# RECIPES

## Soups
- Chicken and sweetcorn soup
- Easy minestrone soup
- Leek, potato and pea soup
- Lentil and carrot soup

## Jacket potatoes
- Jacket potato with beef stir-fry
- Jacket potato with scrambled egg and spinach
- Jacket potato with tuna, sweetcorn and soft cheese
- Jacket potato with vegetable chilli

## Potato-topped pies
- Chicken and mushroom pie
- Fish pie
- Mediterranean pie
- Shepherdess pie

## Stews and hotpots
- African sweet potato stew
- Baked bean and veggie sausage hotpot
- Creamy chicken and leek hotpot
- Goulash

## Rice recipes
- Egg-fried rice
- Jerk chicken with rice and beans
- Turkey and vegetable pilaf
- Vegetable biryani

## Pasta recipes
- Green mac and cheese
- Pasta with green beans and peas
- Spaghetti Bolognese
- Tuna pasta

## No-cook meals
- Peanut butter and banana sandwiches, with carrot and cucumber
- Pitta with houmous and cucumber, with carrot salad
- Savoury couscous salad with tuna
- Mexican bean and cheese wrap, with red pepper and celery

## Puddings
- Apple crumble
- Banana custard
- Poached pear with Greek yoghurt and honey
- Rice pudding with raisins
About this guide

The aim of this guide is to provide support to families to help them to get the most out of the Healthy Start scheme. The guide provides a range of healthy family recipes using ingredients that can be bought with Healthy Start food vouchers, and shows how these can feed the whole family.

This guide provides:

• information on the Healthy Start scheme and what can be bought with the Healthy Start food vouchers

• recipes for family meals, with photos of appropriate portion sizes for infants, children and adults

• simple ideas for eating well on a budget, and

• ideas for complementary foods and finger foods for infants from 6 months of age.

As well as supporting the use of Healthy Start food vouchers, the guide promotes family mealtimes by including recipes that can be prepared for all age groups. Eating with others can help children develop social skills and good eating habits from a young age and there is lots of evidence that children really benefit from sharing mealtimes in a family setting.

Health professionals can use the recipes in this guide to show practical examples of meals that include ingredients bought with Healthy Start food vouchers. Health professionals can also use the guide to promote eating well in pregnancy and the early years, with support from Healthy Start food vouchers.
About Healthy Start

Healthy Start is a UK-wide scheme to improve the diets of pregnant women and children aged 1-4 years in low-income families. All pregnant women under the age of 18 years are also eligible for the scheme. Healthy Start families receive weekly vouchers that can be exchanged for fresh and frozen fruits and vegetables, cows’ milk or cows’ milk based infant formula suitable from birth. The vouchers can be used at most supermarkets, and at some small shops, market stalls, farmers’ markets and community food projects.

How much are the Healthy Start food vouchers worth?

<table>
<thead>
<tr>
<th>Who benefits?</th>
<th>Healthy Start food vouchers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pregnant woman</td>
<td>1 voucher (£3.10*) per week</td>
</tr>
<tr>
<td>Infant 0-12 months</td>
<td>2 vouchers (£6.20*) per child per week</td>
</tr>
<tr>
<td>Child 1-4 years</td>
<td>1 voucher (£3.10*) per child per week</td>
</tr>
</tbody>
</table>

* Based on 2017 values

For example, if a family has a baby aged 6 months and a toddler aged 3 years, they would be eligible to receive £9.30 in vouchers each week.

Who is eligible?

You qualify for Healthy Start if you’re at least 10 weeks pregnant or have a child under 4 years old, and you or your family get:

- Income Support, or
- Income-based Jobseeker’s Allowance, or
- Income-related Employment and Support Allowance, or
- Child Tax Credit (with a family income of £16,190 or less per year), or
- Universal Credit (with a family take-home pay of £408 or less per month).

If you have any queries about eligibility, call the Healthy Start helpline on 0345 607 6823, or send an email to helpdesk@tiu.org.uk

You also qualify if you are under 18 and pregnant, even if you don’t get any of those benefits or tax credits.

Healthy Start application forms are available from midwives, health visitors, children’s centres and GP surgeries, or you can download the form from www.healthystart.nhs.uk. The form must be signed by a health professional to confirm the pregnancy – for example, by a midwife at the booking-in clinic when you first attend an ante-natal appointment, or by a health visitor or GP. Eligible pregnant women or parents and carers of young children can apply for Healthy Start at any time, but vouchers will only be backdated for 3 months.

For more information on who is eligible, how to apply for Healthy Start and where Healthy Start food vouchers can be spent, see www.healthystart.nhs.uk
What does the Healthy Start scheme aim to do?

Healthy Start food vouchers make a contribution to household food budgets and can help families increase the amount and variety of fruits and vegetables they eat. The aim of Healthy Start food vouchers is to offer nutrition support to expectant mothers and young children because a good diet in pregnancy and in the first few years of life is essential for prevention of disease and to ensure children reach their full potential for growth and development.

As well as contributing to household food budgets, Healthy Start can:

• **Support breastfeeding mums:** When mums breastfeed they can spend Healthy Start food vouchers on plain fresh or frozen fruits and vegetables to improve their own health and nutrition.

• **Support families to eat more vegetables and fruit.**

• **Support families to eat a wider range of vegetables and fruits.**

• **Support parents of babies aged 6 months to 1 year to provide healthy and cost-effective complementary foods when babies go onto solids:** Healthy Start food vouchers can be used to buy foods that can be used to make healthy and inexpensive complementary foods to be given to infants aged 6 months to 1 year, alongside breastmilk or infant formula.

• **Support a healthy diet with Healthy Start vitamins:** Families that are eligible for Healthy Start food vouchers will also receive a voucher that can be exchanged for free Healthy Start vitamins for women and Healthy Start children’s vitamin drops (see page 14).

• **Support the safe use of infant formula:** Where mums do not breastfeed, families can use Healthy Start food vouchers to buy cows’ milk based first infant formula in the first year of a child’s life. All families should be given information on appropriate infant formula to buy and how to make these milks up safely.
Fruits and vegetables are good sources of fibre, vitamins such as vitamin A, vitamin C and folic acid and minerals such as potassium as well as other nutrients that have been associated with good health in pregnancy and the early years.

Starchy vegetables also provide energy, fibre, and other useful vitamins and minerals.

Eating lots of fruits and vegetables has been associated with less disease and may reduce the risk of heart disease, some cancers, bone disease and a range of other health conditions.

Fruits and vegetables should make up over a third of the daily diet for everyone over 5 years.

Children aged 1-4 years should taste at least 5 different fruits and vegetables a day. Their portions at mealtimes can be about 40g – that is, half that of an adult or older child.

Fruits and vegetables make ideal complementary foods to introduce to infants at 6 months (see page 63).
Milk is a good source of protein, calcium, magnesium, potassium, zinc and iodine, the B vitamin riboflavin and other vitamins such as vitamin A and vitamin B6.

Many of the vitamins and minerals found in milk can support good bone health. Milk also provides other nutrients, such as iodine, which is essential for brain development in pregnancy and the early years.

Plain cow’s milk: whole milk, semi-skimmed milk, 1% fat milk or skimmed milk.

Milk can be pasteurised, sterilised, long-life or ultra-heat treated (UHT).

Flavoured milk
Coloured milk
Evaporated milk
Condensed milk
Goats’ milk
Sheep’s milk
Soya milk alternative
Oat milk alternative
Nut milk alternatives
Rice milk alternative
Hemp milk alternative
Powdered milk (unless it is infant formula – see below)
Milk with anything added to it, such as milkshakes or vitamin-enriched milk

Additional advice
Pregnant women should not drink unpasteurised milk.

Infants (0-1 year) should be breastfed (see page 77 for sources of advice on breastfeeding). Otherwise an appropriate infant formula should be used (see page 74 for information on appropriate formula).

Whole milk (full-fat milk) is suitable as a main drink for most children from 12 months of age. Semi-skimmed milk can be introduced after the age of 2 years if children eat well.

Skimmed milk is not suitable as the main milk drink for children under 5 years of age.

Adults can have semi-skimmed or 1% fat milk or skimmed milk. These milks contain comparable nutrients to whole milk but less fat and saturated fat.

INFANT FORMULA

Cows’ milk based infant formula suitable from birth.

For infants who are not being breastfed, first infant formula can provide the nutrients necessary for proper growth and development.

Infant formula can never replicate breastmilk as it does not contain protective factors passed on by the mother, but it is the only alternative recommended in the first year of life.

Any other type of infant formula, follow-on formula, toddler milk or growing-up milk.

Where mums do not breastfeed, it is important that they receive independent advice on infant formula milks. For more on infant milks see page 74.

You can use Healthy Start food vouchers to buy plain cows’ milk. It can be whole milk, semi-skimmed, 1% fat or skimmed milk.

Whole milk is suitable as a main drink for most children from 12 months of age. Semi-skimmed milk can be introduced after the age of 2 years if children eat well. Adults can have either semi-skimmed, 1% fat or skimmed milk. Milk is used as an ingredient in several of the soup and pudding recipes, and other recipes, on pages 23-62.
Where can I use my Healthy Start food vouchers?

There is advice on the Healthy Start website [www.healthystart.nhs.uk](http://www.healthystart.nhs.uk) about where you can use your Healthy Start food vouchers. There is also advice on what to do if the shop, market or food delivery scheme where you do your food shopping does not accept Healthy Start food vouchers. On the website, there is an information sheet that you can download, print and give to your local shop manager to encourage them to register as a Healthy Start retailer. If you cannot do this, ask at your local library if they can make a copy of the form for you, or ask your health visitor or midwife if they can support you to do this.

