DEAD HORSE POINT STATE PARK

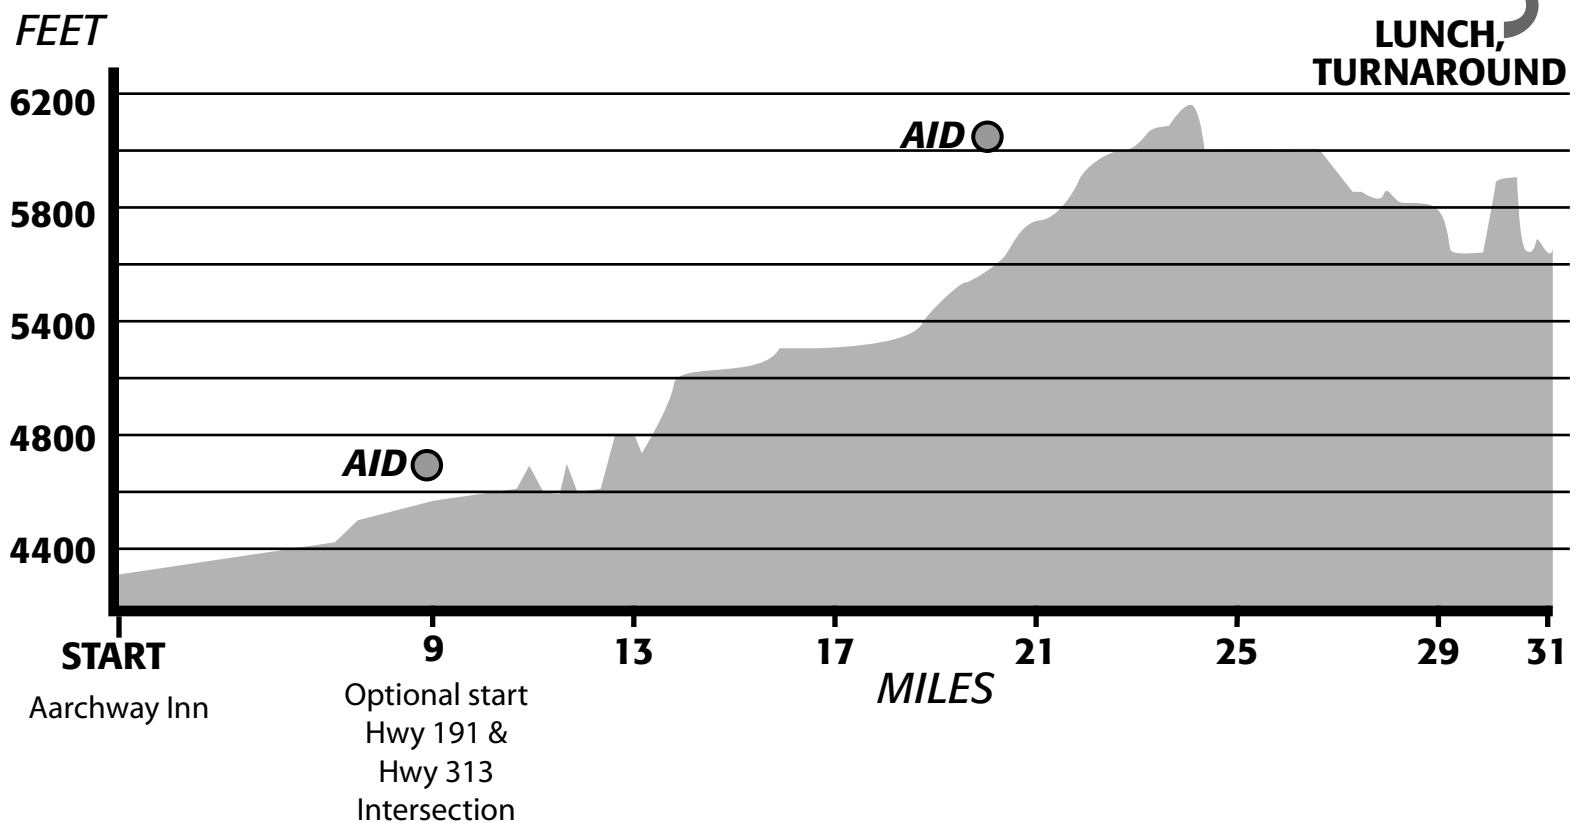

Lunch & Turnaround

DEAD HORSE POINT

Hwy. 191

DAY ONE: *Dead Horse Point Ride*

60 (or 44 if starting from Hwy 313) miles out-and-back,
2700 ft. in climbing elevation

