

# 3D Surface printing

---

Our cutting edge technology  
3D surface printer can create  
any textured surface on a  
wide range of materials

# Natural textures

Our 3D Surface printer can recreate  
any surface found in nature

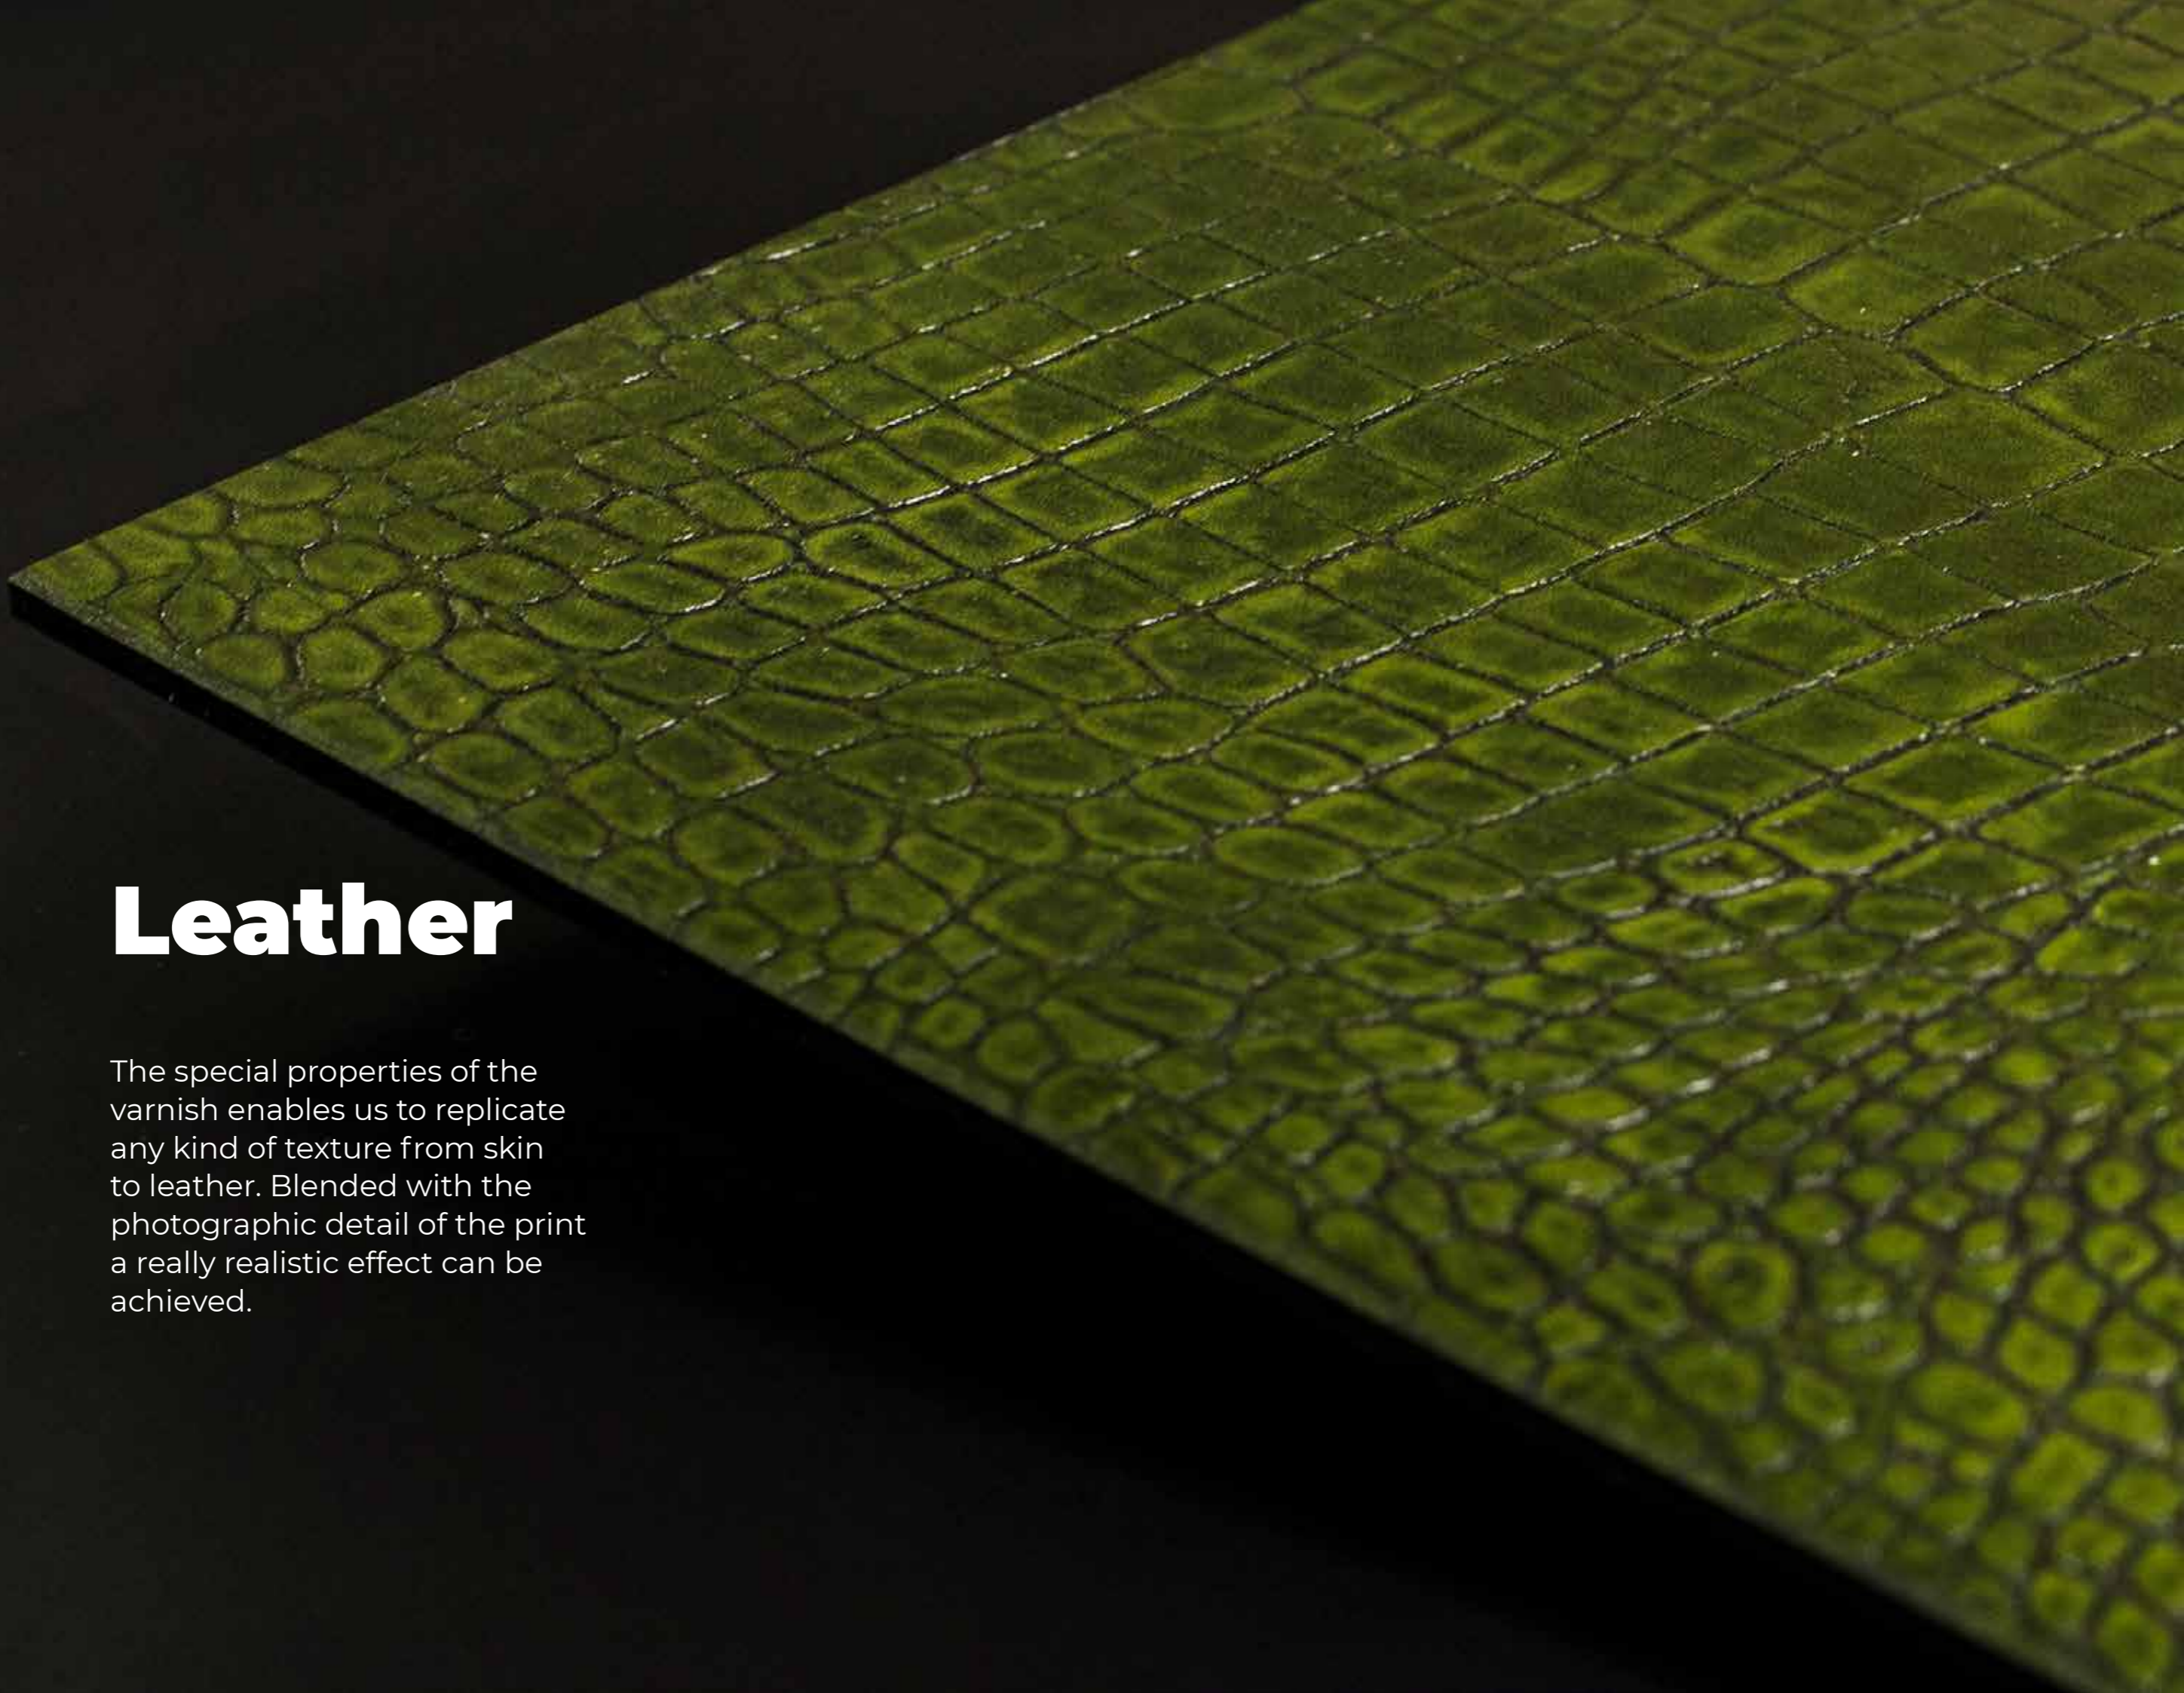

## **Black marble**

Black marble is one of the most elegant manifestations of stone. In this case the characteristic lines of the marble are printed on the back of the glass to keep the surface of the glass smooth.

