

Atherton Square Homeowners Association

Satellite Dish Installation Guidelines and Notification Form

Any Owner/Renter installing a satellite dish shall submit a notification to the Association explaining their installation or planned installation.

Satellite dishes must be installed wholly within the boundaries of the Owner's Lot. Installation in Common Area or on another owner's lot is prohibited even if an acceptable quality signal cannot be received from anywhere on the Owner's Lot.

Satellite dishes shall be secured in a manner, which does not jeopardize the safety of any person near the satellite dishes and the installation shall be completed so as not to materially harm or damage the Association's Common Area and/or impair the integrity of any structure.

Satellite dishes shall be installed in a location shielded from view to the extent possible while still maintaining acceptable quality signals. Every effort must be made to minimize the visual impact on the community. All exterior wiring shall be installed in a manner, which minimizes visibility. Exposed wiring must be painted to match the home.

The Association will require any satellite dish installation found to be inconsistent with these requirements to be removed, relocated, or altered to comply with these guidelines.

Please describe the exact location or planned location of the satellite dish. Provide a diagram or drawing on the back of this form which indicates the location of the satellite dish on the Lot.

I acknowledge that I have read, understand, and have complied or will comply at all times with the Association's current guidelines with respect to the installation of satellite dishes.