Using Healthy Start food vouchers in markets, farmers’ markets, food co-ops and community food projects

Healthy Start food vouchers can be used in some street markets, farmers’ markets and in food co-ops or community food projects in many areas, and this can be a very good-value way of spending the vouchers. Local food projects often offer seasonal, fresh vegetables at lower prices and they frequently offer organic or locally sourced fruit and vegetables that provide employment in local areas. If you want to use your vouchers in one of these settings, talk to the market or project manager as they may not realise they can apply to register as a Healthy Start retailer.

To find out about farmers’ markets near you, see [www.farma.org.uk](http://www.farma.org.uk)

To find out about food co-ops in your area, see [www.sustainweb.org/foodcoops/finder/](http://www.sustainweb.org/foodcoops/finder/)

If you live in Wales

The Rural Regeneration Unit has been funded by the Welsh Government to create and sustain volunteer-run food co-ops in Wales. The food co-ops are linked to a local supplier, farmer, wholesaler or retailer and together they offer their customers bags of fresh fruit, vegetables and salad at a set price. It has been estimated that using a food co-op instead of a major supermarket can save a family around £220 a year just on their fruit and vegetable shopping. Most of these food co-ops accept Healthy Start food vouchers. For details see [www.foodcoopswales.org.uk](http://www.foodcoopswales.org.uk).
What could I buy with my Healthy Start food vouchers?

Healthy Start vouchers can be spent on milk, fresh or frozen fruit and vegetables, and fresh potatoes. Below are some examples of how you might spend your vouchers.

Kate, is mum to Alex who is 9 months old, and she gets two Healthy Start food vouchers a week, currently worth £6.20. Kate is still breastfeeding Alex as well as giving him three healthy meals a day. In a typical week she exchanges her vouchers for:

- 4.5 litres (8 pints) of semi-skimmed milk, so she can have a large glass of milk a day herself, and use milk in cooking
- A bag of seasonal fruit such as apples or pears
- 1kg frozen sweetcorn
- 2kg fresh potatoes
- 500g carrots

Total £6.20

Ayesha is mum to Lola who is 2 years old. She spends her £3.10 Healthy Start food voucher at her local fruit and vegetable market where she can usually buy:

- 1kg sweet potatoes
- 500g onions
- A large cauliflower
- A large mango

Total £3.10

Nia and Brian are parents to Ruby, 14 months, and Mason, 3 years. They exchange their weekly vouchers of £6.20 (£3.10 for each child) at the supermarket for:

- 4 pints (2.27 litres) of whole milk
- 2kg fresh potatoes
- 1kg fresh bananas
- 4 large oranges
- A punnet of tomatoes
- A 1kg bag of value frozen peas

Total £6.20

Sadie is 7 months pregnant with her first baby and gets £3.10 a week in Healthy Start food vouchers. She usually spends this on milk and fruit so she can make herself a fruit smoothie in the morning. For example, she can buy:

- 4 pints (2.27 litres) 1% fat milk
- 500g frozen fruit or berries

Total £3.10

Based on Tesco prices, 2017
Using Healthy Start food vouchers to support eating well

Eating well in pregnancy and as a new mum

A good diet in pregnancy provides the best start in life for all babies. Healthy Start has the potential to support women to eat a better diet in pregnancy and help families eat healthier meals. It is particularly important that teenage mums eat well to protect their own health as well as that of their baby. Healthy Start food vouchers can also help breastfeeding mums to eat well, and the value of the food vouchers doubles in the first year of a baby’s life so that mums can buy vegetables, fruit and cows’ milk for themselves and their families while breastfeeding.

For more information about eating well in pregnancy, teenage pregnancy and as a new mum, see the resources below. They are all available at www.firststepsnutrition.org

Eating well in the first year of life

It is also important to ensure that infants are supported to eat well once solids are introduced alongside breastmilk (or infant formula) at about 6 months of age. Families who are eligible for Healthy Start food vouchers can use these to buy vegetables and fruit to support complementary feeding. Breastfeeding is recommended throughout the first year, but if mums want to carry on into the second year and beyond, that will contribute to infant and maternal health and should be fully supported. For more information on how to use fruits and vegetables when introducing solids, see page 63.

Our resource Eating well: the first year can be accessed at www.firststepsnutrition.org
Eating well in the pre-school years

Children aged 1-4 years are also supported with Healthy Start food vouchers. It is increasingly recognised that these pre-school years are important in determining later food choices and eating patterns. Increasing the amount of fruit and vegetables that young children eat is seen as a priority to reduce overweight, improve oral health and establish better eating habits.

For more information about eating well in the pre-school years, see the resources below, which are available at www.firststepsnutrition.org

Using Healthy Start food vouchers for family meals

Healthy Start food vouchers can support everyone in the family to eat well. The recipes in this guide have also been produced in an Eating well recipe book that can be used to support all families. Healthy Start food vouchers can be used to buy plain fresh and frozen vegetables and fruit, potatoes and other starchy foods, and cows’ milk, all of which are useful in the preparation of simple and nutritious family meals.

This recipe book is available at www.firststepsnutrition.org
**Healthy Start is about vitamins too**

The Healthy Start scheme also provides families with free vitamins for eligible women when they are pregnant and when they have a baby under 1 year of age, and for children aged up to 4 years.

### What do Healthy Start vitamins contain?

#### Healthy Start vitamins for women

<table>
<thead>
<tr>
<th>Vitamin</th>
<th>Amount</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Folic acid</strong></td>
<td>400 micrograms</td>
<td>Reduces the chance of the baby having spina bifida, a birth defect where the spine doesn’t form properly, and a type of anaemia in later pregnancy.</td>
</tr>
<tr>
<td><strong>Vitamin C</strong></td>
<td>70 mg</td>
<td>Helps maintain healthy tissue in the body.</td>
</tr>
<tr>
<td><strong>Vitamin D</strong></td>
<td>10 micrograms</td>
<td>Helps the body to absorb calcium and so supports mum’s bone health, as well as helping the baby’s bones to develop properly.</td>
</tr>
</tbody>
</table>

#### Healthy Start children’s vitamin drops

<td>20 mg</td>
<td>Helps maintain healthy tissue in the body.</td>
</tr>
<tr>
<td><strong>Vitamin D</strong></td>
<td>7.5 micrograms</td>
<td>For strong bones and teeth.</td>
</tr>
</tbody>
</table>

**Pregnant women**

It is currently recommended that all pregnant women take folic acid as soon as they start to plan a family, or as soon as they think they might be pregnant, and vitamin D as soon as they think they are pregnant. Healthy Start vitamins for pregnant women contain the right amount of folic acid and vitamin D that are recommended during pregnancy. However, pregnant women cannot apply for Healthy Start until they are 10 weeks pregnant and should therefore be encouraged to take folic acid from when they plan a pregnancy, or as soon as they find out they are pregnant. If a pregnant woman takes any other supplement, she should check with a midwife or GP that it is safe to take it. If women have been prescribed iron supplements, they can take these alongside Healthy Start vitamins.

**New mums**

All new mums should take Healthy Start vitamins, both to support their own nutritional status (which is particularly important if they plan to have another pregnancy in the next two years), and to ensure that they have sufficient vitamin D to protect their own bone health, and to replenish stores used up during pregnancy and/or breastfeeding.

**Children**

It is recommended that breastfed babies are now given 8.5-10 micrograms of vitamin A...
D a day from birth. The Healthy Start vitamin supplement for infants and young children currently contains vitamins A and C, and 7.5 micrograms of vitamin D. This is still an effective and appropriate dose of vitamin D for children until products containing the new recommended amount are available. The children’s drops can be given from 1 month of age. (Previously, vitamin drops were recommended for breastfed babies from 6 months of age, and for formula-fed infants when they are having less than 500ml of infant formula a day.) In 2018/2019, Healthy Start children’s vitamins will be reformulated to include 10 micrograms of vitamin D, and to be suitable for use from birth (see below). It is important to remember that in different areas the advised use of Healthy Start vitamins currently varies, so make sure you know the policy in your local area. In some areas, Healthy Start children’s drops are available to all families regardless of whether they are registered with the scheme. And in some areas they are provided universally in pregnancy, but not postnatally.

It is particularly important to encourage mums who are breastfeeding to take vitamin D, and for them to give a supplement to their babies if mum did not take vitamin D in pregnancy and she is considered at risk of low vitamin status (for example, because of lack of sun exposure), or if her vitamin D status has been measured and found to be low.

All children aged 1-4 years should be given children’s vitamin drops as a nutritional safety net, and this has been recommended in the UK for over 60 years.

**How to get the Healthy Start vitamins**

Vitamin vouchers are sent with the Healthy Start food vouchers every eight weeks. Vitamins should be available from health visitors, some children’s centres or family centres, and also in some pharmacies. Eligible families can enter their postcode on the Healthy Start website to find out where they can use their vouchers.

---

**How Healthy Start vitamins will change in 2018/2019**

Following new government recommendations which advise that all infants who are breastfed from birth should receive 8.5-10 micrograms of vitamin D a day as a precautionary measure, Healthy Start vitamins will be reformulated to provide 10 micrograms of vitamin D. From 2018/2019, the vitamins will also be made available as suitable from birth, and vitamin vouchers will be provided from birth for breastfed babies. The composition of Healthy Start vitamins for pregnant and breastfeeding mums will not change.
How can health professionals support families to take up the benefit?

Health professionals sign the Healthy Start forms to confirm that someone is at least 10 weeks pregnant or has a child aged 1-4 years, but they are not gatekeepers to eligibility. The Department of Work and Pensions decides who is eligible. To improve uptake, health professionals could give all women a signed form at the appropriate time and offer support to complete the form where this might be needed. GPs may be the first point of contact for pregnant women and should also encourage take-up of Healthy Start vouchers in pregnancy. Information about the Healthy Start scheme should be available in all health and social care settings that pregnant women and young families may visit, and the local Healthy Start coordinator should set a specific target for uptake in each area. We suggest that areas should aim for 80% uptake as a minimum among eligible families.

If families are on Universal Credit and have changes in income, how does this impact on their eligibility?