# Leather

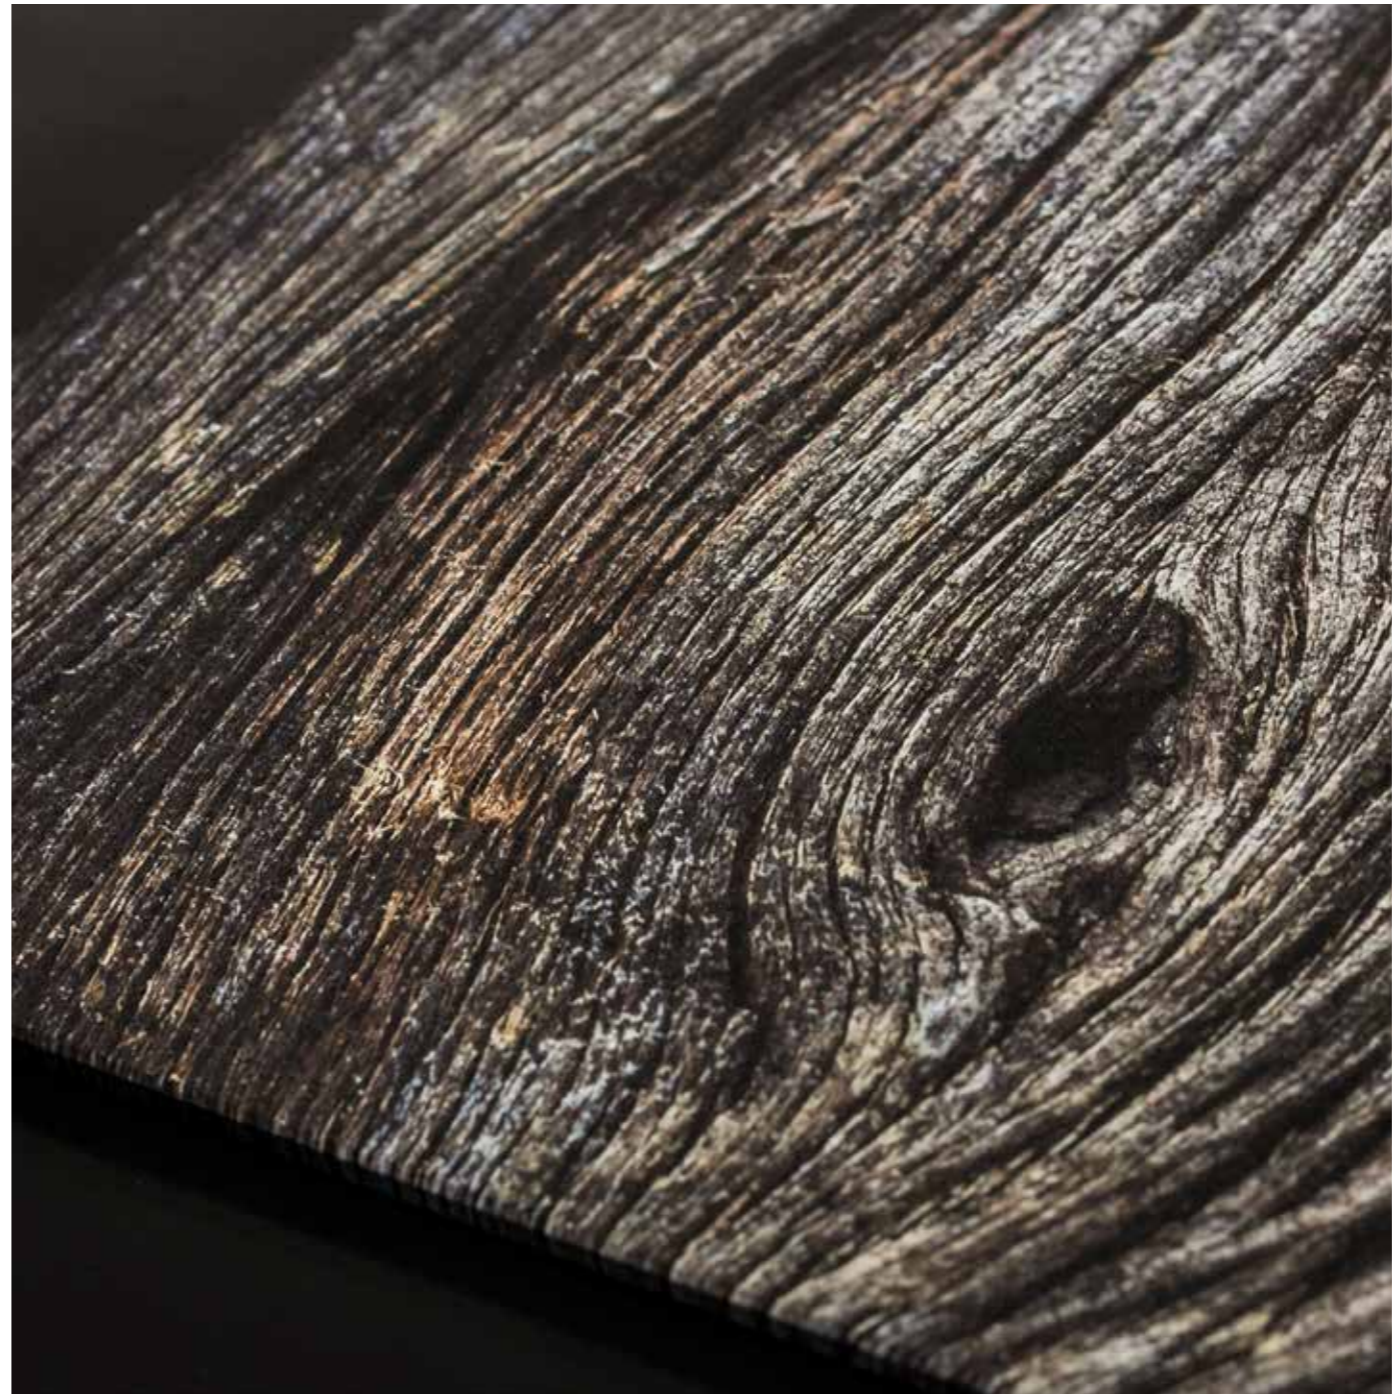

The special properties of the varnish enables us to replicate any kind of texture from skin to leather. Blended with the photographic detail of the print a really realistic effect can be achieved.

