Nano Diamond Suspension

Features:

- Available in suspensions of deionized water and various organic solvents
- High purity, surface modified HTHP nano-diamonds
- High chemical and thermal stability
- Environmentally friendly and biocompatible
- Unique surface modification technology
- Narrow size distribution and high dispersion efficiency
- Particle ranging from 5nm up to 500nm
- Simple cleanup after lapping/polishing
- Superior surface finish

CREATE ENDLESS POSSIBILITIES WITH THE POWER OF DIAMONDS