Entitlement to vouchers among eligible families will stop if earnings are above the £408 Universal Credit threshold, allowing an 8-week period of grace from this date before the vouchers stop. If Healthy Start entitlement lapses for more than three calendar months (90 days) because the family continues to be over the income threshold, the family would need to reapply if their income then drops again. If entitlement stops, but restarts within the 90 days since the last vouchers, the claimant will not need to reapply. This may be a particular issue in areas where work is seasonal, and it is important that health professionals remind families to reapply if they are affected by these rules.
If families choose to spend their food vouchers on infant formula, how can they be supported to do this safely?

All infant formula marketed in the UK must meet the same compositional requirements, and there is no benefit in choosing a more expensive product over a cheaper one. You can find out more about the different types of infant formula on the UK market, their ingredients and their costs at [http://www.firststepsnutrition.org/pdfs/Infant_formula-an-overview_February2017.pdf](http://www.firststepsnutrition.org/pdfs/Infant_formula-an-overview_February2017.pdf)

Powdered infant formula is not sterile and it is important that families know how to make up and store milks safely. Information can be accessed at [https://www.unicef.org.uk/babyfriendly/baby-friendly-resources/leaflets-and-posters/guide-to-bottle-feeding/](https://www.unicef.org.uk/babyfriendly/baby-friendly-resources/leaflets-and-posters/guide-to-bottle-feeding/)

Does Healthy Start work the same in England, Scotland, Northern Ireland and Wales?

Healthy Start in England, Northern Ireland and Wales is managed centrally, but there are some differences in how the scheme works. Scotland will administer the scheme separately from 2017 and are planning changes to how the scheme works.

If families are not eligible for Healthy Start vitamin vouchers can they still buy the vitamins if they want them?

Healthy Start vitamins can be purchased from pharmacies or dispensing chemists, but might have to be ordered.
About the recipes in this guide

Planning to cook family meals from scratch can help families eat well and keep food costs down. All the recipes in this guide are designed for busy families. The recipes are cost-effective, healthy and delicious. And you don’t need lots of equipment or lots of cooking experience to make them.

Each recipe in this guide has photos of portion sizes for adults and for children of different ages, and a guide price for each recipe. We have made all the recipes in this guide to check they work and taste good.

Need to brush-up on your cooking skills?

Contact your local council to find out if there is a community cooking class you could go to. This might be at a local college or community centre, for example.

Ask at the nearest children’s centre, or check with your midwife or health visitor for details of local cooking groups for families.

Lots of schools also offer cooking classes. Check out www.letsgetcooking.org.uk for more information.

Portion sizes

Families come in all different sizes. Each recipe in this guide makes enough for four adult portions, but you can make half the amount, or twice the amount, depending on the size of your family. For example:

- If there is one adult and two children under 5 in your family, each recipe will make enough for two meals. Or you can halve the recipe to make just one meal for you all.
- If there are two adults and two teenagers, each recipe will make enough for one meal for you all.
- If there are four adults, two teenagers and three primary school aged children in a family, the recipe can be doubled to feed everyone at one meal.

The photos with each recipe indicate what an appropriate portion size looks like for children of different ages, so you can judge how to make sure everyone gets what they need. These portion sizes are just estimates and children will have different sized appetites depending on how active they are, and how much they are growing. Boys need to eat a bit more than girls as they are generally heavier and have more muscle mass, and teenage boys will frequently need to eat bigger portions than adult men as they are growing rapidly. Pregnant women don’t need to eat more than usual, except in the last three months of their pregnancy. Breastfeeding mums need a little bit of extra energy every day. A detailed summary of how energy needs vary by age and gender, and during pregnancy, can be found on page 72.

We have used different sized and coloured plates to indicate what appropriate portions look like for different family members. See the next page for scale photos of the plates used. We have simplified the different portion sizes to give four different examples per recipe.
Plates used in the photos

Next to each recipe are photos of four plates:

- **Yellow plate**
  - 25cm
  - Average portion for an adult, or teenager aged 12-18 years

- **Green plate**
  - 25cm
  - Average portion for a 5-11 year old

- **Blue plate**
  - 20cm
  - Average portion for a 1-4 year old

- **Red bowl**
  - 13cm
  - Average portion for a 7-12 month old

Price guide

We estimated the price of foods using data from mysupermarket.co.uk and supermarket receipts. We used value range and supermarket brand products where possible – always choosing the best value items (but not including special offers and ‘buy one get one free’ offers).

At the top of each recipe page there is a circle with either one, two or three £ symbols, to show how much it costs to make the recipe:

- **£**
  - Cost to make 4 adult portions = Less than £2
  - = less than 50p per portion

- **££**
  - Cost to make 4 adult portions = £2 to £3.50
  - = 50p to 90p per portion

- **£££**
  - Cost to make 4 adult portions = £3.50 to £5
  - = 90p to £1.25 per portion

Equipment

The recipes in this guide do not require a lot of equipment. Many of them are one-pot meals that simply require a knife and chopping board, a spoon and a medium saucepan. It is worth investing in these simple pieces of cookery equipment as you will save lots of money if you can cook your own food rather than relying on ready-prepared foods.
Tips for keeping food shopping costs down

- **Cook from scratch.** Making meals from scratch is cheaper and healthier than buying ready-made meals, which also often have a lot of unnecessary sugar, salt and preservatives added. Remember that food manufacturers and retailers are making a profit on even the cheapest ready meals.

- **Buy own-brand goods.** The quality is generally the same as popular brands. The only real difference is the price.

- **Buy saver versions of some food items.** Saver canned vegetables – like canned tomatoes or beans, saver frozen vegetables, dried pasta and rice, saver cheese or yoghurt – are often good choices. Avoid saver versions of meat products like sausages or burgers, as these are likely to be low in meat content and high in fat and salt.

- **Keep food fresh.** Store fresh vegetables in the fridge if possible. They will last longer and you will throw less away.

- **Cut down the amount of meat bought.** Use less meat in dishes by adding more vegetables, as well as peas and beans (such as chickpeas, lentils or red kidney beans) to add extra protein.

- **Get the best deals on fruit and veg.** Find out if there is a food co-op or a fruit and veg scheme in your area that accepts Healthy Start food vouchers. These types of projects often sell quality fruit and vegetables at a lower price to help people in their communities access affordable fresh food.

- **Stick to the list!** Shopping costs can get out of control quickly if you don’t have a plan or shopping list. If you plan your meals across the week, you won’t buy food that gets wasted.

- **Compare prices and know how much you can spend.** There are lots of websites where you can compare the cost of food at different supermarkets – for example, www.mysupermarket.co.uk

- **Beware of offers.** Only buy offers such as ‘buy one get one free’ if you are certain you will eat both or are able to share the extra one with a friend.

- **Choose your fruit and vegetables carefully.** Don’t buy fruit and vegetables that are overly ripe unless you are sure that you will use them quickly.

- **Buy frozen fruits and vegetables if you have a freezer or will use them on the day you buy them.** It’s often cheaper to buy frozen fruits and vegetables. They contain the same minerals and nutrients as fresh ones, need no preparation and, if you can store them, they are often the cheapest way of adding vegetables to dishes.

- **Avoid pre-cut, pre-peeled and packaged vegetables and fruits.** They are more expensive than buying loose fruits and vegetables and lose nutrients as soon as they are opened.
Eating sustainable food

Sustainable food choices and low-cost food choices have a lot in common, as often the cheaper option is also more sustainable. Eating more sustainable food is an important aspect of providing better food for all. The food we eat not only has an impact on our health, but also on the health of the planet. For example, buying loose fruits and vegetables instead of pre-packaged is more sustainable as there is less packaging, and it is also generally the cheaper option.

So, as well as having a positive effect on your family’s health by buying fruits and vegetables with Healthy Start, you can also have a positive impact on the health of the planet by making smart, low-cost, sustainable choices. Four simple ways of eating a more sustainable diet are to:

- Eat seasonal foods where possible (see the Buying fruit and vegetables in season on page 76).
- Reduce food and packaging waste.
- Try to cook from scratch where possible.
- Reduce the amount of meat and meat products consumed.

For more information on sustainable diets, see www.sustainweb.org.

Good hygiene and food safety

- Always wash your hands with soap and water before preparing food or helping children to eat, and after changing nappies, toileting children, blowing your nose or sneezing into a tissue, or playing with pets.
- Children’s hands should always be washed with soap and water before meals and snacks, and after going to the toilet.
- Never leave children under 5 alone while they are eating in case they choke. If children are in a high chair, always strap them in.

The most important things to remember when preparing, cooking or storing foods are:

- All fruit and vegetables to be eaten uncooked need to be washed thoroughly.
- Follow instructions on food to store it safely and always eat foods before the ‘best before’ date.
- Always keep cooked meat and raw meat apart and make sure they are well covered and cannot cross-contaminate each other.
- Cook foods such as pork, burgers, sausages, kebabs and poultry such as chicken and turkey thoroughly before eating.
- If previously cooked foods are re-heated, make sure they are heated to piping hot in the middle.

For more information on food safety, see www.food.gov.uk
Recipes

General tips for using the recipes in this guide to feed the family

- Salt and other flavourings
  If you’re using the same recipe to feed all the family, including children under 5 years and infants, make sure that salt or any other seasonings such as soy sauce, stock powder, chilli sauce, jerk seasoning or other flavouring powders and sauces are added to the dish after a portion has been taken out for the younger family members, as babies and small children have immature kidneys that can’t cope with added salt.

- Bouillon powder
  We use bouillon powder in recipes to add both salt and vegetable stock flavour. You can also use low-salt stock cubes. Bouillon powder can be bought in tubs and a tub will last a long time as it is used sparingly. You can also get vegetarian and vegan versions of bouillon if you are serving people who avoid animal products. 1 teaspoon of bouillon powder contains the same amount of salt as half a teaspoon of salt. Use half a teaspoon of salt in place of 1 teaspoon of bouillon powder, or use none at all if you are happy with a lower salt taste. If you are serving infants or young children do not add bouillon powder or salt until you have taken out a portion for them.

