

ASHRAE Product Directory

2017 – 2018

Central Florida Chapter of ASHRAE

<http://ashrae-cfl.org/>

55 Years of Excellence

Foreword

This FY 2017-2018 Directory of the Manufacturers' Representatives was prepared by the Central Florida Chapter of ASHRAE to foster better communications between all segments of the local industry.

Listings are not limited to ASHRAE members. THE DIRECTORY IS NOT ADVERTISEMENT NOR CONSTITUTES ANY ENDORSEMENT OF ANY PRODUCT OR COMPANY BY ASHRAE. The information herein was furnished by listing firms, and is edited to give as much conformity to basic information as possible. The Chapter cannot be responsible for errors or inaccuracies that might occur.

A committee consisting of ASHRAE members prepared the Directory. Firms not listed that would like to be included in future annual issues should contact one of the BOARD OF GOVERNORS listed in the proceeding pages.

From the desk of the Chapter President,

Welcome to this year's Product Directory. I want to thank our valued vendors who participated in making this year's Product Directory an efficient tool for designers, owners and contractors. In particular, I would like to thank and recognize Tom Edwards for the time and effort he dedicates to this effort each year. His time spent behind the scenes often goes unrecognized, but the Directory would not be possible without his involvement. The proceeds from this Directory help fund the Shrimp Boil and all other social events the Chapter offers to its members.

In the following pages, you will find a one-stop resource for manufacturer's products. In today's ever changing landscape, the Directory provides up to date vendor product lines. Filled with comprehensive vendor contact information, this document offers a convenient resource for locating the correct product solution for the customer's need.

The Directory has two cross references. The first is a generic product name to manufacturer. The second is manufacturer to vendor, thus closing the loop from product to vendor.

In addition to product vendor references, you will find a listing of Chapter Officers, Regional Officers, Chapter meeting dates/locations, local design firms and contractors, and a quick reference list of common engineering equations. This is regularly updated and provided for your convenience.

Please obtain a copy of the Directory from your vendors. It is our hope that your copy will provide value on a daily basis.

We look forward to seeing you at our dinner meetings, social events, golf tournaments and annual Shrimp Boil.

Thank you,

Paul Albers

Liebert Data Center & Mission Critical Cooling Systems: Liebert manufactures a complete line of Floor, Wall, & Ceiling hung Precision Air Conditioning Units for Computer Rooms and other mission critical cooling facilities that demand continuous 24x7x365 precision cooling without interruption. These Liebert Precision cooling systems are available in a variety of capacities ranging from 1 to 60 Tons in a variety of flexible heat rejection configurations that include Split System Air Cooled, Water Cooled, Chilled Water, & Glycol. Liebert also manufactures a complete line of UPS, Power, Racks, and Data Center Monitoring systems.

High Density Modular Data Center Cooling - Energy-efficient and flexible high heat density Liebert XD and Liebert DCW cooling solutions optimize data center infrastructure design. Liebert high density data center cooling solutions are available with open or closed architecture, and pumped refrigerant-based or water-based technology or water based technology.

Small Room Data Center & Network Closet Cooling - Space-saving precision system cooling available in configurations and sizes to meet the needs of electronic equipment in tight spaces. Ceiling Hung and wall hung systems are also available at 1 to 10 Tons.

Large Data Center & Mission Critical Room Cooling: Precision data center cooling and humidity control solutions provide protection in raised floor or ducted applications. A variety of models and configurations are available. Sizes range from 10 to 80 Tons per single unit.

Liebert PDX & PCW Compact perimeter cooling systems, 11 KW to 29 KW, chilled water, air cooled, or water cooled. The Liebert PD or PCW unit offers the highest efficiency available in the industry for small data center, network closets, & Mission critical small room applications.

SmartAisle - The SmartAisle offering optimizes infrastructure deployment and management with an intelligent row-based system that integrates data center racks, power, row cooling, aisle containment, monitoring and control technologies for spaces with up to 40 racks

Heat Rejection System-matched condensers, dry coolers and condensing units for continuous, proper operation of data center cooling systems.

