

Konch comes out with a new format shortly. We are forming the Manumit Foundation to receive donations through a 501C3. The response to 45's remark about Africa and Haiti from designated media "thought leaders" showed that they are as ignorant of Africa as 45. We've been publishing African writers since the 1970s. We published Keorapetse William Kgositsile in 1974. We've also published Haitian writers, including Dr. Louis Mars whose ancestor fought alongside American troops at the Battle of Savannah in 1779! A narrow Eurocentric education is no longer viable in a global civilization. Judging from conversations I've had with real European intellectuals since I was seventeen, American Eurocentrics don't even get Europe right, which is why the views of some of our significant often quoted thought leaders are at home with Trump, intellectually. They've merely read more books. Written by white authors, exclusively. Minister Louis Farrakhan is doing more to preserve Western Civilization than they. You can see him performing a Mendelssohn Violin Concerto with the Oakland Symphony on YouTube!! Can Steve Bannon do that? The expressions of the handful of Blacks, Hispanics, Asian-Americans and Native Americans, who are given space in the corporate media are limited by the owners. There will be no restrictions placed upon Konch contributors. The new Konch will be published four times per year.