- Herbs
  We suggest using dried mixed herbs in some of the savoury recipes, as they add flavour and colour to a range of dishes. They are cheap to buy and they store well, so you don’t need to buy them very often. If you have fresh herbs growing in a window box or in the garden, use those instead. 1 tablespoon of freshly chopped herbs is equivalent to 1 teaspoon of dried herbs.

- Garlic
  Some of the recipes suggest using garlic paste or a crushed clove of fresh garlic. You can buy crushed garlic in tubes or tubs and this will have a long shelf-life and might be easier to manage than fresh garlic which needs to be bought regularly. Fresh garlic needs to be peeled and then chopped finely, or pushed through a garlic crusher if you have one, or smashed with the back of a wooden spoon.

- Fish
  If you’re using fresh or frozen fish, make sure all the bones have been removed before serving, especially if you’re serving young children or older relatives or friends.
A warm bowl of soup with bread can be a tasty, hearty meal for everyone in the family. Soup is a great way of getting lots of vegetables into one meal and for using up vegetables that may be reaching the end of their life, but you can also make soups easily from store cupboard ingredients. Soups can be made smooth or chunky and, depending on the other ingredients, can have milk or water added as liquid.

Some example soup recipes are shown on the following pages. These show the amount of soup and bread that provide enough energy (calories) for a main meal for different age groups.

We give some more ideas for soups below. You could also find a book of soup recipes in your local library, or search the internet for cheap and easy soup recipes. Or look at the combinations of ingredients that are used in supermarket soups and then recreate your own at home.

**Basic recipe for making a vegetable soup**

1. Heat a small amount of oil in a saucepan and add some chopped onion. Fry for 1 minute.
2. Add the chopped vegetables, potatoes, beans or other ingredients that are being used and fry for another 2 minutes.
3. Add vegetable stock or water and simmer for 10 minutes.
4. Either serve as it is, or mash, sieve or liquidise the soup.

To make the texture of a soup smooth:
- use a potato masher once all the cooked ingredients are soft, or
- pass the soup through a sieve, or
- use a hand-held blender or food processor if you have one.

You can add milk to some soups to make them ‘cream of’. And you can flavour soups with lots of different herbs or spices.

**Ideas for soups**

- Black-eyed bean and vegetable
- Butternut squash and carrot
- Callaloo with coconut
- Carrot and coriander
- Carrot and orange
- Chickpea and spinach
- Cream of celeriac
- Cream of celery
- French onion soup
- Green pea, lettuce and mint
- Lentil and tomato with cumin
- Mushroom and butter bean with parsley
- Pumpkin
- Spinach and potato
- Split pea and leek
- Sweet potato chowder
- Tomato and summer vegetables
Chicken and sweetcorn soup

1 tablespoon vegetable oil
1 medium onion, peeled and diced
1 level teaspoon bouillon powder
1 medium potato, washed and diced (skin can be left on)
200g cooked chicken, diced
200g frozen sweetcorn
1 teaspoon dried mixed herbs or 1 tablespoon fresh parsley, finely chopped
500ml water
500ml semi-skimmed milk

This recipe makes 4 adult-sized portions.

1. Heat the oil in a large pan and fry the diced onion with the bouillon powder for a few minutes, stirring all the time, until it softens.

2. Add all the other ingredients except the milk, bring to the boil, and simmer for about 15 to 20 minutes.

3. Add the milk and re-heat.

For babies

If serving this soup to a baby:
• don’t add the bouillon powder until after you have taken out the baby’s portion
• chop the meat finely, and
• allow the soup to cool before serving.
Easy minestrone soup

50g small pasta pieces or pasta for soup
500g carton of passata or 1 large can (400g) chopped tomatoes
350g frozen mixed vegetables
2 tablespoons vegetable oil
1 teaspoon bouillon powder
1 teaspoon dried mixed herbs or 1 tablespoon fresh parsley, finely chopped
800ml water

This recipe makes 4 adult-sized portions.

1. Add all the ingredients to a large pan.
2. Bring to the boil stirring occasionally so the pasta doesn’t stick to the bottom.
3. Turn the heat down and simmer for about 15 to 20 minutes until the pasta is cooked.
4. Stir well before serving.

For babies

If serving this soup to a baby:
• don’t add the bouillon powder until after you have taken out the baby’s portion
• make sure the vegetables and pasta are finely chopped, and
• allow the soup to cool before serving.

Freezing soup

• Soup is ideal for freezing. Once it has cooled down to room temperature, pop it into a plastic box or freezer bag, make sure it is securely fastened and keep it in the freezer until you need it. Having a home-made meal you have put in the freezer is the same as having a frozen ready meal – but without the high cost or added salt, fat and sugar!
Leek, potato and pea soup

1 1/2 tablespoons vegetable oil
2-3 large leeks, washed and sliced (about 250g prepared weight)
2 large potatoes, washed and diced, skin on (about 400g prepared weight)
400ml water
1 teaspoon bouillon powder
1 teaspoon dried mixed herbs or 1 tablespoon fresh parsley, finely chopped
600ml semi-skimmed milk
200g frozen peas

This recipe makes 4 adult-sized portions.

1. Heat the oil in a large pan, add the leeks and potatoes, and cook for about 5 minutes.

2. Add the water, bouillon powder and herbs and simmer until the vegetables are soft.

3. Add the milk and peas and heat through until the peas are cooked.

4. Sieve, mash or blend the soup (or leave it as it is).

For babies

If serving this soup to a baby:
- don’t add the bouillon powder until after you have taken out the baby’s portion, and
- allow the soup to cool before serving.
Lentil and carrot soup

2 tablespoons vegetable oil
1 teaspoon garlic paste or 1 clove garlic, crushed
1 teaspoon bouillon powder
3-4 large carrots, peeled and diced (about 350g prepared weight)
165g dried red lentils
1 litre water (1,000ml)

This recipe makes 4 adult-sized portions.

1. Heat the oil in a large pan, add the garlic, bouillon powder and carrots, and fry gently, stirring regularly, for 5 minutes.

2. Add the lentils and water and bring to the boil, stirring occasionally.

3. Simmer for about 20 minutes until the lentils are soft.

4. Either serve the soup as it is, with chunks, or mash, sieve or blend to make a smooth soup or if serving it to a baby.

For babies

If serving this soup to a baby:
• don’t add the bouillon powder until after you have taken out the baby’s portion
• allow the soup to cool before serving.

Tips

• Instead of carrots you could also make this soup with sweet potato, parsnip, butternut squash or a combination of root vegetables.

Price guide (at 2017 prices)
£ = less than 50p per portion
Jacket potatoes

Jacket potatoes with fillings make a quick, tasty and nutritious meal.

Cooking jacket potatoes

There are different ways of cooking jacket potatoes. You can cook them in a microwave oven, a regular oven or a combination of the two.

- To cook in a microwave oven, prick the potatoes with a fork and microwave each one for 6 to 8 minutes or until tender. If you cook four large potatoes at one time, the cooking time will be four times as long (so about half an hour). Microwave ovens use less heat and energy than conventional ovens.

- To cook in an oven, prick the potatoes with a fork and place in a hot oven for 40 minutes or until tender. Cooking in the oven is the most expensive method of cooking.

- If you want to crisp the potato skin without using the energy it takes to cook in the oven, cook for 5 minutes in the microwave and finish off in a hot oven for 10 minutes.

The recipes on pages 29-32 are designed for 4 large jacket potatoes or for a combination of large and small jacket potatoes, depending on who the meal is for. You can either cut large potatoes in half or quarters or bake smaller potatoes as needed.

We based our recipes on potato weights of:
- Adults and teenagers – 250g
- Children 5-11 years – 180g
- Children 1-4 years – 100g
- Infants 7-12 months – 60g

Encourage everyone to eat the potato and its skin, as the skin is high in fibre and other nutrients. Chop the skin well before serving it to a baby.

There is no need to add butter or fat spread to the potato if you are using a moist or soft filling.

Some example fillings are given on the following pages and there are more ideas opposite. Many of the pasta sauces or pie fillings in this book would make useful jacket potato fillings too (see pages 48 and 33).

Ideas for fillings for jacket potatoes

Baked beans
Baked beans with a few drops of chilli sauce
Chilli con carne
Cottage cheese with chopped pineapple
Grated cheese and chopped fresh tomato
Canned mixed bean salad
Houmous and green leaves
Low-fat soft cheese with apple chunks
Mashed tuna with kidney beans and salsa
Mozzarella, chopped tomato and basil
Plain yoghurt mixed with coriander, chopped cucumber and spring onion
Roasted peppers
Scrambled egg with chopped tomatoes and red pepper
Tomato salsa with olives and feta cheese
Tuna and sweetcorn mayonnaise
Jacket potato with beef stir-fry

4 large jacket potatoes (or equivalent), cooked (see page 28 for how to cook them)

For the filling:
1 1/2 tablespoons vegetable oil
1 large onion, peeled and sliced
200g lean beef, cut into strips
1 large carrot, peeled and sliced into thin sticks
1 large courgette, washed, topped and tailed and sliced into thin sticks
1 red pepper, cored and seeds removed and cut into slices
3 tablespoons soy sauce

This recipe makes 4 adult-sized portions.

1. Heat the oil in a large pan, add the sliced onion and beef strips and fry, stirring all the time, until the meat is browned.

2. Add the carrot, courgette and red pepper and stir-fry over a high heat until the vegetables are softening and the meat is cooked.

3. Add the soy sauce and mix well (if serving to babies and children under 5, don’t add any soy sauce to their portion), and serve over the cooked jacket potatoes.

For babies
If serving this to a baby:
• chop the meat finely
• mash the potato and filling together, and
• allow to cool before serving.
Jacket potato with scrambled egg and spinach

4 large jacket potatoes (or equivalent), cooked (see page 28 for how to cook them)

For the filling:
25g vegetable fat spread
250g frozen spinach
5 large eggs, beaten

This recipe makes 4 adult-sized portions.

