Our Alloy 29er hardtail frame is brand new for 2017, using the very latest Whyte geometry based around a longer top tube, a short stem and wide 720mm bar. The 2017 bikes are also built around a 120mm travel fork, which brings trail bike levels of performance.

A 15mm through-axle fork, 21mm wide trail rims and front and rear specific tyres give the 529 true trail bike performance at an affordable price point.

This new frame bristles with UK design features such as the "Get A Grip" seat post clamp system. This allows quick adjustment, fantastic weather proofing and a nice ergonomic lever which is easy to operate however cold your hands might be.
