Each year millions of kids embark on new Scouting adventures. These Scouts are trailblazers, innovators, and leaders. Each new experience teaches character development, confidence, and offers endless possibilities. Scout’s Own products fuel fun adventures for young people and their families across the United States. When you purchase a Scout’s Own product, you’re funding discovery, outdoor adventure, and tomorrows leaders.

Scout’s Own started in Northern Ohio at Beaumont Scout Reservation. On the 1,200 acres of land, Scouts and their families spend their time creating memories and friendships while exploring their passions, getting closer to nature on outdoor adventures, and enriching their minds through unique programs focusing on arts and crafts, S.T.E.M., sportsmanship, and much more.

The first product, Scout’s Own Maple Syrup, is produced each year by tapping thousands of maple trees at camp that produce the maple sap each season. Scouts take part in learning more about the history and process of making maple syrup through specialized programs. They can then put their entrepreneurial skills to work by selling Scout’s Own to fund their own Scouting adventures!
