The Whitechapel is all about simplicity: a single chain ring and nine gears at the back will give years of urban use, and by placing the disc brake caliper inside the rear triangle, adding mudguards or a rack couldn't be easier.

Based on our high performance mountain bike geometry, all our Fast Urban bikes have a long wheelbase and relaxed head angle for high speed stability, and a shorter stem for excellent slow speed manoeuvrability.

For 2017 we have a new frame, featuring a brand new front triangle with internal cable routing, BBX and new slimmed down seat stays to give even more comfort.