1. Melt the fat spread in a pan, add the frozen spinach and cook until defrosted and softened.

2. Add the beaten eggs and cook, stirring constantly, until the eggs and spinach are mixed and the egg is cooked.

For babies

If serving this meal to a baby:
• mash the potato and filling together, and
• allow to cool before serving.

Tips

• It is always a good idea to serve some extra vegetables with dishes and carrots provide a good colour contrast.
Jacket potato with tuna, sweetcorn and soft cheese

4 large jacket potatoes (or equivalent), cooked (see page 28 for how to cook them)

*For the filling:*
- 200g frozen sweetcorn
- 1 can tuna fish in brine, drained (drained weight 130g)
- 200g low-fat soft cheese
- 3 or 4 spring onions, diced

This recipe makes 4 adult-sized portions.

1. Place the sweetcorn in boiling water, bring to the boil, and then drain and rinse.

2. Mix all the ingredients together in a bowl and serve immediately over hot cooked jacket potatoes.

*For babies*

If serving this meal to a baby:
- mash the potato and filling together, and
- allow to cool before serving.
Jacket potato with vegetable chilli

4 large jacket potatoes (or equivalent), cooked (see page 28 for how to cook them)

For the filling:
1 1/2 tablespoons vegetable oil
1 small onion, peeled and diced
1 teaspoon bouillon powder
1 red pepper, de-seeded and diced
2 large tomatoes, diced
1 large can (400g) red kidney beans (use the beans and the water they are in)
1 teaspoon chilli powder
1 teaspoon dried mixed herbs

This recipe makes 4 adult-sized portions.

1. Heat the oil in a large pan, add the diced onions and bouillon powder and fry, stirring all the time, until the onions soften.

2. Add all the other ingredients and simmer gently, stirring regularly, for about 10 minutes until all the vegetables are soft.

For babies

If serving this meal to a baby:
• don’t add the bouillon powder until after you have taken out the baby’s portion
• mash the filling well and then mix the potato and filling together, and
• allow to cool before serving.
Potato-topped pies

Savoury pies are a family favourite in homes across the UK. Using mashed potato instead of pastry is much healthier and quicker, and you can buy potatoes with your Healthy Start food vouchers. For even more nutritional benefits and to save time and money, keep the skins on the potato.

We give four recipes for potato-topped pies on the following pages. Below is the recipe for making the mashed potato for them.

Mashed potato pie top

1. Bring a saucepan of water to the boil.
2. Peel the potatoes and cut into cubes. Or just wash the whole potatoes and cut them into cubes.
3. Add the potato pieces to the boiling water and cook for about 10 to 15 minutes or until the potato is tender.
4. Drain the potatoes well.
5. Add about a tablespoon of milk for each person you are serving, and mash to make a chunky or smooth potato depending on how your family likes it.

Ideas for fillings

You can top all sorts of pies with mashed potato. Traditionally people use potato as a topping for shepherd’s pie (made with lamb), shepherdess pie (made with vegetables), cottage pie (made with beef) or fish pie (made with any white or oily fish), but you can make up all sorts of filling combinations. Some recipes for potato-topped pies are given on the next pages.

Ideas for flavouring the mashed potato pie tops

You can make mashed potato pie tops more interesting by adding extra flavours to the mashed potato – for example, garlic, chopped herbs or dried mixed herbs, mustard, horseradish, chives or paprika.
Chicken and mushroom pie

1.4kg (1,400g) potatoes, washed and diced, or peeled and diced
100ml semi-skimmed milk
1 tablespoon vegetable oil
1 small onion, peeled and diced
250g mushrooms, diced
300g cooked chicken, cut into dice or chunks
20g cornflour
2 tablespoons water
200g low-fat soft cheese

This recipe makes 4 adult-sized portions.

1. Boil the potatoes in water for about 15 minutes until tender. Drain well. Add the semi-skimmed milk and mash to a desired consistency.

2. In a large pan, heat the vegetable oil and fry the diced onion for several minutes to soften.

3. Add the diced mushrooms and chicken and cook for 5 minutes to soften the mushrooms.

4. Blend the cornflour with 2 tablespoons of water to make a smooth paste and add to the mixture, stirring. Bring to the boil and cook for a few minutes to thicken the mixture. Add the soft cheese and stir well.

5. Place the chicken and mushroom filling into an ovenproof dish and top with the mashed potato. If the potato and filling are both still hot, just grill the top of the pie before serving. Otherwise heat the pie through in a hot oven (180°C /350°F/ Gas 4) for about 10 to 15 minutes.

For babies

• If serving this pie to a baby, chop the chicken finely, mash the pie well, and cool before serving.
Fish pie

1.4kg (1,400g) potatoes washed and diced or peeled and diced
100ml semi-skimmed milk
350g frozen white fish fillets
30g vegetable fat spread
200ml semi-skimmed milk
30g cornflour
2 tablespoons water
150g frozen sweetcorn
1/2 teaspoon black pepper

This recipe makes 4 adult-sized portions.

1. Boil the potatoes in water for about 15 minutes until soft. Drain and mix with the first quantity of semi-skimmed milk, mashing to a desired consistency.

2. Place the frozen fish fillets in a dish and either microwave gently for about 5 minutes to cook them, or place them between two heatproof plates over the pan of boiling water cooking the potatoes. (The heat from the steam will cook the fish.) Flake the fish, making sure that there are no bones remaining.

3. In a separate pan, heat the fat spread and add the remaining milk. Blend the cornflour with 2 tablespoons water and add this to the mixture. Bring to the boil and cook for a few minutes until it thickens. Turn off the heat and add the fish, sweetcorn and black pepper.

4. Place the fish mixture in a bowl and top with the mashed potato.

5. If the potato and filling are both still hot, you can just grill the top of the pie before serving. Otherwise heat the pie through in a hot oven (180°C / 350°F / Gas 4) for about 10 to 15 minutes.

For babies

- If serving this pie to a baby, make sure there are no bones in the fish, mash the pie well, and cool before serving.
**Mediterranean pie**

1.4kg (1,400g) potatoes, washed and diced, or peeled and diced
100ml semi-skimmed milk
2 tablespoons vegetable oil
1 small onion, peeled and diced
1 teaspoon garlic paste or 1 clove garlic, crushed
1 teaspoon bouillon powder
1 red pepper, washed, de-seeded and sliced
1 courgette, washed, topped and tailed and cut into cubes
1 large can (400g) chickpeas, drained and rinsed (drained weight 240g)
1 large can (400g) chopped tomatoes
1 teaspoon dried mixed herbs
40g sunflower seeds

*This recipe makes 4 adult-sized portions.*

1. Boil the potatoes in water for about 15 minutes until soft. Drain and mix with the semi-skimmed milk, mashing to a desired consistency.

2. In a large pan, heat the vegetable oil and add the onion, garlic and bouillon powder. Fry gently, stirring, until the onion softens.

3. Add the red pepper, courgette, chickpeas, tomatoes and dried mixed herbs. Simmer until all the vegetables are soft.

4. Put the vegetable mixture in an ovenproof bowl and top with the mashed potato. Sprinkle sunflower seeds on the top.

5. If the potato and filling are both still hot, you can just grill the top of the pie before serving. Otherwise heat the pie through in a hot oven (180°C / 350°F / Gas 4) for about 10 to 15 minutes.

---

**For babies**

- If serving this pie to a baby, don’t add the bouillon powder until after you have taken out the baby’s portion. Mash the pie well, and allow it to cool before serving.
Shepherdess pie

1.4kg (1,400g) old potatoes, washed and diced, or peeled and diced
100ml semi-skimmed milk
2 tablespoons vegetable oil
1 small onion, peeled and diced
1 teaspoon garlic paste or 1 clove garlic, crushed
1 teaspoon bouillon powder
250g ready-to-eat vegetarian mince, or reconstituted dried vegetarian mince
1 carrot, peeled and diced
1 teaspoon dried mixed herbs
1 large can (400g) chopped tomatoes
200ml water
40g grated Cheddar cheese

1. Boil the potatoes in water for about 15 minutes until soft. Drain and mix with the semi-skimmed milk, mashing to a desired consistency.

2. Heat the oil in a large pan, add the onion, garlic and bouillon powder and fry for a few minutes until the onion softens.

3. Add all the other ingredients except for the cheese, and simmer the mixture for about 15 minutes until the vegetables are all soft.

4. Place the mixture in a heatproof dish, top with the mashed potato and sprinkle with the grated cheese.

5. If the potato and filling are both still hot, you can just grill the top of the pie before serving. Otherwise heat the pie through in a hot oven (180°C / 350°F / Gas 4) for about 10 to 15 minutes.

For babies

- If serving this pie to a baby, don’t add the bouillon powder until after you have taken out the baby’s portion. Mash the pie well, and allow it to cool before serving.
Stews and hotpots

From Hungarian goulash to Mexican chilli – stews are popular across the globe. Stews are a great way of getting lots of vegetables into a one-pot meal and they can be prepared in advance.

Stewing basically means cooking ingredients in liquid, slowly and gently. The slow and gentle cooking method makes tougher cuts of meat a perfect choice for stews. Meat becomes tender and flavourful after stewing. Using less expensive cuts of meat such as shoulder of lamb, beef skirt or brisket, chicken thighs or pork hock is a great way to stay within your food-shopping budget and a butcher will be able to advise you on good cuts for stewing.

You’ll see, from the examples of recipes on the following pages, that recipes with meat in them are more expensive than the meat-free options. Plenty of stews use different kinds of beans rather than meat as the main source of protein. Bean-based stews can be a tasty, cost-effective alternative to meat-based stews and they’re just as nutritious. The easiest way to buy most beans is canned, as cooking them from dried can be time-consuming and use a lot of gas or electricity unless you have a pressure cooker to cook them more quickly. You can add lentils and split peas without soaking or cooking them first, as they will cook while the stew is cooking.