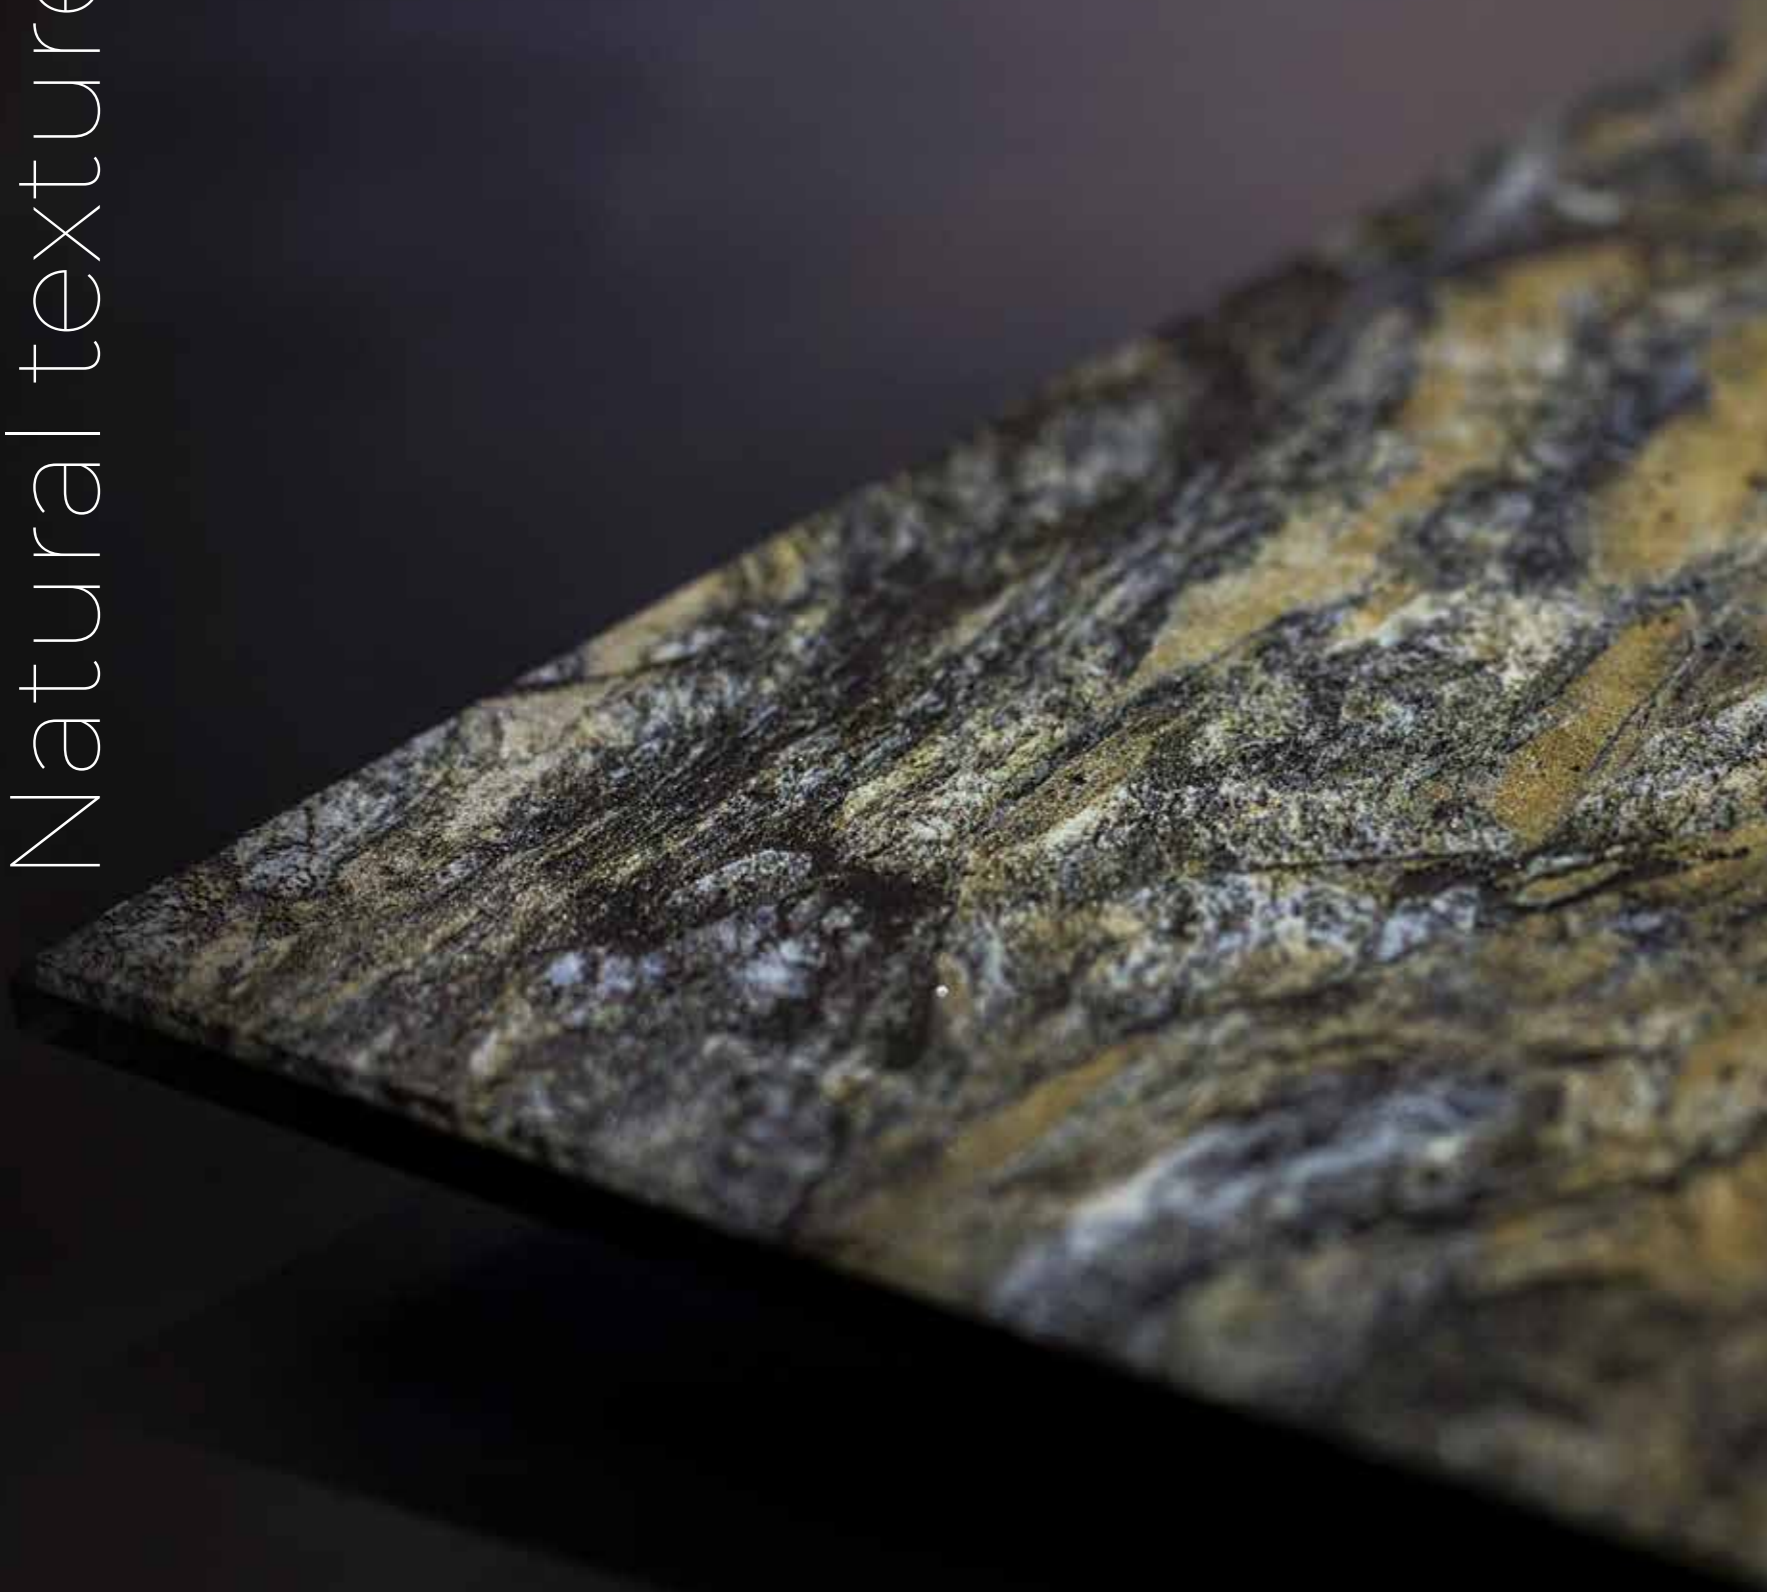

# Tree bark

A detailed high quality print and specialised ink to build up any organic textures found in nature.

## Stone

The rough surface, rich colours and reflections of the different components of a stone are highlighted in this piece of glass.

# Decorative designs

The attributes of the print enhances  
any design from the more  
minimalistic to the more complex