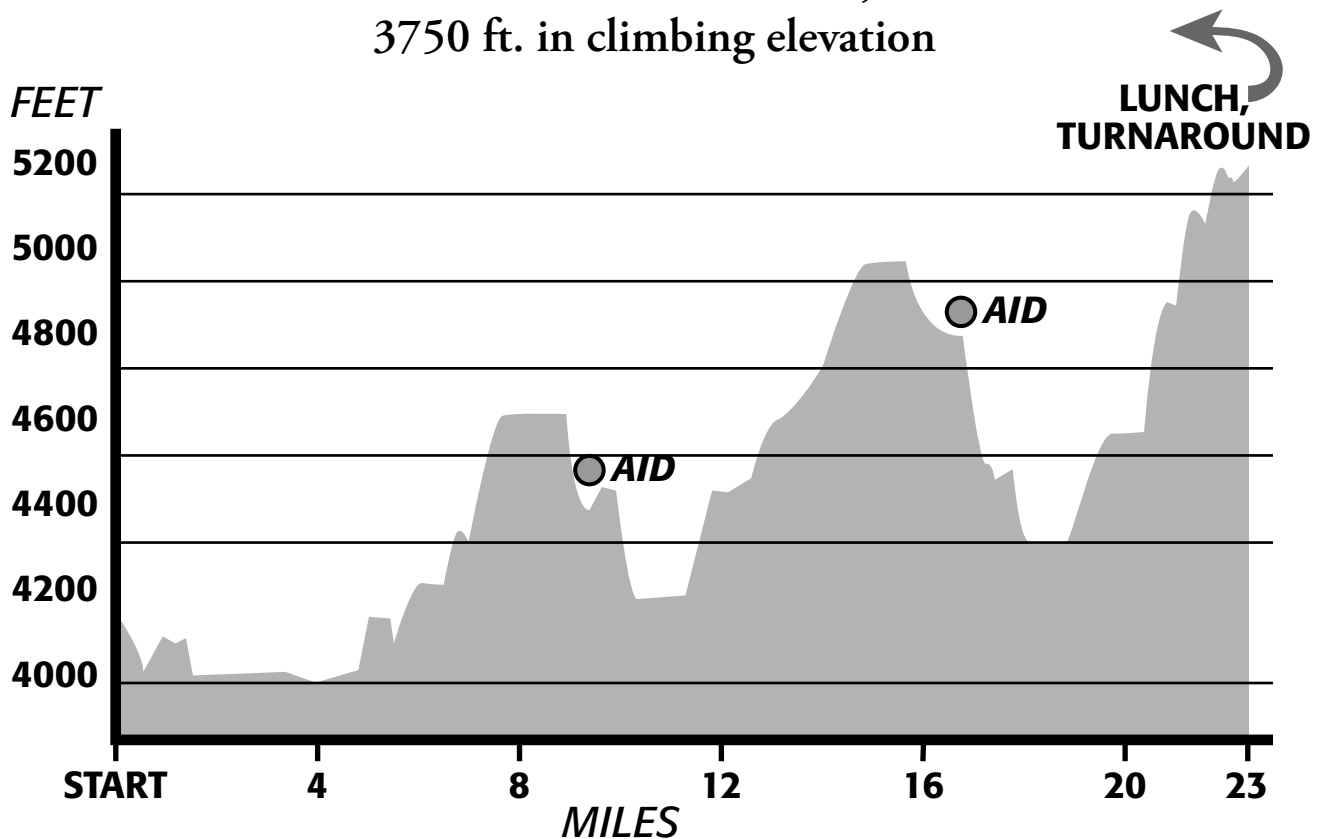

DAY TWO: *Colorado River Corridor Ride*

50 miles out-and-back, 1700 ft. climbing elevation

DAY THREE: *Arches National Park Ride*

46 miles out-and-back,
3750 ft. in climbing elevation

DAY FOUR: *River Portal Ride*

What can we say? 40 miles round trip with a slight downriver feel on the way to the AID station and turnaround point then a slight up river pull on the way back. Overall elevation change? About 200 feet if you count the two small hills. This route doesn't **qualify** for elevation maps! Enjoy your day. It is beautiful and very scenic!