Beans that can be added to stews

All of these beans make great additions to stews:
- Aduki beans
- Black beans
- Black-eyed peas
- Butter beans
- Cannellini beans
- Edamame beans (You can buy these frozen with your Healthy Start food vouchers.)
- Kidney beans
- Lentils (red or green)
- Low-salt and low-sugar baked beans
- Pinto beans
- Split peas

Four top tips for cooking stews

- Make sure ingredients are cut into similar-sized pieces to ensure even cooking.
- Stir occasionally to make sure the ingredients don’t stick to the bottom.
- Cook over a medium or low heat to make the ingredients tender and the flavours blend.
- Keep the lid on when stewing so that liquid does not evaporate.
African sweet potato stew

1½ tablespoons vegetable oil
1 small onion, peeled and diced
1 red pepper, de-seeded and diced
450g sweet potato, peeled and diced
75g frozen green beans
1 large can (400g) chopped tomatoes
1 large can (400g) red kidney beans, drained and rinsed (drained weight 240g)
2 heaped tablespoons (85g) smooth peanut butter
1 teaspoon chilli powder
300ml water
1 teaspoon freshly chopped herbs such as coriander or parsley (optional)

This recipe makes 4 adult-sized portions.

1. Heat the oil in a large pan and fry the onions until they start to soften.
2. Add all the other ingredients and bring to the boil, stirring well. If you are serving children under 5 with this recipe, you can add the chilli powder after cooking, after the children’s portions have been put on one side.
3. Simmer for about 20 minutes until the vegetables are soft.
4. Sprinkle with the fresh herbs before serving.

For babies

- Mash well and cool before serving to babies.

SUGGESTED PORTION SIZES

Adult / teenager aged 12-18

5-11 year old

1-4 year old

7-12 month old

££

Price guide (at 2017 prices) = 50p to 90p per portion
Baked bean and veggie sausage hotpot

1 1/2 tablespoons vegetable oil
1 small onion, peeled and diced
1 teaspoon garlic paste or 1 clove garlic, crushed
1 large potato, washed and cubed
3 carrots, peeled and diced
4 vegetarian sausages, each cut into 4 pieces
1 large can (400g) chopped tomatoes
1 large can (400g) reduced-salt, reduced-sugar baked beans
200g frozen peas
350ml water

This recipe makes 4 adult-sized portions.

1. Heat the oil in a large pan and fry the onion and garlic until the onion starts to soften.
2. Add all the other ingredients to the pan and stir well. Bring to the boil and simmer gently for about 15 minutes until the vegetables are cooked.

For babies

- If serving this meal to a baby, mash well and allow to cool before serving.
Creamy chicken and leek hotpot

2 tablespoons vegetable oil
2 large leeks (about 200g), washed and sliced into 1cm slices
3 large carrots (about 300g), peeled and cubed
2-3 stalks celery (about 100g), washed and sliced
300g chicken breasts, cubed
400g potatoes, washed and cubed
100g frozen green beans, chopped
500ml water
200g low-fat soft cheese

This recipe makes 4 adult-sized portions.

1. Heat the oil in a large pan. Add the leeks, carrots, celery and chicken and fry for 2 to 3 minutes.

2. Add the potatoes, green beans and water, bring to the boil and simmer for about 20 minutes until the vegetables and chicken are cooked.

3. Turn off the heat, stir in the soft cheese until evenly distributed and serve immediately.

For babies

- If serving this meal to a baby, chop the meat and vegetables finely, and allow to cool before serving.
Goulash

1 1/2 tablespoons vegetable oil
1 small onion, peeled and diced
350g lean pork meat, diced
1 green pepper, de-seeded and sliced
1 large potato, washed and diced
2 large (400g) cans chopped tomatoes
1 large (400g) can cannellini beans drained and rinsed (246g drained weight)
1 tablespoon paprika powder (this can be left out if a less spicy taste is preferred)
1 teaspoon bouillon powder
1 teaspoon dried mixed herbs

This recipe makes 4 adult-sized portions.

1. Heat the vegetable oil in a large pan and fry the onion and pork until the meat is browned on all sides and the onion is starting to soften.

2. Add the green pepper and potato and fry for 1 or 2 minutes.

3. Add all the other ingredients, bring to the boil and then simmer for 15 to 20 minutes until all the ingredients are cooked.

For babies

If serving this meal to a baby:
• don’t add the bouillon powder or paprika powder until after you have taken out the baby’s portion
• chop the meat and vegetables finely, and
• allow to cool before serving.
Rice recipes

Rice is the most commonly eaten staple food across the world. Its low cost and versatility make it a great base for a variety of healthy meals. All the recipes in this section can be cooked in one pot or saucepan, saving you time and washing-up! The only other equipment you'll need is a cutting board, knife, tin opener and spoon.

There are lots of different kinds of rice available in most supermarkets. All the recipes in this section have been made using supermarket value range long grain white rice, but other varieties of rice would work well too. Our recipes are based on 200g of dried rice. If you don’t have scales, this is equivalent to 1 cup (240ml) or 14 tablespoons.

There are lots of rice-based ready meals available in supermarkets. Often they come in microwavable pouches and are very expensive for the portion size you get. Making your own rice-based meals is much cheaper and often a healthier and tastier option.

If you are keeping cooked rice, you need to take great care to store it correctly. Keep it in the fridge but for no more than 24 hours. And make sure it is heated through to piping hot.

The following pages contain a range of one-pot rice recipes.

You can swap white rice for brown rice in all these recipes, but it takes 10-15 minutes more to cook brown rice until tender. Keep the lid on so that there is plenty of steam to cook the rice.

Other grains

You can base main meals around other grains such as couscous, bulgar wheat, quinoa, barley, oatmeal, cornmeal, cassava, millet, buckwheat, rye or sorghum.

Many cuisines around the world use different grains as the main staple food, and these can often be used alongside other sauces and toppings in this recipe guide. The grains can be made into porridges, boiled as you might boil rice, or can be cooked as tortillas or breads.

All grains are a good source of energy because of their starch content, protein, B vitamins and minerals such as copper, manganese, magnesium and phosphorus. Wholegrain versions are high in fibre.
Egg-fried rice

400ml water
200g white rice
6 large eggs
2 tablespoons vegetable oil
1 small onion, peeled and diced
1 red pepper, de-seeded and diced

This recipe makes 4 adult-sized portions.

1. Bring the water to the boil, add the rice, bring to the boil again and stir once. Place a lid on the pan and simmer for about 5 to 10 minutes. Turn off the heat and leave the rice in the pan with the lid. It should absorb all the water and be tender.

2. Break the eggs into a bowl and beat them until the yolks and whites are mixed.

3. In a frying pan, heat the oil and fry the onion and red pepper until they soften.

4. Add the rice to the vegetables and heat through.

5. Pour the egg mixture over the rice and, stirring all the time, cook the mixture until the eggs are cooked.

For babies

- If serving this meal to a baby, allow to cool before serving.
Jerk chicken with rice and beans

1 large skinless chicken breast (about 200g), cut into strips
1 heaped tablespoon jerk seasoning
1 tablespoon vegetable oil
1 small onion, peeled and diced
1 green pepper, de-seeded and sliced
1 large can (410g) red kidney beans, drained and rinsed (drained weight 240g)
200g white rice
400ml water

This recipe makes 4 adult-sized portions.

1. Coat the chicken strips in jerk seasoning and stir well. Leave in the fridge for an hour to marinate. (If serving this to a baby, leave some chicken unseasoned, cook it separately, and add it to some of the cooked rice mixture at the end.)

2. In a large saucepan, heat the oil and fry the onion and green pepper for 2 to 3 minutes.

3. Add the chicken and cook for 2-3 minutes.

4. Add the kidney beans, rice and water to the mixture and bring to the boil.

5. Simmer for about 20 minutes with the lid on the pan until the rice has absorbed the water and the chicken and vegetables are cooked.

For babies

- If serving this meal to a baby, chop the meat and vegetables finely, and allow to cool before serving.
**Turkey and vegetable pilaf**

2 tablespoons vegetable oil
1 teaspoon garlic paste or 1 clove garlic, crushed
1 teaspoon dried mixed herbs
1 teaspoon bouillon powder
200g raw turkey breast, cut into strips
1 green pepper, de-seeded and diced
1 large tomato, diced
150g frozen sweetcorn
200g white rice
400ml water

This recipe makes 4 adult-sized portions.

1. Heat the oil in a large pan and add the garlic, herbs, bouillon powder and turkey strips. Cook for a few minutes, stirring occasionally, until the turkey is slightly browned.
2. Add the vegetables and rice and cook gently for 1 minute.
3. Pour over the water, bring to the boil stirring all the time and then simmer gently for about 15 minutes with a lid on until the rice and vegetables are cooked.

**Tips**

- You can use any other meat or fish in a pilaf, and a variety of vegetables. You could try using frozen peas or green beans, carrots, courgette, butternut squash or other small amounts of vegetables you have left over from other recipes.
- To make a vegetarian version, use Quorn, chickpeas or any other peas or beans instead of turkey.

**For babies**

- If serving this meal to a baby, don’t add the bouillon powder until after you have taken out the baby’s portion.
- Chop the meat and vegetables finely, and allow to cool before serving.
Vegetable biryani

2 tablespoons vegetable oil
2 tablespoons medium curry powder
1 teaspoon bouillon powder
1 onion, peeled and diced
1 large carrot, peeled and diced
1 large potato, washed and cubed (no need to peel)
100g frozen peas
1/2 cauliflower, broken into small pieces
1 large can (400g) chickpeas, drained and rinsed (240g drained weight)
200g white rice
400ml water

This recipe makes 4 adult-sized portions.

