Our Compact MTBs feature shorter geometry and components to better fit a smaller rider. The 604 may be our entry level model, but with carefully chosen parts and an exceptional frame it remains distinctly Whyte.

The 600 Series frame is brand new for 2017, using the very latest Whyte geometry, lightweight multi-butt construction, and tidy BBX internal cable routing.

This new frame bristles with UK design features such as the "Get A Grip" seat post clamp system. This allows quick adjustment, fantastic weather proofing and a nice ergonomic lever which is easy to operate however cold your hands might be.
