A lightweight aluminium frame employs compact geometry to make this bike a perfect fit for female riders, while a carbon fork does a great job of dampening out road buzz.

Based on our high performance mountain bike geometry, the Pimlico has a long wheelbase and relaxed head angle for high speed stability, a shorter stem for excellent slow speed manoeuvrability and slightly shorter and lower top tube to fit a woman's physique better.

The Pimlico takes advantage of SRAM's Via Centro groupset, specifically designed for urban riding with optimised ratios and slightly wider Q factor for a little more heel clearance.