1. Heat the oil in a large pan and add the curry powder, bouillon powder and onion and cook for a few minutes until the onion softens.
2. Add the carrot, potato, peas, cauliflower, chickpeas and rice and stir for 1 minute.
3. Pour over the water and simmer gently with the lid on the pan for about 20 minutes until the rice is tender and the vegetables are all cooked.

For babies

If serving this meal to a baby:
- don’t add the bouillon powder until after you have taken out the baby’s portion
- chop the vegetables finely, and
- allow to cool before serving.
Pasta recipes

Pasta is a great way to get a variety of vegetables into family meals. The quick cooking time of pasta makes pasta-based meals convenient for busy families.

You will find lots of different kinds of pasta in the supermarket. Choose a variety that works with your food budget or that you know you and your family will enjoy. We use about 450g of pasta in recipes for four adults. Most pasta comes in packets of 500g or 1 kg (1000g) so you should be able to estimate the amount easily.

There are lots of pasta sauces and ready-made pasta meals available in supermarkets, but many of them are expensive and contain unnecessary amounts of sugar, fat and salt. Making your own pasta sauce is a great way to save money and provide healthier meals for your family that taste a lot better than the bought versions.

Pasta is the general name given to spaghetti and the different shapes of pasta that are sold under a range of names such as penne, fusilli, farfalle and tagliatelle, and it also includes lasagna sheets.

Fresh pasta is usually a lot more expensive than dried pasta and has to be cooked and eaten quite quickly once you buy it. Dried pasta can be easily stored and is just as nutritious as fresh pasta.

Tips for cooking pasta

Add the pasta to a large pan of boiling water. The amount of time it takes to cook depends on the shape of the pasta, but it usually cooks in about 15 minutes. It is best if the pasta feels slightly firm when you bite into it.

- Don’t add oil to the water.
- Don’t add salt to the water.
- Cook with the lid on.
- Don’t overcook. Pasta cooks fairly quickly, so keep an eye on the time!
Green mac and cheese

500g macaroni
1 head (about 600g) broccoli, cut into florets
200g (1 tub) low-fat soft cheese
200ml semi-skimmed milk

This recipe makes 4 adult-sized portions.

1. Cook the macaroni in boiling water for about 15 minutes until it is soft. Place the broccoli in the same pan as the macaroni after about 10 minutes, or steam the broccoli over the boiling macaroni in a colander.

2. Drain the macaroni and broccoli and then stir in the low-fat soft cheese and milk.

3. Heat through if necessary before serving.

Other vegetables you can use

- Instead of broccoli you can use any other green vegetable in season such as finely chopped spring greens, chopped green beans, courgettes, green peppers, peas, cauliflower, spinach or any frozen green vegetable.

For babies

- Chop the vegetables and macaroni finely, and allow to cool before serving.
Pasta with green beans and peas

450g dry pasta or spaghetti
2 tablespoons vegetable oil
1 small onion, peeled and diced
1 teaspoon bouillon powder
250g frozen green beans
250g frozen broad beans
300g frozen peas

This recipe makes 4 adult-sized portions.

1. Cook the pasta or spaghetti in boiling water until cooked (see page 48) and then drain.
2. In a large pan, heat the oil and fry the onion and bouillon powder for a few minutes until the onion softens.
3. Add the remaining vegetables and heat through with a lid on until the vegetables are cooked.
4. Mix the pasta and vegetable mixture together and serve.

For babies

If serving this meal to a baby:
- don't add the bouillon powder until after you have taken out the baby's portion
- chop the vegetables and pasta finely, and
- allow to cool before serving.
Spaghetti Bolognese

200g lean minced beef
1 small onion, peeled and diced
1 medium carrot, peeled and grated
1 teaspoon garlic purée or 1 clove garlic, crushed
1 teaspoon bouillon powder
1 teaspoon dried mixed herbs
1 large can (400g) chopped tomatoes
75g porridge oats
200ml water
450g spaghetti

This recipe makes 4 adult-sized portions.

1. Dry-fry the mince with the onion, carrot, garlic, bouillon powder and mixed herbs until the mince is browned.
2. Add the tomatoes, oats and water and simmer gently for 15 to 20 minutes with a lid on until the meat and vegetables are cooked.
3. While the Bolognese is cooking, boil the spaghetti in water until tender (see page 48), and then drain.
4. Serve the Bolognese sauce over the pasta.

For babies

If serving this meal to a baby:
• don’t add the bouillon powder until after you have taken out the baby’s portion, and
• chop the meat sauce and spaghetti finely, and allow to cool before serving.
**Tuna pasta**

450g dried pasta (this can be pasta shapes or spaghetti)
2 tablespoons vegetable oil
1 small onion, peeled and diced
1 green pepper, de-seeded and diced
1 teaspoon garlic paste or 1 clove garlic, crushed
1 teaspoon dried mixed herbs
1 teaspoon bouillon powder
1 1/2 large cans (400g) chopped tomatoes (total 600g)
2 cans tuna (185g per can) in brine, drained (total 275g drained weight)

*This recipe makes 4 adult-sized portions.*

1. Boil the dried pasta in a large pan of water until it is cooked (see page 48).

2. Heat the oil in a large saucepan and add the onion, pepper, garlic, herbs and bouillon powder and fry, stirring regularly, until the onions and peppers are soft.

3. Add the canned tomatoes and tuna and heat through.

4. Add the cooked pasta and stir thoroughly until the tuna pasta is heated through.

**For babies**

If serving this meal to a baby:
- don’t add the bouillon powder until after you have taken out the baby’s portion
- chop the pasta finely, and
- allow to cool before serving.
No-cook meals

If you're in a hurry, the weather is hot or you want to make a simple meal, sandwiches and salads are a great way of providing a nutritious meal for you and your family. No-cook meals can also be slightly cheaper to produce than cooked meals as you don’t need to use any gas or electricity to make them.

Good choices for sandwich fillings and salad ingredients

| Bean spreads such as houmous | Raw vegetables: carrots, peppers, beans |
| Eggs | Roasted vegetables |
| Low-fat soft cheese or spreadable cheese | Salad vegetables: leaves, tomatoes, cucumber |
| Nut spreads such as peanut butter | Sweetcorn |
| Nuts and seeds | Tuna or other canned fish |
| Peas, beans and lentils |

Are hot meals more nutritious than cold meals?

Sometimes people think you have to have a hot meal for it to be nutritious, but if your meal consists of all the same components from the different food groups (starchy foods, meat or alternatives, dairy foods, fruits and vegetables), cold meals and packed lunches can be just as nutritious.

Packed lunch tips

Making packed lunches for children who go to school or for partners or family members going to work is much cheaper than buying food in sandwich bars or supermarkets, and you will know what went into them!

Packed lunches should contain a starchy base such as bread, pitta bread, a wrap or a pasta, rice or couscous salad; a meat or alternative such as egg, canned fish, houmous, peanut butter or soft cheese; some vegetables; some fruit; and a drink of milk or a yoghurt.

Some of the dishes in this resource can be served cold as salads the next day if they are refrigerated overnight.

Tip

- Raw vegetables such as carrots, peppers, celery and cucumber are quick and easy accompaniments to any no-cook meal.
Peanut butter and banana sandwiches, with carrot and cucumber

8 slices wholemeal bread
4 tablespoons (160g) peanut butter
2 large bananas, peeled and sliced
160g carrots, peeled and cut into sticks
160g cucumber, washed and cut into sticks

This recipe makes 4 adult-sized portions.

1. Spread the peanut butter onto four slices of the bread.
2. Add the sliced banana and top each sandwich with another slice of bread.
3. Serve the sandwiches with carrot and cucumber sticks.

Good sandwich fillings

- You can make sandwiches with a whole variety of nutritious fillings such as egg, houmous, canned fish such as tuna or sardines, or soft cheese. Add salad vegetables for colour and crunch. Always serve sandwiches with extra vegetables and salad.
Pitta bread with houmous and cucumber, with carrot salad

4 wholemeal pitta bread
300g houmous
120g cucumber, washed and sliced
3 large carrots (about 300g), peeled and grated
60g raisins
$1\frac{1}{2}$ tablespoons vegetable oil

This recipe makes 4 adult-sized portions.

1. Toast the pitta bread, and then cut off one end of each pitta to let out the steam and make a pocket.
2. Fill with houmous and cucumber sticks.
3. Mix the grated carrot, raisins and oil to make a salad.

For babies

- Serve the houmous, carrot salad and pitta bread separately.
Savoury couscous salad with tuna

300g couscous
200g frozen sweetcorn
550ml boiling water
1 can tuna in brine (drained weight 138g)
1 large tomato, washed and chopped
1 large can (410g) chickpeas, drained and rinsed (240g drained weight)
1 1/2 tablespoons vegetable oil
1 tablespoon chopped herbs (parsley, mint or coriander all work well)

This recipe makes 4 adult-sized portions.

1. Put the couscous and frozen sweetcorn in a large bowl. Pour the boiling water over it, stir and leave to absorb all the water. Fluff with a fork when cool.
2. Drain the tuna and flake the fish.
3. Add the flaked tuna and all the other ingredients to the couscous, stirring well.

For babies

- Chop the tomatoes finely, mash the chickpeas, and allow to cool before serving.

Price guide (at 2017 prices) = less than 50p per portion
Mexican bean and cheese wrap, with red pepper and celery

2 large cans (400g) mixed bean salad, drained and rinsed (520g drained weight)
4 large tortillas or wraps
160g hard cheese (e.g. Cheddar), grated
1 large red pepper, washed, de-seeded and sliced
4 sticks of celery, washed and sliced into sticks

This recipe makes 4 adult-sized portions.

1. Mash the mixed beans with a fork.
2. Divide the beans onto the four tortillas and top with the grated cheese.
3. Roll up and slice as needed.
4. Serve with the red pepper and celery sticks.

For babies
- Mash the beans well before serving them to a baby.
- Serve the tortilla, beans and cheese separately.
Everyone enjoys a good pudding! Puddings can be a good way of getting milk and fruit into your family’s diet.