Economizer Data Center Cooling Solutions Economizer cooling solutions including Liebert Air Economizer, GLYCOOL glycol-cooled economizer, and chiller plant economizer compatibility, can reduce data center cooling costs by up to 50%, without compromising system reliability.

TRICOIL
www.tricoil.com

NEW: TRICOIL Fan Coil Unit, Factory Piped and Wired, Outside Air Connection, 2 or 4 Pipe, Chilled Water or DX, Special Circuited Coil provides precool and reheat.

Recuperative heat recovery – similar to a heat pipe system but uses water instead of refrigerant for heat transfer. Provides a cost effective, reliable and easily maintained method of air conditioning with enhanced dehumidification

Dedicated Outside Air Systems (DOAS)

Recirculation Air Systems (any percentage of outside air)

Variable Air Volume Applications

Displacement Ventilation Applications

Relief Air Heat Recovery

Multiple Zone Systems

Low Dew Point Applications (to 38 degree F)

Units can be fully pre-piped and pre-wired unit or systems can be made of kits and modules for field installation using many of the major air handling unit manufacturers' standard components.

TRICOIL® Pump Packs

RECENT APPLICATIONS include Nursing and Long Term Care Facilities, Computer Rooms, Clean Rooms, Indoor Shooting Ranges, Classroom Air Conditioning, Laboratory Spaces, Dormitories, Indoor Swimming Pools, Hotel Corridor Make-up Air Systems

CALMAC THERMAL STORAGE www.calmac.com	Load shifting technology to reduce peak demand – product and Store ice at night, melt during the day, Proven technology, No moving parts
CANARIIS CORPORATION www.canariis.com	Pumping Packages, Skid mounted packaged pumping and packaged Chiller systems, UL Listed and factory tested with integral controls.
RENEW AIRE www.renewaire.com	ERV, Total energy fixed plate heat exchangers, configuration with No cross contamination, supply and exhaust fan options.
MUNTERS DES CHAMPS www.munters.com	Desiccant Product, DOAS featuring desiccant wheel technology, Energy recovery, Heat Pipes, Natatorium configured arrangements
GENESIS AIR www.genesisair.com	Filtration, Photo Catalytic Oxidation air cleaner system utilizing Hydroxyl radicals to destroy bacteria, mold, viruses and other Microbial parasites. Reduces odors and includes UV light benefits.
Alfa Laval Heat Exchangers www.alfalaval.us	Plate and Frame, Shell and Tube, and Brazed Plate Heat Exchangers
MULTI AQUA www.multiaqua.com	Fan Coils/Chillers, Ductless and ducted chilled water fan coil units, Air cooled water chillers
ARCTIC CHILLER GROUP www.arcticchillergroup.com	Modular chillers, air or water cooled, heat recovery, heat pump, Packaged or split, Danfoss Turbocor oil free MagLev compressors and integral pump packages
SCHOOL AIR www.schoolair.com	Classroom air conditioners, classroom unit ventilators with 2/4 pipe Heat pump, air cooled, water cooled or self contained
TOWER TECH www.towertechinc.com	Cooling Towers – Fiberglass modular cooling towers with highest Efficiency and redundancy utilizing direct drive fans
TEMSPEC VERTICAL FAN COIL UNITS www.temspec.com	Custom and cataloged exposed or concealed vertical stacked Fan coil units
FILTRINE CHILLERS www.filtrine.com	Custom, process, medical, explosion proof, and food Application chillers.
NAPPS CHILLERS www.nappstech.com	Custom and process liquid chillers, water cooled and condensing Units and compressor units
MORGANIZER www.morganizer.com	Custom 100% outdoor air applications, packaged units, split systems, Air cooled and water cooled units available
THERMAX ABSORBERS www.thermax-usa.com	Absorption chillers using steam or high temperature hot water

CLIMATE CRAFT
www.climatecraft.com

Custom air handlers featuring fully configurable arrangements,
And specialized construction materials, optional fully knocked
Down construction

COMPU-AIRE
www.compu-aire.com

Precision HVAC specialized environmental air conditioning units
With 2/4 pipe, DX, air cooled and water cooled applications.

