Policy for Travel

This policy applies to all travels and all EWB members.

Main Principles:

- We travel conscious of the environment. This means that we
  o if possible, choose travel by train over car or airplane
  o set aside funds for our internal climate fund when flying

- We travel conscious of cost. This means that we
  o travel in economy or 2nd class
  o stay in hotels with a reasonable, but not luxury, standard

- We travel conscious of necessity. This means that we
  o ask ourselves if the trip is really necessary and if Skype (or similar) could be an alternative

- We travel conscious of risk. This means that we
  o during international projects, we strictly follow our guidelines and instructions for international project travel
  o follow traffic laws
