

## Direct Access Cystoscopy Service

To reduce waiting times and improve efficiency for patients Dr Danielle Delaney offers referring doctors a Direct Access Cystoscopy Booking Service. Male and female patients are booked directly onto the cystoscopy Day Surgery list at Castlecrag Private Hospital to avoid waiting for availability to see the doctors in the consulting rooms. This also results in more streamlined care. A flexible cystoscopy under local anaesthesia will be performed.

### The benefits to Doctors and Patients:

- An efficient one appointment process for both consultation and procedure.
- Reduced patient waiting times.
- All referrals reviewed by urologist/nurse prior to their appointment to ensure suitability.
- Consultation by the treating Urologist on the day, immediately prior to the procedure. (Please contact us if your doctor has recommended this service, but you would instead prefer a consultation with the urologist in their consulting rooms first).
- Local anaesthetic Day Procedure (no fasting, no sedation), so no escort needed unless normally required.
- Patients who are able can self-drive to and from the appointment unless instructed otherwise.
- No need to cease usual medications including warfarin.
- Further investigations, follow up and treatment recommendations arranged as appropriate.

### Suitable Patients:

- Asymptomatic microscopic haematuria in the absence of infection (renal ultrasound recommended prior)
- Asymptomatic macroscopic haematuria in the absence of infection (contrast CT haematuria urogram recommended prior)
- Simple recurrent Urine Infections (no intervening symptoms)
- Sterile Pyuria
- Previous history of bladder Cancer (Surveillance)

### How to Book

- Phone: 02 8920 1161
- or visit [www.drdanielledelaney.com.au](http://www.drdanielledelaney.com.au)
