

Working Remotely With Yealink Voice and Video Device Solutions for Microsoft Teams

The global coronavirus pandemic has affected lives and businesses throughout the world:

1. As people stay home, professional audio and video devices are needed to work from home. The unavailability of on-site support during this period means that the devices have to be easy to install and deploy.
2. Commercial expansion that continues during the pandemic are faced with business travel restrictions. To participate in or hold formal medium-to-large meetings with 5–20+ attendees in various meeting spaces, professional audio and video devices are a necessity.
3. Remote diagnosis can be conducted via telemedicine to reduce the risk of infection during non-urgent diagnostics. As such, high-quality and easy-to-use audio and video devices are necessary for facilitating the patient-physician communication.

Regardless of whether you need to work from home, take part in virtual meetings due to travel restrictions, or cater to remote medical diagnostics, Yealink Voice and Video Device Solutions for Microsoft Teams will provide you with all-in-one solutions. During this crisis, the entire Yealink team is working closely with our partners to provide you with products and support as much as possible. Together, we will get through this.

Work from home

Business travel restrictions

Telemedicine for non-urgent diagnostics

For personal daily routines
