<tbody>
<tr>
<td>Winter 1991</td>
<td>LKRLT receives first easement! A major portion on Long Island across from Fort Popham covering more than 80 acres and two miles of shoreline.</td>
<td></td>
</tr>
<tr>
<td>Summer 1991</td>
<td>Annual meeting held at Cosmopolitan Club, speaker was Dr. Peter Larsen of Bigelow Labs on the Kennebec Area Research Endowment, noting the estuary as “the largest macrotidal estuary in the contiguous 48 states.”</td>
<td></td>
</tr>
<tr>
<td>Spring 1992</td>
<td>75 Bat Houses sold to raise money for LKRLT.</td>
<td></td>
</tr>
<tr>
<td>Fall 1993</td>
<td>Alternative Minimum Tax laws changed to allow deduction of full value of gifts of appreciated property. This may substantially increase the value of easement and land donations.</td>
<td></td>
</tr>
<tr>
<td>Fall 1994</td>
<td>Bowdoinham analyzes costs and benefits of large housing development on 307 acre farm, concluding that “Undeveloped land is the best tax break a town has.”</td>
<td>South Portland study reveals city cost of $1.30 in services for every $1.00 in taxes generated from developed properties.</td>
</tr>
<tr>
<td>1994 Year End</td>
<td>Operating expenses remain under “careful control”. Total expenses were $1,037.45.</td>
<td></td>
</tr>
</tbody>
</table>
Spring 1995
Three major “stretch” objectives established:
1. Expand membership in Woolwich
2. Accomplish a major conservation project in the Back River corridor
3. Develop a record of accurate landowner data

Fall 1995
Soldier Point easement completed along Goose Rock Passage on the lower Sasanoa in Georgetown.

LKRLT joins Maine Wetlands Coalition

Fall 1995
Bill Blaiklock recognized for his 7 years of service, first as founder then board president. “Your grace, guidance and leadership... has been a vital factor in our success.”

Fall 1996
Jason and Virginia Schoener donate easement on 154 acres in Georgetown.

The land includes woodland, rock outcrops, significant shore frontage on Robinhood Cove and a large hill along Route 127 known as the “sledding hill”.

Summer 1997
Tidal marsh study completed identifying 71 marsh systems over 5 acres. Ecological integrity relatively intact, however most showed signs of human disturbance, including tidal restrictions, fill, ditches and invasive species.

Summer 1997
LKRLT receives grant from U.S. Fish and Wildlife Service to conduct an evaluation of tidal marshes in the region.
