BREW OF THE MONTH 5.0% ABV 26 IBU

When the 8 Goths and 22 Norwegians made the voyage to Minnesota in 1362, you could have been sure they were thirsty. The Runestone Rye is an homage to this hotly debated artifact. Much like the Kensington Runestone, it is a little rough around the edges. The Rye adds a peppery undertone which complements its semi-sweet malt bill. This beer is nothing short of a legend.