Decorative designs

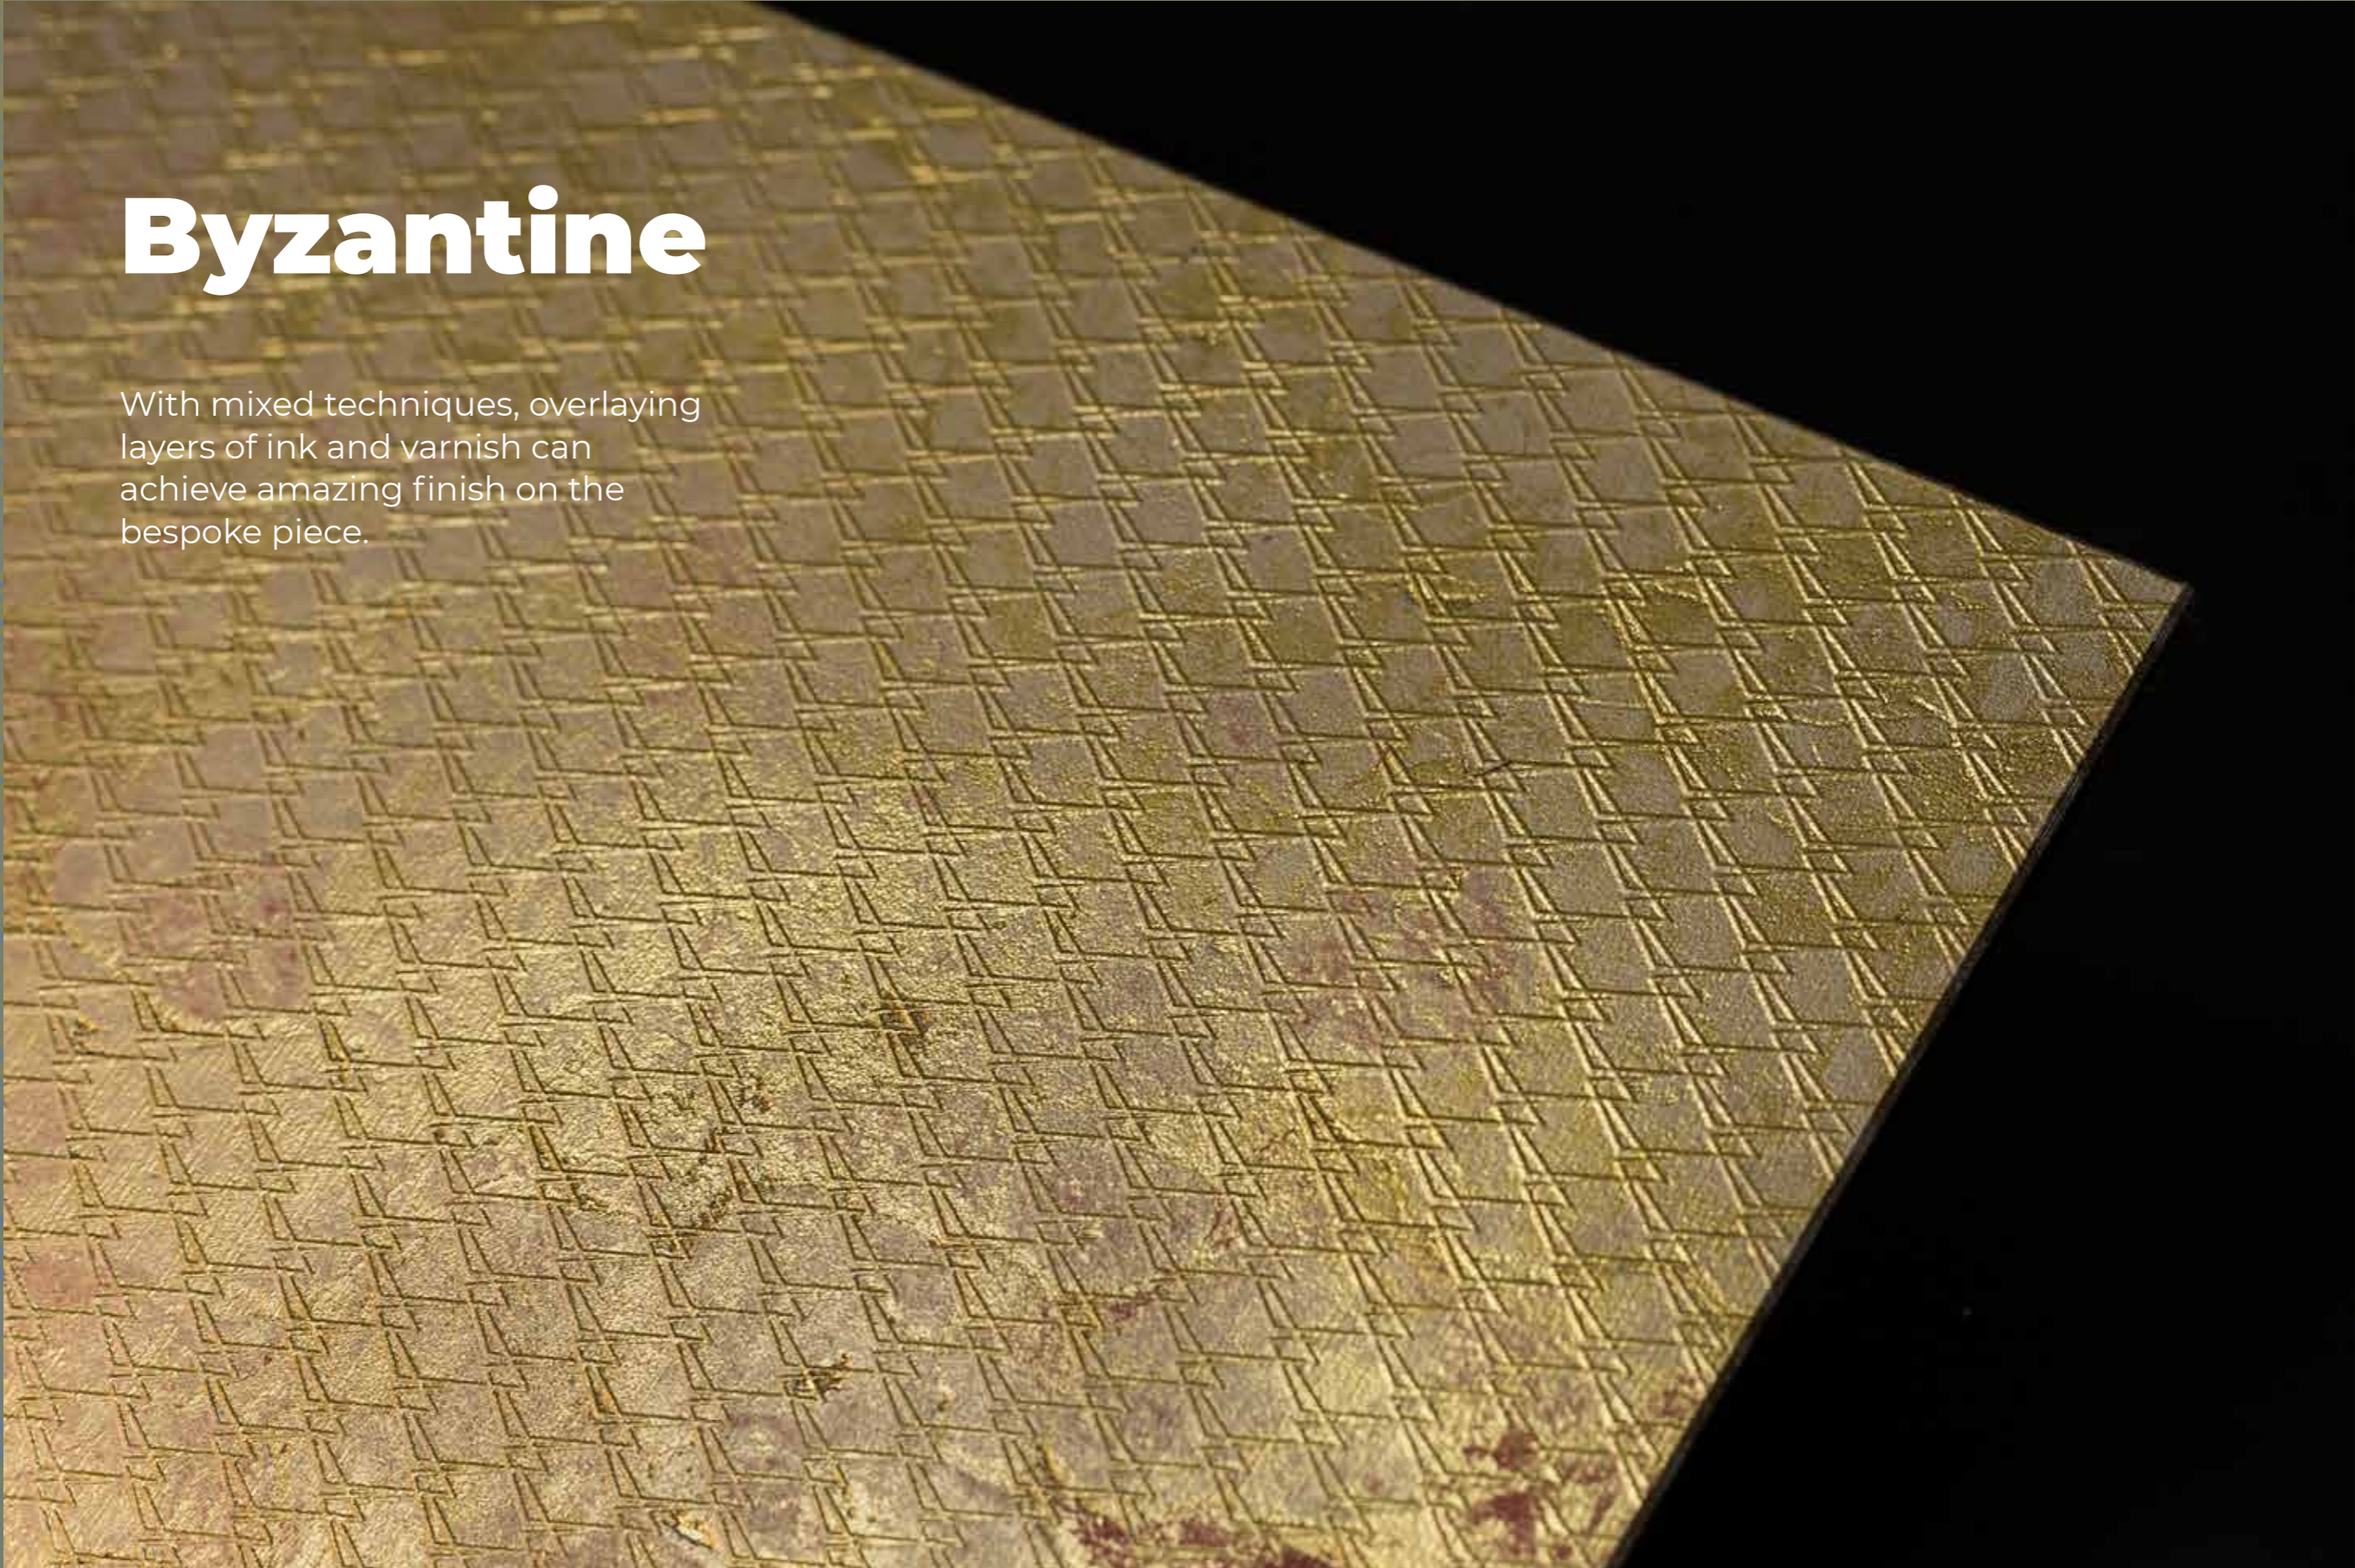

# Decodent

Any custom pattern can be printed to deliver your unique vision.

# Byzantine

With mixed techniques, overlaying layers of ink and varnish can achieve amazing finish on the bespoke piece.

Decorative designs

# Baroque

Custom finishings can be applied to get the best result for the project.

# Jungle

Colourful and vibrant graphics allow light to enter any space while giving privacy. The leaves printed over a white background create a colourful and vibrant trellis.

# Hollywood Boulevard

A mix of different textures and colours to create a unique piece that resembles the famous stars made on terrazzo and brass.

VISION

# Iris

The eloquent combination of art and reflective materials showcase the finest style befitting in any refined environment.

# Geometric Patterns

A selection of geometric patterns  
reveal how light reflected can create  
mesmerizing ethereal effects