TRANE
www.trane.com

VRF- Full complement of ducted and ductless air handlers.
Multiple air handlers tied to a single condensing unit.
Condensing units can be air cooled or water cooled.

Ductless and ducted air handlers and cassette style air handlers.
Matched with condensing units or multiple air handlers on a
Single condensing unit.

HORIZON – Packaged 100% OA equipment with optional heat pump,
Water cooled and ERV's

TR1 VFD – Factory installed or field mounted VFD for all applications.

CENTRAL FLORIDA CHAPTER MEETING DATES

CHAPTER MEETINGS

THE TAP ROOM AT DUBSDREAD (549 West Par Street, Orlando, FL 32804)

4:30 PM Board of Governors Meeting
 6:00 PM Cocktails & Fellowship
 7:00 PM Dinner and Program

Second Thursday of every month (except March, June, July & August, no meetings)

September 14, 2017
 October 12, 2017
 November 8, 2017 (Lunch Meeting)
 December 14, 2017
 January 10, 2018 (Lunch Meeting)
 February 8, 2018 (Lunch Meeting)
 March 8, 2018 Shrimp Boil
 April 12, 2018
 May 10, 2018 (Lunch Meeting)

GOLF OUTINGS

Fall Outing – Shingle Creek Golf
 Spring Outing

November 10, 2017
 TBA

SHRIMP BOIL

March 8, 2018 Annual Shrimp Boil – Winter Park Farmer’s Market

CENTRAL FLORIDA CHAPTER CHARTER MEMBERS

The following is a list of the charter members as recalled by some of the early charter members. Our apologies to any member overlooked in this list. Anyone having additional information on the charter year is encouraged to contact the Chapter Historian.

CHARTER MEMBERS

James A. Oberlin, *Charter President*

James Driver, *Charter Vice President*

William Vincent, *Charter Secretary*

Lloyd Bossoneault

Warren Chase, PE

Robert Collie

William C. Denson, PE

James L. Gay, PE

James Grinnan

Kenneth Hayes

Hugh Martin

William Penn

Edmund P. Senk

OBJECTS OF ASHRAE

The object of the Society is to advance the arts and sciences of Heating, Refrigerating, and Air - Conditioning, and the allied arts and sciences, for the benefit of the general public by:

1. Stimulating technological progress for the good of mankind.
2. Maintaining a high professional standing among its members.
3. Encouraging the continuing education and professional advancement of its members.
4. Providing educational opportunities through its publications, research, seminars, chapter scholarships and national, chapter and regional meetings.
5. Conducting a program of basic and applied research through grants -in-aid to colleges and laboratories.
6. Developing codes and standards and by co-operating with other organizations in development of standards.
7. Encouraging fellowship among engineers and industry leaders.

THE ADVANTAGES OF MEMBERSHIP

1. You are kept informed of new developments of technical and professional interest.
2. You receive, regularly, as a part of the services available to you for payment of dues...
 - (a) ASHRAE JOURNAL, the Society's monthly publication and the most authoritative periodical on research, design, development, engineering and news in our fields; plus...
 - (b) ASHRAE HANDBOOK & PRODUCTS DIRECTORY, a three volume series constituting a complete reference of current data in Heating, Refrigeration, Air Conditioning and Ventilating. Each year, a member receives a new volume on Applications, Equipment or Systems. The cycle continues every three years.
 - (c) Plus...ASHRAE HANDBOOK OF FUNDAMENTALS, invaluable to the Society members, to the industry, and to the students and teachers as a basic reference in theory, terminology and general engineering data.
 - (d) You may purchase, at a nominal cost, all other ASHRAE Publications such as TRANSACTIONS, our annual compilation of technical papers and discussions, presented at national meetings of the Society; ENGINEERING STANDARDS RESEARCH REPORTS, SYMPOSIUM BULLETINS, RE-PRINTS OF TECHNICAL PAPERS.

