as mentors, as volunteers, take on a project, advise us, learn with us, have fun with us, and grow with us!

Please write to us at newsletter@kashmirei.org, with your feedback and suggestions. We would love to hear from you. Also, if you like what you hear, feel free to forward our newsletter to your friends and family.