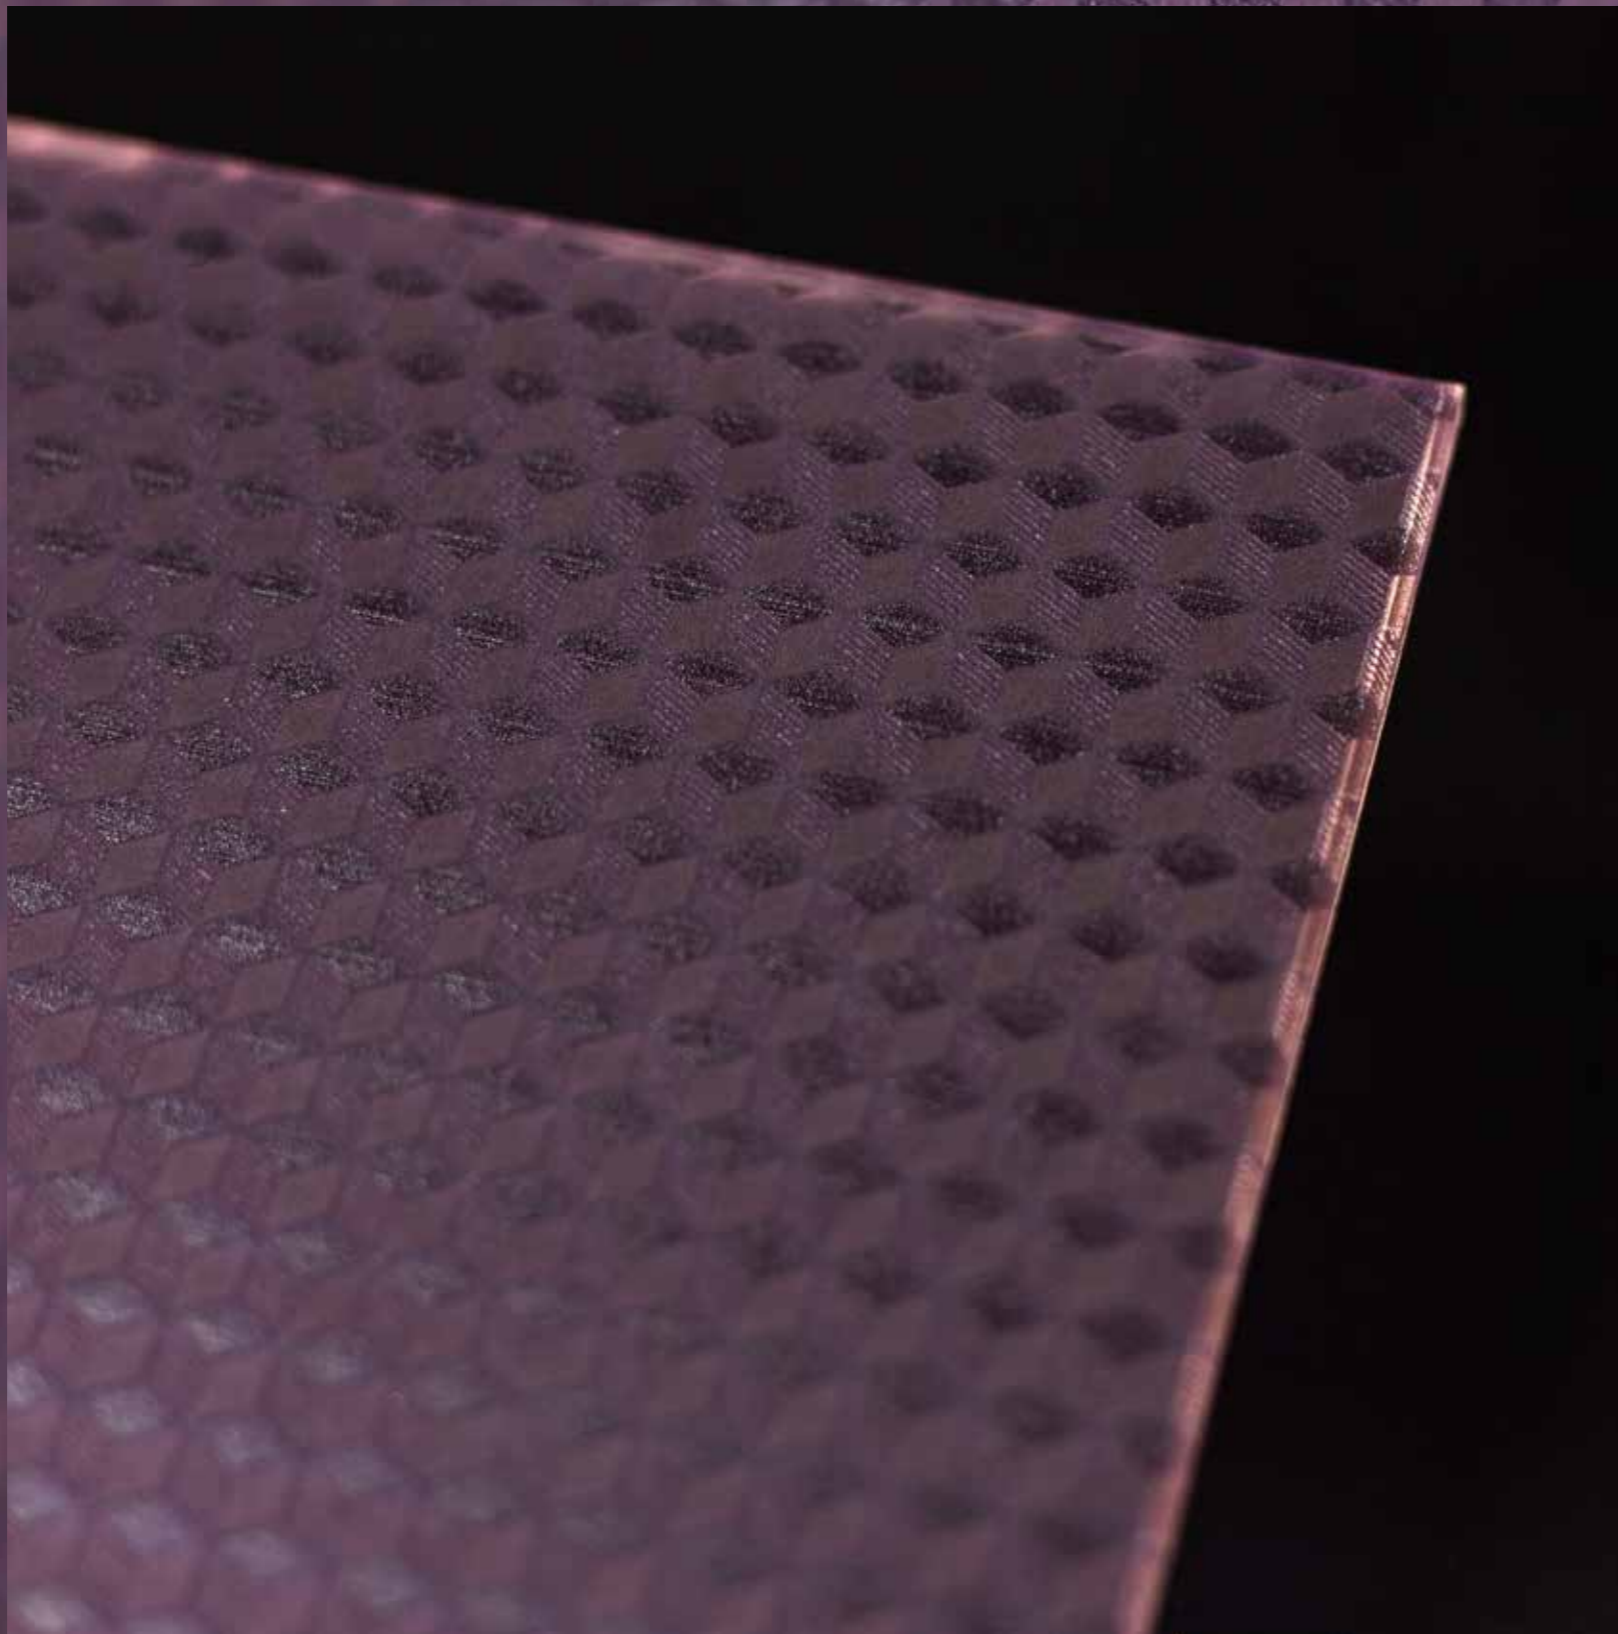

Geometric patterns

## **Futurista**

The combination of matt and gloss ink create a finish that reflect and refract the light in any space.

## **Violet Flection**

A hexagon pattern is used to create a 3D illusion combined with the most minute detail.

Geometric patterns

## Fractal Work

Dimension and depth are created with the use of opaque and translucent inks and micro particles gives the piece a ethereal glow,

# Industrial texture

Uniform patterns with an industrial feel, custom made and reimagined to be used in a wide range of environments.

Industrial texture

# Juxtapose

Industrial anti-slip flooring inspires this design while the premium materials elevates the pattern to a high end product.

Industrial texture

# Industrial

A variation of this classic pattern widely used in industrial environments but with a stylish and sophisticated finish.

Industrial texture

# Hive

A bright uniform orange printed on the surface and a cell pattern printed with a high gloss varnish.

# 3D Surface printing