3. Provided you meet the particular requirements, you are eligible for membership on any of the Society's administrative or general committees or on the 60 technical committees and nine task groups, which direct ASHRAE's Research and Technical activities.
4. You have access to and may borrow from the Engineering Society's Library, the world's largest engineering library.
5. Most important of all, you have the opportunity to help yourself, your industry, and your profession, by expanding your own knowledge and helping to support the valuable work of ASHRAE.

BASIC EQUATIONS

Air

Q sensible (BTH) = CFM x 1.1 x ΔT ($^{\circ}F$), moist air, for dry air use 1.08

Q total (BTH) = CFM x 4.5 x Δh , 4.5 = .075 #/cf x 60 min/hr

Q latent (BTU) = CFM x 4840 x (w1 - w2) gr/gr; = CFM x .68 x (w1 - w2) ##

$h(wbt) = 10.12924 + .000357914 (wbt)^{2.6213}$

MAT = (% OA x OAT) + (% RA x RAT)

Velocity pressure = (V/4005)²

% outside air = (MAT-RAT)/(RAT-OAT)

MAT – mixed air temp, RAT – return air temp, OAT – outside air temp

OA – CFM outside air, RA – CFM return air

Air Handling Unit

BHP = (CFM x SP)/(6356 x eff) SP in-wg

BHP = (RLA - .5 x NLA)/(FLA - .5 x NLA) x HP(nameplate)

NLA – no load amps, RLA – run load amps, FLA – full load amps

Mech Eff = (TP x CFM)/(6356 x BHP) (Air HP)/(Shaft HP)

Static Eff = (SP x CFM)/(6356 x BHP)

$T_{LDB} = T_{EDB} - (SHC/(1.1 \times CFM))$, T_{LDB} = temp leaving coil, T_{EDB} = temp entering

$h_L = h_E - (THC/(4.5 \times CFM))$, h_L = enthalpy leaving, h_E = temp entering,

THC = total cooling capacity MBH

$CFM_a = CFM_b \times (RPM_a/RPM_b)$

$CFM_a = CFM_b (SP_a/SP_b)^{1/2}$

$SP_a = SP_b \times (CFM_a/CFM_b)^2$

$SP_a = SP_b \times (RPM_a/RPM_b)^2$

$HP_a = HP_b \times (RPM_a/RPM_b)^3$

Temp rise ($^{\circ}F$) = .413 x SP (in-wc, ISP+ESP)/net fan efficiency (say 55% to 75% assumes fan motor is in air stream, efficiency = 100% if motor is not in air stream)

Pump

BHP = (GPM x TDH) / (3962 x eff)

$GPM_a = GPM_b \times (RPM_a/RPM_b)$

$HEAD_a = HEAD_b \times (RPM_a/RPM_b)^2$

$BHP_a = BHP_b \times (RPM_a/RPM_b)^3$

Water

$Hv (ft) = (V_o^2 - V_i^2)/(2 \times g)$; V_o – outlet velocity in fps : V_i – inlet velocity in fps

$V = .408 \times GPM / (D^2)$

BTU/Hr = GPM x 500 x ΔT

500 = 8.33 #/gal x 60 min/hr

GPM = Cv $\sqrt{\Delta P}$ (ΔP in PSI)

TONS = GPM x ΔT / 24

Refrigeration

HP/ton = 4.71/COP

Energy

KW/ton = 12/EER

KW/ton = 12/(COP x 3.413)

KW = VOLTS X AMPS X PF X $\sqrt{(\text{PHASE})}$ /1000

Water Coils

$\Delta T(\text{air}) = 927 \times \text{MBH}(\text{coil})/\text{CFM}$

$\Delta T(\text{water}) = 2.04 \times \text{MBH}(\text{coil})/\text{GPM}$
