

NXT Gas Solutions offers natural gas membrane solutions on a rental basis through its exclusive relationship with Air Liquide.

**Robust, high performance hollow fiber membranes for gas separation**

### Natural Gas Membrane Solutions

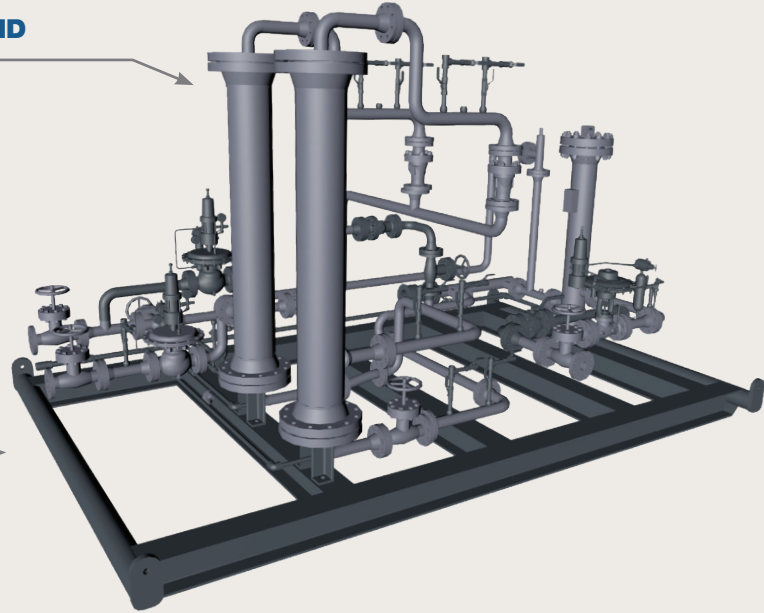

Membrane systems for natural gas treatment have been used since the 1980s. Air Liquide's hollow-fiber proprietary technology offers these advantages:

- Improved membrane life ~ 5 years or more.
- Greater tolerance to solvents and chemicals.
- Minimal need for pre-treatment.
- Customizable solutions.

**FUEL GAS CONDITIONING SKID FOR H<sub>2</sub>S REMOVAL**

7' X 12' SKID

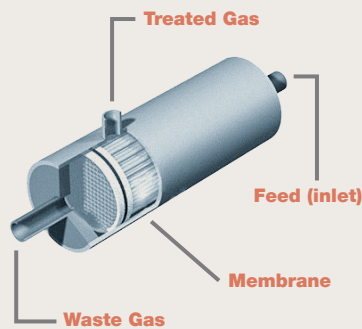

Compact and reliable,  
membrane technology  
is portable and more  
cost-efficient

**Advantages of Membrane Gas Conditioning**

- Low cost
- Minimal maintenance
- Compact, small footprint
- Simultaneous removal of multiple impurities (CO<sub>2</sub> and H<sub>2</sub>S)
- Exhibit exceptional chemical and thermal resistance
- No pre-treatment required
- Can dehydrate gas in addition to removing heavy hydrocarbons

**MEMBRANE VESSEL**

**FUEL GAS FOR GENERATORS & COMPRESSORS**
