

# Terial Magic

Make fabric paper-like and fray free

## 16 INCREDIBLE APPLICATIONS

Terial Magic spray-on fabric stabilizer replaces traditional fabric stabilizers by infusing into the fabric fibers making fabric paper-like and fray-free. Terial Magic treated fabric provides multiple solutions for paper and fabric crafters and artists alike.

- Machine embroidery
- T-shirt quilting
- Raw edge appliqué
- Thread painting
- Inkjet and laser printing
- Die cutting multiple fabric layers
- Electronic cutting
- 3D flowers, 3D art quilts and costumes
- Stamping, markers and fabric painting
- Scrapbooking and origami with fabric
- Precise quilt piecing
- No stretch bias piecing
- Easy quilting on home machine or long arm

### Instructions for use:

Treat any natural fiber fabric (or up to 40% poly) with Terial Magic in three simple steps:

Terial Magic is all natural, non-toxic and safe for children. Now you can have treated fabric for all your project needs. Terial Magic doesn't gunk up needles or machines the way fusibles can.

**Machine Embroidery:** Hooping treated fabric is easy without the need to hoop both fabric and stabilizer. This means no more fusibles, off-gassing plastic fumes or pulling uneven layers taut. Simply hoop Terial Magic treated fabric to embroider beautiful, even stitches that don't collapse and are pucker-free. Once the project is finished, soak in warm water for 10 minutes or wash out. Great for T-shirt embroidery with no shadow lines or itchy backing.

**T-Shirt Quilting:** There is no longer any need to iron on expensive fusible stabilizing or leave hard and stiff stabilizer in your quilts. T-shirts treated with Terial Magic are stretch-free and sew and press like wovens. Sewing and quilting glides through sewing machines without puckers, fraying, pleating or warping. Once quilted, soak in warm water for 10 minutes or wash out. Quilts will be soft, light and feel cozy like a T-shirt should.

**Raw Edge Appliqué:** Treated fabric is fray-free, cuts like paper and sews evenly to treated background fabric. Even intricate shapes are easy to cut and appliqué. Top stitching close to treated edges is effortless. Paper-like fabric is perfect for appliquéd wall quilts or fabric cards. Leaving Terial Magic in keeps fabric taut and looking freshly pressed. Unlike starch it doesn't attract bugs when left in. Note: Leave in our wash out for desired effect.

**Thread Painting:** Get flawless results while thread painting. The stitching is even and the edges do not curl as fabric glides while you free motion paint with thread.

**Inkjet and Laser Printing:** Cut treated fabric to paper size and load into printer without the need for freezer paper. Heatset permanent ink with medium hot iron to make printing color fast. Print on fun fabrics for custom quilt appliqué, fray-free fabric banners, etc.

**Die Cutting:** Use treated fabric in a die cutter for clean fray-free cuts that cut like paper. Save time by cutting multiple layers at once. Enjoy cutting shapes for quilts perfectly that sew together evenly because they are paper-like. Try using fray-free fabric shapes to decorate cards and scrapbooking instead of paper.

**Electronic Cutting Machines:** Treated fabric mats like paper then easily pulls off without fraying or distortion. Be sure mat is extra tacky and always clean mat after fabric cut with a baby wipe for better cuts.

**3D Flowers, 3D Quilts and Costumes:** Terial Magic makes raw silk, wool or any natural fiber have a firm hand for distinctive 3D effect on fiber art. Try Terial Arts 3D patterns like our fun fairy wings, flowers and quilts to make any gathering enchanting. Terial Magic gives fabric the extra body needed for easy, unique and creative construction.

**Stamping, Markers and Fabric Painting:** Adding texture and depth to any papercraft by using Terial Magic treated fabric. Ink still penetrates the fabric, yet Terial Magic restricts the bleeding. Heatset permanent inks with a medium hot iron to make colorfast.

**Scrapbooking and Origami:** Using treated fabric for any paper craft. Fabric doesn't tear, lasts longer than paper, and adds depth and texture to enhance any scrapbook or paper crafting project. Make little treasures with fabric origami from your favorite batik or cotton fabrics.

**Precise Quilt Piecing:** Envision cutting and piecing with paper-like fabric. Treated fabric makes the entire process of quilting easier and faster, even cutting sewing time in half. Rotary or hand cutting treated fabric without any shifting making for perfectly aligned edges. Terial Magic treated fabric means no flimsy edges, flat pressed seams, even finger press seams open with nothing to get caught in the feed dogs.

**No Stretch Bias Quilt Piecing:** Treated fabric makes perfect bias cuts and pieced blocks without any stretching or distorting. Making sewing even and perfect for exact blocks that will need less squaring up. Seams press open and flawlessly flat.

**Quilting on Home Machine or Long Arm:** When toppers and backs are treated and sewn with Terial Magic they quilt together smooth and even without puckers or tucks. Stitching is smooth and faultless when going over thick seams without stitch skips or bunching and free motion glides faultlessly.
