

YOU CAN'T ONLY CALL THEM WHITE NATIONALISTS

They don't care
about twenty six year old schoolchildren killed in Sandy Hook
or five hundred forty-seven victims of mass shooting in Las Vegas
They say they don't want to "politicize tragedies"
by talking about gun control
because the NRA controls them

They don't care
about the millions of Americans who won't have health insurance
or who won't have food stamps

They don't care
about women who won't be able to get precancerous screenings,
get AIDS testing or prenatal care
because they cut funding to Planned Parenthood
They say they are pro-life
but once the child is out of the womb
they are on their own

They don't care
about the millions of senior citizens
who will be kicked off Medicare, Medicaid
and Social Security
and who will potentially be kicked out of nursing homes
for lack of funds

They don't care
about young people who can't afford to go to college
or take on major debt because of college
and who can't find jobs after college

They don't care
that poor people will have to pay proportionately more
in taxes than rich people

They don't care
about those who lost everything in Harvey, Irma, Maria
and the California wildfires, floods and mudslides
or about future generations
who will live with the consequences
of denying climate change
They say they want to keep the focus
on "Pittsburgh not Paris"
but neither Pittsburgh nor Paris

would be exempt
from climate change

They don't care
if there will be serious international consequences
when they call other countries s***holes
They choose to remain silent

They care
about their donors, the one-percent,
who paid billions
of tax deductible campaign dollars
so now we have a First Lady
who can afford to spend thousands
to look like
she stole someone's shower curtain
on New Year's Eve