Custard and rice pudding made with milk, or plain yoghurt, can be served with all sorts of fruit to make a tasty pudding. Some types of fruits can now be bought frozen – for example, mixed berries, mango chunks, or fruit salad. Frozen fruit is often better value than fresh fruit (especially out of season), and can also be bought with Healthy Start food vouchers.

Fruits are often cheaper when they are in season. See page 76 for tips on buying seasonally.

### Ideas for fruits that can be served with custard, rice pudding or yoghurt

- Baked apples
- Stewed apples
- Stewed rhubarb
- Baked pears
- Baked bananas
- Fresh nectarines
- Fresh peaches
- Pineapple
- Frozen berries
- Frozen mango
- Frozen peaches
- Satsuma segments
- Orange segments

### Puddings for children

Many people serve fruit and flavoured yoghurts and fromage frais to babies and children as desserts. These are often expensive and have a lot of added sugar. If a yoghurt says on the label that it has more than 12.5g of sugar per 100g, that is a lot of sugar. Fromage frais with more than 10g sugar per 100g is high in sugar.

You can make your own fruit yoghurts and fruit fromage frais using plain yoghurt or fromage frais and the fruit of your choice. Children will often like more fruity yoghurts and they can be a good way of using up some leftover stewed fruit or fruit purée. They can be a lot cheaper as well, and you can buy the fruit with your Healthy Start food vouchers.
Apple crumble

65g white flour
50g vegetable fat spread
65g porridge oats
40g sugar
5 eating apples (prepared weight about 350g)
1 teaspoon mixed spice or cinnamon powder

This recipe makes 4 adult-sized portions.

1. Heat the oven to 180°C / 350°F / Gas 4.
2. Put the flour in a bowl and add the fat spread to it. Rub the fat spread into the flour with your fingertips until it resembles breadcrumbs. Add the porridge oats and sugar and mix together.
3. Peel, core and slice the apples. Put the apples into a heatproof baking dish, add the spice or cinnamon and mix together.
4. Place the crumble mix over the apple and put the crumble in the oven for 30 to 35 minutes until the fruit is soft and the crumble browned.

For babies

• You can make crumble without adding any sugar.
• Allow to cool before serving.
Banana custard

30g custard powder
500ml semi-skimmed milk
30g sugar
4 large bananas (about 500g)

This recipe makes 4 adult-sized portions.

1. Blend 1 or 2 tablespoons of the milk with the custard powder to make a paste.

2. Put the remaining milk in a saucepan to heat. Before it comes to the boil, add the custard mixture slowly, stirring all the time so that it blends in and doesn’t go lumpy, and then add the sugar.

3. Stir the custard well as it comes to the boil and then simmer for a few minutes until it thickens.

4. Peel the bananas and cut them into chunks. Place in a bowl and pour over the custard.

For babies

- Mash the banana with the custard.

Tips

- You can add any fruit to custard – fresh, stewed or canned in fruit juice.
- If you want to liquidise the fruit and custard together it makes a ‘fruit fool’.
- You can also set the custard and fruit in layers in a glass to make it look special.
- You can make custard without sugar for babies as the mashed up banana will sweeten it.

Price guide (at 2017 prices) = less than 50p per portion

SUGGESTED PORTION SIZES

Adult / teenager aged 12-18

5-11 year old

1-4 year old

7-12 month old
Poached pear with Greek yoghurt and honey

4 large pears
4 tablespoons (80g) honey
360g Greek yoghurt

This recipe makes 4 adult-sized portions.

1. Peel the pears, remove the core and cut into quarters.

2. Place the pears in a saucepan of gently simmering water and poach for about 15 minutes.

3. Remove the poached pears and place in a serving bowl. Drizzle with honey and serve with Greek yoghurt.

For babies

- Serve this pudding without the honey. Honey should not be given to under-1s.
Rice pudding with raisins

85g pudding rice
850ml semi-skimmed milk
35g sugar
85g raisins

This recipe makes 4 adult-sized portions.

1. Place the rice, milk and sugar in a saucepan and heat gently, stirring all the time, until the mixture just comes to the boil.

2. Turn the heat down and, stirring regularly, allow to simmer gently for about 20 minutes while the rice absorbs the milk.

3. Stir in the raisins and heat through.

For babies

• Leave out the sugar when making desserts for babies.

Other milky puddings

• You can make milky puddings with other cereals, such as semolina, sago or tapioca. You can also add other sorts of dried fruit such as chopped apricots, dates or figs, or you can add fresh fruit.

• For people who don’t drink cows’ milk, you can make milk puddings from unsweetened calcium-fortified soya milk alternative, but you will need to use about one and a half times the volume of milk given above, and the puddings will take longer to cook.

• If you have the oven on for another dish, you can make the rice pudding in the oven by placing the same ingredients in a greased heatproof dish and baking for about an hour and a half on a bottom shelf.
First foods for babies from 6 months of age

At about 6 months of age, a baby is ready to have some foods to complement the milk he or she has been having from birth. Breastfeeding is still really important during the second six months of life – and lots of research shows that if mum and baby want to carry on breastfeeding into the second year, that is a great choice too. If infant formula is used as the main milk drink, then first infant formula is the only formula needed throughout the first year of life. There is no need to change to another type of infant formula or to follow-on formula as the aim is still to have a milk which is nutritionally based on breastmilk. Formula-fed babies can move on to whole cows’ milk after 1 year of age. You can find out more about which infant formula or other milks to give children on page 74.

What are the best first foods to give at 6 months?

Vegetables are recommended as the first new tastes to introduce to a baby, trying them one at a time to start with to get used to new flavours. Then move on to a variety of fruits, as well as foods such as peas, beans and lentils, meat, fish, eggs and cereals. These all make great first foods to give babies. Babies can be given finger foods to hold from 6 months, and a combination of spoon feeding and self-feeding can be a good way to get infants eating solid foods.

Ideas for first foods using fruits, vegetables and potatoes

It is important to encourage a range of textures during the second 6 months of life so that babies can learn to bite and chew food as their teeth develop during their early years. Never leave babies alone when they are eating in case they struggle to manage a piece of food in the mouth, as this can be a choking risk.

Giving babies a variety of first foods

The photos on pages 64-71 show how you can use some of the vegetables and fruit you can buy with Healthy Start food vouchers to make first foods for babies. Remember that babies need a wide variety of foods, including beans and lentils, meat, fish, eggs and cereals. For more detailed information about feeding babies in the first year of life, see Eating well: the first year, available at www.firststepsnutrition.org.
FIRST FOODS: Vegetables

Starchy and other root vegetables are useful first foods. Cook thoroughly and then mash with a little breast milk or infant formula. Potatoes and sweet potatoes can also be added as thickeners for other vegetables. Sweet vegetables – such as carrot or sweet potato – can be combined with less sweet ones when introducing new flavours.

These foods are good choices of first foods to introduce from the age of 6 months. Make sure a wide variety of vegetable foods are offered and that foods from across the rainbow of vegetable colours are introduced into babies’ diets. Brightly coloured food will be attractive to infants and can be offered in lots of combinations as first tastes. Never add salt or sugar when preparing food for babies.

FIRST FOODS: Fruit

Fruits make ideal first foods as they are naturally sweet and can be easily made into the right texture. A simple way to serve is to mash the fruit with a fork and then push it through a sieve (or through a mouli or baby blender) if you want to remove skin or seeds. You can add some expressed breast milk (or infant formula) or a small amount of baby rice to thicken it. Apples and pears can be cooked until mushy and then mashed. Bananas can be mashed until smooth. Or, if not fully ripe, they can be mashed with a small amount of breast milk or infant formula. Never add sugar or salt when preparing food for babies.

Energy requirements by age and gender

There are general estimates of how much energy (calories) people need by age and gender, and we use these to estimate portion sizes. You can see from the tables below how energy needs vary, but it is important to remember that individuals will have different appetites depending on how active they are and how tall and heavy they are.
ADULTS:
Average energy requirements in kcal per day

- Adult women 19–64 years: 2,130 kcal per day
- Pregnant women in third trimester: 2,330 kcal per day
- Breastfeeding women (those exclusively breastfeeding): 2,460 kcal per day
- Adult men 19–64 years: 2,650 kcal per day
- Older women 65 years +: 1,890 kcal per day
- Older men 65 years +: 2,320 kcal per day

What about infant formula marketed for hungry babies, to help babies sleep, infant formula for babies with ‘special dietary needs’ or infant formula made from soya protein?

There are a range of infant formula which make claims about how they can be beneficial to infant health (for example, by reducing colic or constipation, helping babies sleep or reducing allergy risk). **Most of these are not recommended by health professionals** and should only be used under medical supervision. It is not sensible for families to spend their Healthy Start vouchers on products that are not recommended, as there may be a risk to infant health from their use. For current information on all infant milks marketed in the UK, health professionals can access the report *Infant Milks in the UK* at [www.firststepsnutrition.org](http://www.firststepsnutrition.org).

**Making up infant milks safely**

It is important that, if families use their Healthy Start food vouchers to buy first infant formula, they receive independent information on safe use and preparation. Independent information on making up milks safely can be found at [www.unicef.org.uk/babyfriendly/baby-friendly-resources/leaflets-and-posters/guide-to-bottle-feeding/](http://www.unicef.org.uk/babyfriendly/baby-friendly-resources/leaflets-and-posters/guide-to-bottle-feeding/)
Below are examples of fruit and vegetables you can buy with Healthy Start food vouchers. You can buy the things on this list at any time of the year, but the chart shows when they are in season in the UK.

Eating well for new mums

This resource encourages all new mums to eat well and summarises current thinking on food, nutrition and breastfeeding. It provides photos and recipes for a range of simple, nutritious light meals and snacks perfect for busy mums on the go.

Eating well for new mums is available as a free pdf to download at www.firststepsnutrition.org. Printed copies are available at cost price from www.fbsresources.com
